In print for more than two decades, On Moral Medicine remains the definitive anthology for Christian theological reflection on medical ethics. This third edition updates and expands the earlier award-winning volumes, providing classrooms and individuals alike with one of the finest available resources for ethics-engaged modern medicine.

Infosystems

In this study, the use of waste coffee grounds for biodiesel production, its solid by-product after oil extraction for bioethanol generation, and the second by-product after bioethanol generation for solid fuel generation is explored. For the study, waste coffee grounds samples were gathered from TOMOCA PLC, Addis Ababa, Ethiopia. The oil was then concentrated utilizing n-hexane and brought about an oil yield of 19.73 % w/w. The biodiesel was acquired by a two-stage process, i.e. acid catalyzed esterification followed by base catalyzed transesterification utilizing catalysts sulfuric acid and sodium hydroxide respectively. The change, after esterification of waste coffee grounds oil into biodiesel, was about 80.4% w/w. Different parameters that are fundamental for biodiesel quality were assessed utilizing the American Standard for Testing Material (ASTM D 6751- 09) and revealed that all quality parameters are inside the extent pointed out aside from acid value. Also, the strong waste staying after oil extraction was researched for conceivable use as a feedstock for the generation of bioethanol and brought about a bioethanol yield of 8.3 % v/v. Moreover, the solid waste staying after bioethanol generation was assessed for solid fuel (20.8 MJ/Kg) applications.

The "Argentine disappointment"—why Argentina persistently failed to achieve sustained economic stability during the twentieth century—is an issue that has mystified scholars for decades. In *Straining the Anchor*, Gerardo della Paolera and Alan M. Taylor provide many of the missing links that help explain this important historical episode. Written chronologically, this book follows the various fluctuations of the Argentine economy from its postrevolutionary volatility to a period of unprecedented prosperity to a dramatic decline from which the country has never fully recovered. The authors examine in depth the solutions that Argentina has tried to implement such as the Caja de Conversión, the nation's first currency board which favored a strict gold-standard monetary regime, the forerunner of the convertibility plan the nation has recently adopted. With many countries now using—or seriously contemplating—monetary arrangements similar to Argentina's, this important and persuasive study maps out one of history's most interesting monetary experiments to show what works and what doesn't.

Household Words

The New York Times Bestseller *Trina* is eighteen and suffers from bi-polar disorder, making her paranoid, wild, and violent. Frightened by her own child, Keri searches for help, quickly learning that the mental health community can only offer her a seventy-two hour hold. After these three days Trina is off on her own again. Fed up with the bureaucracy and determined to save her daughter by any means necessary, Keri signs on for an illegal intervention known as The Program, a group of radicals who eschew the psychiatric system and model themselves after the Underground Railroad. In the upheaval that follows, she is forced to confront a past that refuses to stay buried, even as she battles to secure a future for her child. "A tightly woven, well-written story about mothers and daughters, highs and lows, ex-husbands and boyfriends. Universally touching." —San Francisco Chronicle

Set just after the Normandy invasion, ARTICLES OF WAR is the story of Heck, an American GI who has recently arrived from Ohio. Utterly inexperienced as a soldier, Heck is paralyzed with fear during his first firefight. Desperate to get away from the front line, he deliberately allows himself to be shot but a fellow private sees and understands what he has done. Sent to a hospital behind the lines, his wound heals quickly and he returns to find that the witness has been promoted and is now his superior. He says nothing to Heck about his act of cowardice but a little while later sends him to the rear for a special assignment, without telling him what that assignment is. In fact, he has been assigned to the firing squad which will execute Private Eddie Slovak (in reality the only GI shot for desertion during the Second World War and the first since the Civil War). This is Heck's excruciating moral punishment. He, himself a deserter, is forced to shoot another deserter. Nick Arvin draws the reader into the unimaginable fear, violence and chaos of the war zone. Like the very best war fiction - Pat Barker's REGENERATION trilogy, Sebastian Faulks' BIRDSONG - he shows how ordinary lives are transformed by extraordinary events.

Bridges Between Trade and Sustainable Development

A journalist for The Washington Post critically assesses the impact of state-of-the-art reproductive technologies on the American family, the culture of parenting, and the ways in which we think about life itself, integrating personal narratives with a history of reproductive technology, medical research, and evolution in a study of the social implications of infertility treatment. Reprint. 17,500 first printing.

72 Hour Hold

Every step of the journey to become a parent, while exciting, can also be daunting with countless choices and varying advice. In *Why Didn't Anyone Tell Me?*, parents from around the world speak honestly about their experiences of assisted conception, pregnancy, birth, sex, relationships and raising children. Woven between the stories are insights and tips, as well as evidence-based information and recommended further reading about the topics referred to in the stories. Unlike other books on parenting, this is not another prescriptive book by an 'expert'. The experiences and wisdom of the parents who contributed to this book will surprise you, make you laugh, cry, feel encouraged and supported. If you are about to become a parent or are thinking of having children, the stories you read will give you some insight to the process, both physical and emotional, and will help you along your own journey to creating a family.
