Autism is in the public spotlight now more than ever as new research and information appears almost daily. Although in many ways this is a positive development it also presents challenges to families and practitioners who want to keep up with the latest developments and are left to sift through new information by themselves to see what is credible and relevant for them. Each of us needs a personal research assistant who can determine which information we need to pay attention to and let us know how it might affect our daily work and the children we are living with or serve. Since we each don't have our own research assistants on staff, I am delighted to recommend this wonderful book by Fred Volkmar and Lisa Wiesner. Both of these talented professional leaders have combined their scientific skills and understanding of the field with great practical experience and ideas about how research can be translated into clinical practice. The result is a book that provides the best and most comprehensive information about recent scientific developments and a splendid practical guide for how they are being implemented and what we are learning in the process. The issues are presented in all of their complexity but translated into language that is clear, direct, and easy to follow. The format also lends itself to understanding the complex issues and their implications through excellent charts, question and answer sections, and chapters that vary from describing diagnostic issues to stating very specifically how to expand and evaluate the services one is receiving. The comprehensive references and lists of additional resources also add greatly to the overall package. As a professional dedicated to understanding scientific advances and helping families and teachers to utilize them most effectively, I am very pleased to have an ally like this book available. I am very grateful to the authors for providing a very credible, practical, and relevant addition to our field to help the many advocates and family practitioners to better understand the exciting new developments and how they can be implemented in our day to day work. Reviews of the first two editions: "extraordinarily rich in ideas an essential buy." - TES "an excellent, clearly written work which is full of practical advice, and presented in an easily readable manner. This book is a highly recommended read. Do buy it and see." - Support for Learning "has proved especially influential at practitioner level never failing to offer a balanced assessment." - British Journal of Special Education "I have a comprehensive library of books on special educational needs but I use this one more than any other because I find it readable, practical and accessible. It is a useful and informative book both to read cover to cover and to dip into. Although it is based on sound theoretical knowledge, it is clear that Jean Gross is writing from her own experience as a teacher and SEN practitioner." - TES Recent legislation and cutbacks to central support services mean that the responsibility for meeting special educational needs is resting ever more squarely on the shoulders of ordinary classroom teachers. Yet few feel wholly confident in their ability to adapt work within the national curriculum to meet the whole range of needs, or coordinate successful individual education plans for children who, for whatever reason, are not learning as well as they might. This book will increase that confidence. Aimed at busy class teachers, special needs coordinators, heads and teachers in training, it shows how the teacher can build differentiation into planning lessons and schemes

of work. It describes workable strategies for managing the most common behaviour difficulties and meeting special needs in language, literacy and mathematics. At a whole school level, it offers practical guidance on reviewing special needs policies, assessment, record keeping, and the management of roles and resources. The focus is on the way in which schools can do a good job in meeting special needs themselves, within the everyday constraints of time, money and energy, and in so doing provide genuinely inclusive opportunities for all children. This edition has been comprehensively updated and rewritten to cover the revised SEN Code of Practice and related legislation, new directions in inclusion and all the major curriculum initiatives now in place in primary schools.

## **Identifying Targeted Training Needs**

Packed full of activities, real-life case studies, tasks and suggestions, this informative book will equip teachers with the kind of practical knowledge needed to teach young children with dyslexia effectively. Tackling the subject in a clear and realistic way, the author encourages teachers to think critically in terms of the changing nature of special educational needs, and teaching and learning in early years. She addresses a variety of classroom issues, such as: assessment and identification of dyslexia summarising and commenting on current debates exploring the links between dyslexia, language, and social and emotional development the most effective instructional methods and teaching styles conducive to supporting pupils with dyslexia in early years settings. In addition

## **The Seven Human Needs**

To give children with congenital developmental conditions that manifest special learning needs and specific disabilities their best chance to succeed, early identification and appropriate interventions and support, is necessary. This text highlights what to look for when there are concerns about a child's development. Practical and accessible, it is divided into three sections: Part 1 looks at the theory and policy context, discussing the social model of disability, the responsibility of health, social care and education services to the child and family and the role of reviews and assessment in recognising developmental disorders. Part 2 provides a reference guide to atypical developmental conditions and disorders. For each condition, aetiology, prominent theories and research, profile of features – including triggers and behaviours, diagnostic assessment procedures and appropriate interventions are given and links made to sources of further information and support. Part 3 explores practical issues how to work sensitively and effectively with children and their families, looking at the psychological implications of diagnosis, and how to plan, promote, deliver and evaluate multi-agency support. Designed to support professionals

