For almost 60 years, continual research on the subject of Bovine Viral Diarrhea (BVD) has raised as many questions as that research has answered. This common disease continues to cause sickness, death, abortion and fetal anomalies despite the millions of vaccination doses used each year to prevent its spread. Written by international experts on the subject of the BVD virus, BVDV: Diagnosis, Management and Control includes the latest information on BVD and outlines methods of diagnosis, management and control. Researchers, academics, and large animal practitioners will find this book an invaluable and irreplaceable resource for understanding and controlling outbreaks of BVD.

Cows for Kids, Cow Fun and Facts, is a fun filled learning experience about cattle. It's chock-full of beautiful photos of various breeds, colors, sizes, and ages of cattle. It's fun because you can tell what the cows are thinking! They have quite a sense of humor. It's educational as facts are interspersed with the fun. Dairy cows are featured with actual photos of cows lining up to get milked and the actual milking operation. It is udderly fascinating and educational! Since calves are so cute, there is an abundance of pictures of calves ranging from newborn to several weeks old. You'll learn what it takes for a newborn calf to be healthy. You will also get to see young people grooming and preparing their animals for show. These 4-H and FFA youngsters are learning what it takes to care for and even breed cattle. When show time comes you can see the results. The last section of this book shows how Werkoven Dairy and Qualco Energy

have teamed up to provide an environmentally friendly farm that uses the manure to benefit farmers, fishermen, and families. "This book is a great learning tool." Qualco Energy Board of directors For added enjoyment, a fun quiz is at the end of the book. Be careful, there may be some trick questions. Malinda is an accomplished author of many children's books. She lives in Mississippi. Ray Ruppert lives in western Washington where most of these pictures were taken. This is the second book that Malinda Mitchell and Ray Ruppert have produced together.

Journal of Animal Science

From leading ecology advocates, a revealing look at our dependence on cows and a passionate appeal for sustainable living. In *Cowed*, globally recognized environmentalists Denis and Gail Boyer Hayes offer a revealing analysis of how our beneficial, centuries-old relationship with bovines has evolved into one that now endangers us. Long ago, cows provided food and labor to settlers taming the wild frontier and helped the loggers, ranchers, and farmers who shaped the country's landscape. Our society is built on the backs of bovines who indelibly stamped our culture, politics, and economics. But our national herd has doubled in size over the past hundred years to 93 million, with devastating consequences for the country's soil and water. Our love affair with dairy and hamburgers doesn't

help either: eating one pound of beef produces a greater carbon footprint than burning a gallon of gasoline. Denis and Gail Hayes begin their story by tracing the co-evolution of cows and humans, starting with majestic horned aurochs, before taking us through the birth of today's feedlot farms and the threat of mad cow disease. The authors show how cattle farming today has depleted America's largest aquifer, created festering lagoons of animal waste, and drastically increased methane production. In their quest to find fresh solutions to our bovine problem, the authors take us to farms across the country from Vermont to Washington. They visit worm ranchers who compost cow waste, learn that feeding cows oregano yields surprising benefits, talk to sustainable farmers who care for their cows while contributing to their communities, and point toward a future in which we eat less, but better, beef. In a deeply researched, engagingly personal narrative, Denis and Gail Hayes provide a glimpse into what we can do now to provide a better future for cows, humans, and the world we inhabit. They show how our relationship with cows is part of the story of America itself.

This widely used reference has been updated and revamped to reflect the changing face of the dairy industry. New features allow users to pinpoint nutrient requirements more accurately for individual animals. The committee also provides guidance on how nutrient analysis of feed ingredients, insights into nutrient utilization by the animal, and formulation of diets to reduce environmental impacts can be applied to productive management decisions. The book includes a user-friendly computer program on a compact disk, accompanied by extensive context-sensitive "Help" options,

to simulate the dynamic state of animals. The committee addresses important issues unique to dairy science-the dry or transition cow, udder edema, milk fever, low-fat milk, calf dehydration, and more. The also volume covers dry matter intake, including how to predict feed intake. It addresses the management of lactating dairy cows, utilization of fat in calf and lactation diets, and calf and heifer replacement nutrition. In addition, the many useful tables include updated nutrient composition for commonly used feedstuffs.

From the Publisher: What does our favorite science fiction tell us about the culture of science? What do stories of cyborg women and genetic engineering show us about how science and values interact and how science and politics affect each other? In *SciFi in the Mind's Eye*, leading scholars look at the way science fiction informs and inspires contemporary research in science and technology, and how scientific breakthroughs spur authors on to yet more creative science

fiction narratives. Alongside investigations into the meaning of science fiction, SciFi in the Mind's Eye gives us previously unpublished 'interventions' by acclaimed science fiction authors L. Timmel Duchamp, Nicola Griffith, Nancy Kress, Terry Bisson, and Stanislaw Lem.

The Making of a Minister

The American Cattle Doctor

Tenth-grade dropout, biker gang member, career Marine with three tours in Vietnam who served prison time for statutory rape - this is not your usual background for a Pentecostal Baptist minister. But Dr. Sanders' life took a right-angle turn with his call to the ministry. That call was real, strong, and not to be denied, even though some of his parishioners and some of his superiors in the church didn't like his tattoos, his earrings, his wild Hawaiian shirts This book is the story of one man's journey, and how he turned adversity into positive outcome.

Farming has been in John Connell's family for generations, but he never intended to follow in his father's footsteps. Until, one winter, he finds himself back on the farm and begins to learn the ways of the farmer and the way of the cows. Connell records the hypnotic rhythm of the farming day - cleaning the outhouses, milking the herd, tending to sickly lambs, helping the cows give birth. But alongside the routine events, there are the unforeseen moments when things go wrong: when a calf fails to thrive, when a sheep goes missing, when illness breaks out, when depression takes hold, when an argument erupts and things are said that cannot be unsaid. The Cow Book is the story of a calving season. It is also the story of the cow itself, from its domestication and worship as a God by the Ancient Egyptians to the modern practice of mechanized herds, via the figure of the cowboy, the destruction of the

American buffalo, the demise of the aboriginal jackaroos and the consequences of BSE. And, above all, it is the story of Connell's life as a farmer, of his relationship with his birthplace of County Longford, with the community around the family farm, with the animals he tends, and with his father.

Not in My Backyard/not in Anyone's Backyard

This record book is farmer friendly and designed for field use with glossy cover, heavy weight, white pages, 8 1/2" x 11." Intended for ease of documenting farm income, expense, cattle, grass, hay and pasture records for the small or medium scale, modern day farm. Includes a Body Condition Scoring (BCS) Table and Cow Gestation Chart. This record book is intended to assist the farmer with a detailed annual documentation consisting of enough space to record up to 52 cows, multiple bulls, and 10 grass, hay and pasture fields. This record book was created with the farmer and tax preparer, providing a basic, time efficient, record-keeping log book compatible with the Schedule F (Form 1040) "Profit or Loss From Farming" form. To most effectively sell "the beef," or "sell the hay," it is important to evaluate the best balance between what is profitable and beneficial. This book may be helpful in evaluating the best balance between what is profitable and beneficial for your farm.
