50 Green Projects for the Evil Genius

50+ activities to entertain kids at home, in the classroom and even on holiday! Let's get crafty! You will never be bored again with the brilliant things to make and do in Boredom Busters. The book is divided into five themed chapters: Art, Craft, Science, Food and Travel. Art Activities shows you how to create pretty pictures using homemade paint, recycled crayons and even coffee filter paper and shaving cream! In Craft Activities, reuse milk cartons for your own bowling game, turn a baby food jar into a snow globe and make cinnamon clay decorations. You will love the cool experiments in the Science section - from growing your own crystals to setting off plastic bottle tornados and creating 'lava' in a cup. Cook up a storm with the great recipes in Food Activities: cool ice cream cone cupcakes, delicious chocolate mug cake and colourful pizza faces. Finally, discover ways to keep yourself busy on journeys and holidays in Travel Activities, such as making a T-shirt pillow, wooden spoon puppets and a homemade travel journal.

50 Year Adventure

It may not be obvious why someone like myself would write my memoir. I am not a famous person. I am not a professional athlete. I am not a politician. I am not even known in my local area of North Carolina. I do not fit into any of these typical categories of autobiographical writers. However, as in most people, I have a story to tell that is unique from many and common to some. We all have stories that people can relate to and sympathize with, if only we just tell them. I find a great relief when I learn that others have survived similar struggles that I am going through. I am living proof that it is possible to live through many things and come out the other side a better person

For many children, geometry is best understood as a hands-on subject. What better way to explore concepts such as area, perimeter, and volume than actually measuring area, perimeter, and volume? With this handy resource, children will build polygons out of pipe cleaners and flexible drinking straws, explore Mobius strips made from index cards, and model the Pythagorean Theorem using cheese crackers. These activities and more can be found in *Junk Drawer Geometry*, which demonstrates that you don't need high-tech equipment to comprehend math concepts—just what you can find around the house or in your recycling bin. Educator Bobby Mercer provides readers with 50 creative geometry project ideas for engaged learning. Each activity includes a materials list and detailed, step-by-step, instructions with illustrations. The projects introduced here include ideas on how to modify the lessons for different age groups, allowing anyone teaching children to use this to excite any classroom. Educators and parents will find this title a handy resource to teach children problem-solving skills and applied geometry, all while having a lot of fun.

Fun Activities To Do With Your Kids

50 States, 5,000 Ideas

A children's instructional book on how to use readily available materials to turn the house into a science lab Physics teacher Bobby Mercer provides readers with more than 50 great hands-on experiments that can be performed for just pennies, or less. Turn a plastic cup into a pinhole camera using waxed paper, a rubber band, and a thumbtack. Build a swinging wave machine using a series of washers suspended on strings from a yardstick. Or construct your own planetarium from an empty potato chip canister, construction paper, scissors, and a pin. Each project has a materials list, detailed step-by-step instructions with illustrations, and a brief explanation of the scientific principle being demonstrated. *Junk Drawer Physics* also includes sidebars of fascinating physics facts, such as did you know the Eiffel Tower is six inches taller in summer than in winter because its steel structure expands in the heat? Educators and parents will find this title a handy resource to teach children about physics topics that include magnetism, electricity, force, motion, light, energy, sound, and more, and have fun at the same time.

Coding for Kids - Python

A beautifully presented, practical gift guide to 50 sights in the skies above us – complete with a glow-in-the dark front cover. Explained with fascinating, easy-to-understand commentary from astrophysicist and science communicator, Sarah Barker, and illustrated throughout with captivating drawings by Maria Nilsson, each guide helps you locate an incredible sight. The book is divided into three main sections – and whether you use the naked eye, a telescope, or fall into a black hole of online research, you ’ ll discover the limitless wonder of the skies – from otherworldly phenomena on Earth like sun dogs, to planets, moons, stars, lunar craters and galaxy clusters. Naked Eye: Learn how navigators travelled in the past by finding the North Star; say hello to our astronauts and learn how to spot the International Space Station; see a red supergiant star (Betelgeuse); and find out more about solar eclipses. Further Afield: Find out more about the next closest galaxy, Andromeda; learn about the discovery of Saturn ’ s ‘ ears ’ (or rings!); spot an alien storm that ’ s as big as the Earth; and track ‘ Little Green Men ’ and ice volcanoes. Far, Far Away: Learn how baby stars are created by the Pillars of Creation; marvel at the Hubble Deep Field; and unearth the brightest things in our universe, quasars. The book also includes advice on ideal conditions for observing the stars, telescopes and binoculars, and navigating the skies. With extra tips and a rundown of useful tools, you ’ ll find everything you need to get out there and look up!

Tiny Buddha

A little book of timeless wisdom by the founder of TinyBuddha.com: An “ engaging, thought-provoking book ” that explores life ’ s biggest questions (Gretchen Rubin, author of The Happiness Project). What is the meaning of life? Why are relationships so hard? What does it take to be happy? The answers to these and life ’ s other questions are explored in author Lori Deschene ’ s Tiny Buddha. In 2008, Deschene began asking life ’ s biggest questions on Twitter. The many insights that came flooding back to her became the starting point for this uniquely modern guide to life ’ s most ancient mysteries. Through the process of engagement, research, and personal reflection, Deschene learned that these questions unite us. And while no one answer is right for everyone, the simultaneous lack and abundance of answers is the answer. Tiny Buddha combines many of the responses Deschene received with her own insightful essays and lessons from wise teachers throughout time, as well as practical tips and exercises to help you bring more meaning and intention to your life. Deschene also shares her own experiences overcoming depression, isolation, self-loathing, and a sense of meaninglessness. The result is a guide that helps readers discover the endless possibilities of a life lived mindfully in the present, connected to others.
