Military units and SWAT teams that specialize in Close Quarters Battle (CQB) typically bring a large force to the fight and often have numerous supporting assets such as snipers, helicopters and tactical vehicles. Thus, the scenario of a single Soldier or SWAT officer having to operate alone is also relatively unlikely and often receives less attention. However, for ordinary citizens in a home-defense scenario or for police officers responding to an emergency call, the chances of having to operate alone are quite likely. In these types of situations, backup is frequently unavailable or will not arrive in time. The citizens and officers who are forced to operate on their own face potentially the greatest risk, yet there are almost no tactical references (books, videos or classes) that provide useful information on the subject of single-person tactics. This manual and the associated training courses were developed by a team of experts with extensive special operations and law-enforcement experience to help fill the dangerous capability and knowledge gap in the area of single-person tactics. This manual can provide citizens and officers with critical, life-saving tactical knowledge that will give them a marked advantage in an emergency situation. The manual is designed to be short, easy to read and focused on the most important information for surviving a real-life emergency. The manual also uses many pictures and illustrations to accelerate learning and help students absorb knowledge faster. It covers a wide range of tactical subjects including -Clearing without entry-Shallow entry (limited penetration)-Deep entry-Hallways-Intersections-Stairwells-Multiple roomsThe manual also provides specific suggestions on how to prepare for and deal with likely tactical scenarios including home invasion, deadly attackers (active shooter), sniper attacks, armed robbery and hostage situations.

"What men will fight for seems to be worth looking into," H. L. Mencken noted shortly after the close of the First World War. Prior to that war, although many military commanders and theorists had throughout history shown an aptitude for devising maxims concerning esprit de corps, fighting spirit, morale, and the like, military organizations had rarely sought either to understand or to promote combat motivation. For example, an officer who graduated from the Royal Military College (Sandhurst) at the end of the nineteenth century later commented that the art of leadership was utterly neglected (Charlton 1931, p. 48), while General Wavell recalled that during his course at the British Staff College at Camberley (1909-10) insufficient stress was laid "on the factor of morale, or how to induce it and maintain it" (quoted in Connell 1964, p. 63). The First World War forced commanders and staffs to take account of psychological factors and to anticipate widely varied responses to the combat environment because, unlike most previous wars, it was not fought by relatively small and homogeneous armies of regulars and trained reservists. The mobilization by the belligerents of about 65 million men (many of whom were enrolled under duress), the evidence of fairly widespread psychiatric breakdown, and the postwar disillusion (- xiii xiv PREFACE emphasized in books like C. E. Montague's *Disenchantment*, published in 1922) all tended to dispel

assumptions and to provoke questions about motivation and morale.

## **Report of the Department of the Treasury on the Bureau of Alcohol, Tobacco, and Firearms Investigation of Vernon Wayne Howell Also Known as David Koresh**

From 1962 to 1971, the US military sprayed herbicides over Vietnam to strip the thick jungle canopy that could conceal opposition forces, to destroy crops that those forces might depend on, and to clear tall grasses and bushes from the perimeters of US base camps and outlying fire-support bases. Mixtures of 2,4-dichlorophenoxyacetic acid (2,4-D), 2,4,5-trichlorophenoxyacetic acid (2,4,5-T), picloram, and cacodylic acid made up the bulk of the herbicides sprayed. The main chemical mixture sprayed was Agent Orange, a 50:50 mixture of 2,4-D and 2,4,5-T. At the time of the spraying, 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), the most toxic form of dioxin, was an unintended contaminant generated during the production of 2,4,5-T and so was present in Agent Orange and some other formulations sprayed in Vietnam. Because of complaints from returning Vietnam veterans about their own health and that of their

children combined with emerging toxicologic evidence of adverse effects of phenoxy herbicides and TCDD, the National Academy of Sciences was asked to perform a comprehensive evaluation of scientific and medical information regarding the health effects of exposure to Agent Orange, other herbicides used in Vietnam, and the various components of those herbicides, including TCDD. Updated evaluations were conducted every two years to review newly available literature and draw conclusions from the overall evidence. *Veterans and Agent Orange: Update 2014* is a cumulative report of the series thus far.

Wide About the Book: High-frequency traders have been called many things—from masters of the universe and market pioneers to exploiters, computer geeks, and even predators. Everyone in the business of investing has an opinion of speed traders, but how many really understand how they operate? The shadow people of the investing world, today's high-frequency traders have decidedly kept a low profile—until now. In *The Speed Traders*, Edgar Perez, founder of the prestigious business networking community Golden Networking, opens the door to the secretive world of high-frequency trading (HFT). Inside, prominent figures of HFT drop their guard and speak with unprecedented candidness about their trade. Perez begins with an overview of computerized trading, which formally began on February 8, 1971, when NASDAQ launched the world's first electronic market with 2,500 over-the-counter stocks and which has evolved into the present-day practice of making multiple trades in a matter of microseconds. He then picks the brains of today's top players. Manoj Narang (Tradeworx), Peter van Kleef (Lakeview Arbitrage), and Aaron Lebovitz (Infinium Capital Management) are just a few of the luminaries who decided to break their silence and speak openly to Perez. Virtually all of the expertise available from the world of speed trading is packed into these pages. You'll get insight from HFT's most influential trailblazers on the important issues, including: The basics of launching an HFT platform The important role speed traders play in providing market liquidity The real story behind the "flash crash" of May 2010 Emerging global HFT markets M&A and consolidation among the world's biggest exchanges *The Speed Traders* is the most comprehensive, revealing work available on the most important development in trading in generations. High-frequency trading will no doubt play an ever larger role as computer technology advances and the global exchanges embrace fast electronic access. Essential reading for regulators and investors alike, *The Speed Traders* explains everything there is to know about how today's high-frequency traders make millions—one cent at a

## **The Making of a Navy SEAL**

Originally written in the 1950s, Guns of the Old West is a factual account of the guns used during, and after, one of the most romanticized and often misconstrued periods in American history. It covers a wide array of firearms, from the smallest of hideaway pistols - the Derringer - to the largest of Colt's single-action

revolvers, the more recent Mauser "broomhandle," and the Colt 1911 auto pistol. Illustrated throughout, this book describes not only the evolution of fighting pistols and rifles during the 1800s and before, but also the men who created and used them. Of particular interest is the chapter titled "Frontier Life Insurance" that defines the code by which men lived and fought with their pistols. It was a time when the handgun was both a defensive and offensive weapon, much more than today, when it is considered mainly for defense. The chapter on "The Long Guns" covers the development of frontier rifles, from the famous Kentucky rifle of the plains and the mountain man's Hawken to the ever-popular Winchester lever actions.

A Navy SEAL has nothing left to live for and everything to kill for after he discovers that the American government is behind the deaths of his team in this ripped-from-the-headlines political thriller that is “so powerful, so pulse-pounding, so well-written—rarely do you read a debut novel this damn good” (Brad Thor, #1 New York Times bestselling author). On his last combat deployment, Lieutenant Commander James Reece’s entire team was killed in a catastrophic ambush. But when those dearest to him are murdered on the day of his homecoming, Reece discovers that this was not an act of war by a foreign enemy but a conspiracy that runs to the highest levels of government. Now, with no family and free from the military’s command structure, Reece applies the lessons that he’s learned in over a decade of constant warfare toward avenging the deaths of his family and teammates. With breathless pacing and

With “crackerjack plotting, vivid characters both in and out of uniform, and a relentless pace to a worthy finish” (Stephen Hunter, #1 New York Times bestselling author), *The Terminal List* is perfect for fans of Vince Flynn, Brad Thor, and Nelson DeMille.
