Since the beginning of time, the heart of mankind has overcome or perished in the many smiling, deceiving faces of evil and adversity. This is the story of four women born oceans apart, from different generations and cultures, yet bound by their African roots and descent and, of course, the unavoidable human condition of falling prey to the enticing trap known as the bite of the serpent. Some are bitten by surprise, unaware of the evil that lurks. Some are bitten for they have nowhere to run. And still others fall in an attempt to play charmer to the serpent. These women's interactions with each other and the world reveal challenges that leave each one questioning whether there is a silver lining, or whether this poisonous, toxic cloud has marked the beginnings of her demise.

matter most.” —Joanna Gaines, author of *Magnolia Table*  
“Generation after generation, Joy has been a warm, encouraging presence in American kitchens, teaching us to cook with grace and humor. This luminous new edition continues on that important tradition while seamlessly weaving in modern touches, making it all the more indispensable for generations to come.” —Samin Nosrat, author of *Salt, Fat, Acid, Heat* In the nearly ninety years since Irma S. Rombauer self-published the first three thousand copies of *Joy of Cooking* in 1931, it has become the kitchen bible, with more than 20 million copies in print. This new edition of *Joy* has been thoroughly revised and expanded by Irma’s great-grandson John Becker and his wife, Megan Scott. John and Megan developed more than six hundred new recipes for this edition, tested and tweaked thousands of classic recipes, and updated every section of every chapter to reflect the latest ingredients and techniques available to today’s home cooks. Their strategy for revising this edition was the same one Irma and Marion employed: Vet, research, and improve *Joy*’s coverage of legacy recipes while introducing new dishes, modern cooking techniques, and comprehensive information on ingredients now available at farmers’ markets and grocery stores. You will find tried-and-true favorites like Banana Bread Cockaigne, Chocolate Chip Cookies, and Southern Corn Bread—all retested and faithfully improved—as well as new favorites like Chana Masala, Beef Rendang, Megan’s Seeded Olive Oil Granola, and Smoked Pork Shoulder. In addition to a thoroughly modernized vegetable chapter, there are many more vegan and vegetarian recipes, including Caramelized Tamarind Tempeh, Crispy Pan-Fried Tofu, Spicy Chickpea Soup, and Roasted Mushroom Burgers. *Joy*’s baking chapters now include gram weights for accuracy, along with a refreshed lineup of baked goods like Cannel é s de Bordeaux, Rustic No-Knead

Sourdough, Ciabatta, Chocolate-Walnut Babka, and Chicago-Style Deep-Dish Pizza, as well as gluten-free recipes for pizza dough and yeast breads. A new chapter on streamlined cooking explains how to economize time, money, and ingredients and avoid waste. You will learn how to use a diverse array of ingredients, from amaranth to za'atar. New techniques include low-temperature and sous vide cooking, fermentation, and cooking with both traditional and electric pressure cookers. Barbecuing, smoking, and other outdoor cooking methods are covered in even greater detail. This new edition of Joy is the perfect combination of classic recipes, new dishes, and indispensable reference information for today's home cooks. Whether it is the only cookbook on your shelf or one of many, Joy is and has been the essential and trusted guide for home cooks for almost a century. This new edition continues that legacy.

Hills Remember: The Complete Short Stories of James Still honors the late writer by collecting all of Still's short stories, including his stories from *On Troublesome Creek* (1941), *Pattern of a Man and Other Stories* (1976), and *The Run for the Elbertas* (1980), as well as twelve prose pieces originally published as short stories and later incorporated into *River of Earth*. Also included are several lesser-known stories and ten never-before-published stories. Recognized as a significant writer of short fiction in his day -- many of his stories initially appeared in *The Atlantic* and *The Saturday Evening Post* and were included in *The O. Henry Memorial Award Stories* and *The Best American Short Stories* collections -- Still's short stories, while often overshadowed in recent years by his novels and poetry, are among his most enduring literary works. Editor Ted Olson offers a reassessment of Still's short fiction within the contexts of the author's body of work and within Appalachian and American literature. Compiling all of James Still's compelling and varied short stories into one volume, *The Hills Remember* is a testament to a master writer.

An enthusiastic, witty, and informative introduction to the world of insects and why we—and the planet we inhabit—could not survive without them. Insects comprise roughly half of the animal kingdom. They live everywhere—deep inside caves, 18,000 feet high in the Himalayas, inside computers, in Yellowstone's hot springs, and in the ears and nostrils of much larger creatures. There are insects that have ears on their knees, eyes on their penises, and tongues under their feet. Most of us think life would be better without bugs. In fact, life would be impossible without them. Most of us know that we would not have honey without honeybees, but without the pinhead-sized chocolate midge, cocoa flowers would not pollinate. No cocoa, no chocolate. The ink that was used to write the Declaration of

Independence was derived from galls on oak trees, which are induced by a small wasp. The fruit fly was essential to medical and biological research experiments that resulted in six Nobel prizes. Blowfly larva can clean difficult wounds; flour beetle larva can digest plastic; several species of insects have been essential to the development of antibiotics. Insects turn dead plants and animals into soil. They pollinate flowers, including crops that we depend on. They provide food for other animals, such as birds and bats. They control organisms that are harmful to humans. Life as we know it depends on these small creatures. With ecologist Anne Sverdrup-Thygeson as our capable, entertaining guide into the insect world, we'll learn that there is more variety among insects than we can even imagine and the more you learn about insects, the more fascinating they become. Buzz, Sting, Bite is an essential introduction to the little creatures that make the world go round.

"Pushing the limits of literary fantasy, this astonishing first collection marks the debut of a brilliantly subversive new writer. Surreal and audacious, Bev Jafek's writing brings to mind the fantastic short fiction of Borges, Boyle and Calvino - exhibiting an imagination the likes of which is rarely seen. Many of the nine stories have already won the author critical acclaim ranging from The Pushcart Prize and the Carlos Fuentes Award to inclusion in several volumes of The Best American Short Stories." "The dangers of intimacy and losing one's identity in a marriage are examined in the title story, a breathtakingly daring work about a wife who is literally devoured by her husband and children as they partake of a neverending sacrament - an ancient ritual to satiate an ancient hunger - in a gleaming Formica kitchen with all the modern conveniences." We do not come into the world with an innate sense of taste and nutrition; as omnivores, we have to learn how and what to eat, how sweet is too sweet, and what food will give us the most energy for the coming day. But how does this education happen? What are the origins of taste? In *First Bite*, the beloved food writer Bee Wilson draws on the latest research from food psychologists, neuroscientists, and nutritionists to reveal that our food habits are shaped by a whole host of factors: family and culture, memory and gender, hunger and love.
