The Old Fart's Guide to Survival

Who says facts can't be fun? This book was written for those who are of a conservative mind set but are still wandering aimlessly in the world of politics and do not have a clue as to the policies, missions and distinct differences between the Democratic and Republican parties. Infusing sarcastic political satire into the fray, the author has created a manifesto which is quite humorous yet extremely informative. An absolute must for those who have their hearts in the right place but have the political I.Q. of a salamander!

Farts in the Wild

An Old Man and His Axe

The electrical grid is down in the United States due to terroristic physical and cyberattacks and most of the worlds infrastructure is failing rapidly. This an apocalyptic story of survival from the perspectives of several survivors trying to live through it and survive in timelines from at the start of the disaster to eight months after and coming together to form a community by their entrepreneurial efforts and networking. The disaster, starvation and societal collapse in this dystopian world is seen through the eyes of a pair of older vacationers who just happen to get stranded at the beach, one of which happens to be a prepper fiction author who finds himself living the same nightmares he writes about. Facing the dangers of being homeless in a world without electricity or rule of law sucks when you get old. It also ain't no fun for the young, or is it? Disasters, Disillusionment and Displacement: What you know can save you, what you don't know can kill you! The survivors assembled from the first two books of this prepper-oriented disaster recovery and community renewal series sets about using their plans of trading salvaged goods for chickens and eggs. Bartering is an art, not everyone can do it well, but what do you do when a fox tells you to build him a hen house so that you both may profit? Come join me on this sometimes funny, but always informative and entertaining post-apocalyptic action filled adventure filled with survivalist twists and trading post turns along with a focus on a preppers applied philosophy of air rifle survival hunting and food procurement tactics

Forty and Holding Your Own

The Big Book of Farts

From the scientist duo behind True or Poo?, their original New York Times bestselling sensation--a scientifically precise, fully illustrated, utterly hilarious guide to animal flatulence. Dogs do it. Millipedes do it. Dinosaurs did it. You do it. I do it. Octopuses don't (and nor do octopi). Spiders might do it: more research is needed. Birds don't do it, but they could if they wanted to. Herrings do it to communicate with each other. In 2017 zoologist Dani Rabaiotti's teenage brother asked her a most teenaged question: Do snakes fart? Stumped, Rabaiotti turned to Twitter. The internet did not disappoint. Her innocent question spawned the hashtag #doesitfart and it spread like a noxious gas. Dozens of noted experts began weighing in on which animals do and don't fart, and if they do, how much, how often, what it's made of, what it smells like, and why. Clearly, the public demands more information on animal farts. Does it Fart? fills that void: a fully authoritative, fully illustrated guide to animal flatulence, covering the habits of 80 animals in more detail than you ever knew you needed. What do hyena farts smell especially bad? What is a fossa, and does it fart? Why do clams vomit but not fart? And what is a fart, really? Pairing hilarious illustrations with surprisingly detailed scientific explanations, Does it Fart? will allow you to shift the blame onto all kinds of unlikely animals for years to come.

Farley is a old prepper that is stuck in the city when a solar storm sets of a electromagnetic pulse event taking the grid down world wide.. Our hero stays in the city facing societal breakdown for ten weeks until it is evident he must escape and bug out somewhere. The problem is he only has a half tank of gas and not any means to get any more. This book is filled with the author's southern prepper fiction humor and wit that teaches you survival skills while entertaining with a tale full of twists and turns..

Disaster Du Jour

Two hundred and fifty million years ago, 95 percent of the species on Earth perished. Sixty-five million years ago, a meteor strike destroyed the dinosaurs and pretty much every other organism bigger than about fifteen pounds. Now another mass extinction is coming. This book is about how our species can survive it. Scatter, Adapt, and Remember makes a powerful argument about humans' ability to survive at a time when many scientists and media commentators are hell-bent on preaching the opposite. Environmental cynicism rules public policy, and apocalyptic stories about zombie death plagues rule the world of fiction. It's a time of tremendous uncertainty, and Scatter, Adapt, and Remember offers a note of pragmatic, scientifically grounded, and humorous optimism to the current public conversation about our collective future. Readers will be equipped—scientifically, intellectually, and even emotionally—to face challenges that promise to be far greater than contemporary humans have yet encountered.

Chaos and starvation spread, as isolated pockets of survivors unite. In Texas, Hughes and his band gather their families close and resist the depredations of a horde of escaped convicts. Meanwhile, in North Carolina, survivors' efforts to salvage a vast store of supplies and feed the starving refugee population draw unwelcome attention. Secure in his Camp David compound, an increasingly unstable president builds a mercenary force to seize all resources for 'government use and fair distribution.' Simon Tremble, Speaker of the House of Representatives, and the last surviving lawmaker not under control of the corrupt president, climbs out of his hidden hollow and starts south along the Appalachian Trail. He has promises to keep.
