An Archaeology of Ancash is a well-illustrated synthesis of the archaeology of North Central Peru, and specifically the stone structures of the Ancash region. All the major cultures of highland Ancash built impressive monuments, with no other region of South America showing such an early and continuous commitment to stone carving. Drawing on Lau's extensive experience as an archaeologist in highland Peru, this book reveals how ancient groups of the Central Andes have used stone as both a physical and symbolic resource, uncovering the variety of experiences and meanings which marked the region's special engagement with this material. An abundant raw resource in the Andes, stone was used for monuments, sculptures and other valuables such as carved monoliths, which were crucial to the emergence of civilization in the region, and religious objects from magical charms to ancestor effigies. Detailing the ways stone has played both an everyday and an extraordinary part in ancient social life, Lau also examines how cultural dispositions towards this fundamental material have changed over time and considers how contemporary engagements with these stone remains have the potential to create and regenerate communities. With an ample selection of color photos which bring these sites and artifacts to life, An Archaeology of Ancash is an essential guide to the key monuments, places and objects that distinguish this region and its rich archaeological heritage.

analyzes English-language feature films (and a few shorts and TV shows/movies) made between 1927 and 2016 that tell stories about jazz music, its musicians, its history and culture. *Play the Way You Feel* looks at jazz movies as a narrative tradition with recurring plot points and story tropes, whose roots and development are traced. It also demonstrates how jazz stories cut across diverse genres-biopic, romance, musical, comedy and science fiction, horror, crime and comeback stories, "race movies" and modernized Shakespeare-even as they constitute a genre of their own. The book is also a directory/checklist of such films, 66 of them with extensive credits, plus dozens more shorter/capsule discussions. Where jazz films are based on literary sources, they are examined, and the nature of their adaptation explored: what gets retained, removed, or invented? What do historical films get right and wrong? How does a film's music, and the style of the filmmaking itself, reinforce or undercut the story?--

A cliché it may be but we are living in ever more turbulent times. Business decision-making has become more challenging and unpredictable than ever: we see unforeseen and often cataclysmic changes in consumer demand, both at home and in export markets; customers continue to demand more, more quickly and for less; new laws and regulations abound; competitors steal loyal customers; and, increasingly, the advice that once could be found from a 'Small Business Adviser' has been replaced by a call centre. Hand in hand with these challenges, the risks associated with expansion, or a new strategy, have grown significantly. In the context of a small business, where a manager has not necessarily had the breadth of experience of someone in a larger organization or formal management learning, they can seem extremely daunting. This book addresses the issues confronting managers/owners of SMEs by providing practical, jargon-free advice on which a SME can create a sound platform from which to prosper. * Uncomplicated and jargon free to appeal to the SME director or manager who has little time to read * Can be used as a continuous read or a source of ideas for dealing with the day-to-day problems of running and growing a small business * Based on the practical experience of the authors with examples taken from consulting practice
