Book 3

As soon as we graduate from candles and olive oil to kerosene, the door opens onto the crazy world of bad Internet information about lamp and lantern fuels. Well, not all bad. Probably no more than 50% is silly, misinformed, or dangerous. From the FOREWORD: "Do you know the difference between white gas and white spirits? What about the difference between white spirits and mineral spirits? (Of course, there's always mineral spirits and alcoholic spirits.) How about the difference between mineral oil and

mineral spirits? Or coal oil and kerosene? "There's a lot of information that you can find on the internet surrounding these topics. Some is just opinion and some is factual. Some makes me laugh, some makes my head shake in disbelief, and some, at times, makes me sad. "Before publication, this book (as the author notes) was reviewed by two petrochemical engineers, a college physics professor, and a chemical engineer. As it so happens, I am the physics professor in question. But that was my past career. Today I work in the oil and gas industry and have been in the industry for almost 20 years. "I want to assure the reader that the information presented in this book is accurate. The topics, written from a lamp-fuel and lantern-fuel point of view, have been simplified but with full confidence I can state that what is presented is correct. "Please don't burn your house down. Please don't place your family at risk. Please take the time to read these few pages. Please, please, please. READ THE BOOK."

From the foreword: "This revised Fifth Edition of the Coal Mining Reference Book is intended to fill the need for a simple, easily understood text of mining terms and problems that also addresses the importance of the safety and health of mine workers. It should not be considered a textbook, but rather a reference manual from which those desiring to improve their knowledge of mining may obtain valuable information. Students will find it especially helpful in preparing for examinations for fire boss, mine foreman and mine inspector. The material presented is mostly in question-and-answer format and is in simple terms and language."