Working with Specialized Language: a practical guide to using corpora introduces the principles of using corpora when studying specialized language. The resources and techniques used to investigate general language cannot be easily adopted for specialized investigations. This book is designed for users of language for special purposes (LSP). Providing guidelines and practical advice, it enables LSP users to design, build and exploit corpus resources that meet their specialized language needs. Highly practical and accessible, the book includes exercises, a glossary and an appendix describing relevant resources and corpus-analysis software. Working with Specialized Language is ideal for translators, technical writers and subject specialists who are interested in exploring the potential of a corpus-based approach to teaching and learning LSP.

Providing a practical guide to the training and assessment of non-technical skills within high-risk industries, this book will be of direct interest to safety and training professionals working within aviation, healthcare, rail, maritime, and other high-risk industries. Currently, each of these industries are working to integrate non-technical skills into their training and certification processes,

particularly in light of increasing international regulation in this area. However, there is no definitive guidance to assist practitioners within these areas with the design of effective non-technical skills training and assessment programs. This book sets out to fully meet this need. It has been designed as a practically focussed companion to the 2008 book *Safety at the Sharp End* by Flin, O'Connor and Crichton. While *Safety at the Sharp End* provides the definitive exploration of the need for non-technical skills training, and examines in detail the main components of non-technical skills as they relate to safe operations, the text does not focus on the "nuts and bolts" of designing training and assessment programs. To this end, *Training and Assessing Non-Technical Skills: A Practical Guide* provides an extension of this work and a fitting companion text.

## **Working with Specialized Language**

All project stakeholders have different needs, objectives, responsibilities and priorities. For many project managers it is disturbing to realise that some of their stakeholders may not be as co-operative and helpful as they expect. It could be a negative and powerful sponsor (the 'Anti-sponsor'), a demotivated team, low-maturity or unrealistic external clients, maliciously compliant gatekeepers and finance teams, or uninterested internal customers. Jake Holloway, Professor David Bryde and Roger Joby bring their years of project management experience and combine it with research and insight from social psychology to delve into how and why project stakeholders can be difficult. The book describes some of the common stakeholder types - such as Sponsors, the Team, Gatekeepers, Clients and Contractors - and associated unhelpful or difficult behaviour profiles that you will often come across on projects. It combines theory with practical ideas, techniques and methods to help manage the impact of these stakeholders.

Encouraged by the emergence and early impact of social innovators on the African Continent, but frustrated by the slow pace of large scale change, this book is focused on filling the knowledge gap for those tackling Africa's serious social problems. It lays out the required building blocks for achieving scale at impact. By creating clear mission, vision, and values statements and piloting and rolling out business models that are demand-driven, simple, and low-cost, with compelling measurement and evaluation tools that leverage technology. It also explores the steps for attracting and retaining talent and financing and forming strategic partnerships with the private, public and non-profit sectors to foster scaling. Practical case studies provide inspiration for those who seek to become innovators or to be employed by them. Finally, it outlines the crucial steps for key stakeholders to take in order to support the emergence of more social innovators on the African continent, create an enabling environment for the scaling of high-impact initiatives and advance collective efforts to build stronger communities for current and future generations. This is a practical and inspirational guide for all entrepreneurs and individuals that seek to combine business and social goals and for those in the public, private and non-profit sectors that aim to foster and support these projects.

## **Special Educational Needs in the Primary School**

This volume is for students and practitioners interested in improving their understanding and skills in the area of needs assessment. The text follows the typical sequence of an actual needs assessment process. Case studies are used to illustrate conceptualization of the task through the application of needs-based data to effective public health solutions. Examples are drawn from

The new edition of this popular book has been substantially revised and provides a practical step-by-step guide to community profiling, invaluable for students and practitioners involved in community-based research. The book begins with consideration of what a community profile is, explores the different reasons why community profiles are undertaken and offers tips for planning research. It then looks at methods for collecting, storing and analysing data, and ways of involving the community, concluding with a chapter on ensuring your profile has impact. This book is fully updated throughout and includes:

- A new chapter on links between community profiling, policy development and practice
- A new chapter on selecting methods for data collection
- Bulleted key issues at the end of each chapter
- Case studies and boxed examples
- Further reading and a list of additional resources
- A new appendix for those who want to undertake more complex research
- A new glossary

Community Profiling is essential reading for anyone engaged in community profiling, social auditing, needs assessment or community consultation. Community workers and community practitioners across a range of disciplines including regeneration, neighbourhood management, library services, housing, health, youth work and social care will find it especially useful. It is also a helpful resource for voluntary and community organisations and students required to undertake community-based research.

## **Embedded and Empowered**

Many teachers are trained to approach their work with a set of teaching strategies and lessons that changes little over time. Because they are focused on how they teach, rather than on how their students learn, they use the same techniques day after day, making no adjustments for students' different learning needs. In *Learning-Driven Schools: A Practical Guide for Teachers and Principals*, Barry Beers shows how teachers can plan, teach, and

assess for student learning--and how principals can support teachers in their efforts. The book includes \* An overview of the research on knowledge retention; \* Real-life samples of lesson plans that address state and local standards; \* Strategies on accurately assessing student learning; \* Advice for teachers on addressing the needs of struggling, intermediate, and advanced students at the same time; and \* Advice for administrators on conducting effective classroom observations. A rallying cry and how-to guide rolled into one, this book is an invaluable resource for anyone passionate about learning. Having served as a veteran teacher and principal himself, Barry Beers brings his own experience and understanding to bear on the essential task of ensuring that student learning remains the clear focus of our schools.

young children. In a clear and sensitive style the authors: outline the characteristics of autism as they present themselves in the early years; consider the nature of autism and the issues surrounding assessment and diagnosis; offer practical strategies for effective and realistic intervention both at home and in a variety of early years settings; suggest ways to promote learning, social development, communication and appropriate behaviour; explore possibilities for enhancing access to the early years curriculum. This updated second edition includes new material relating to new statutory requirements such as Every Child Matters and Disability Equality Duty, as well as updates to different approaches to autism, assessment and behavioural issues. The authors outline the principal themes and objectives of the Early Years Foundation Stage and the Inclusion Development Programme. Autism in the Early Years: A Practical Guide (Second Edition) provides accessible material, support and advice for parents, teachers and professionals who are working together in an unfamiliar area following early diagnoses of autism in young children.

This updated and exciting fourth edition of *Managing People: A*

# Access PDF A Practical Guide To Needs Assessment American Society For Training Development

Practical Guide for Front-Line Managers addresses the growing needs of front-line managers who are not themselves specialists in personnel management but whose roles require them to have these skills. A growing trend over the last two decades has given these managers an increasing amount of responsibility of direct line management, which can be extremely challenging especially if the correct training is not given. This book examines how the different parts of managing people fit together, whilst acknowledging that different contexts require different approaches and recognizing ongoing organizational, environmental and legal changes that affect the employment framework. It recognizes the rapidly changing context in which modern front-line managers have to operate and acknowledges the increasing expectations of good leadership as a necessity. However, the book also emphasizes the need for front-line managers to understand themselves, their own management styles and attitudes, together with the importance of empathy in appreciating the perspectives of the staff that work under them. *Managing People: A Practical Guide for Front-Line Managers* is designed for both new managers and for NVQ/SVQ Level 4 students. It is also appropriate for the first stages of Foundation Degrees and for HND courses combining academic study with workplace learning.

retention in science, technology, engineering, and mathematics (STEM) disciplines. Teaching and Learning STEM presents a trove of practical research-based strategies for designing and teaching courses and assessing students' learning. The book draws on the authors' extensive backgrounds and decades of experience in STEM education and faculty development. Its engaging and well-illustrated descriptions will equip you to implement the strategies in your courses and to deal effectively with problems (including student resistance) that might occur in the implementation. The book will help you: Plan and conduct class sessions in which students are actively engaged, no matter how large the class is Make good use of technology in face-to-face, online, and hybrid courses and flipped classrooms Assess how well students are acquiring the knowledge, skills, and conceptual understanding the course is designed to teach Help students develop expert problem-solving skills and skills in communication, creative thinking, critical thinking, high-performance teamwork, and self-directed learning Meet the learning needs of STEM students with a broad diversity of attributes and backgrounds The strategies presented in Teaching and Learning STEM don't require revolutionary time-intensive changes in your teaching, but rather a gradual integration of traditional and new methods. The result will be continual improvement in your teaching and your students' learning.
