### Principles and Practices Involved in the Breeding, Feeding, and Management of Pure-bred Draft Horses in the United States

This is the concise, easy-to-use version of Dr. Lewis's Equine Clinical Nutrition, Feeding and Care. It includes a full-color section identifying toxic plants and provides practical information on the diversified effects of different nutrients, feeds and supplements on a horse's athletic performance, reproduction, growth, hooves, appetite, behavior and disease. The book can help prevent common, but expensive problems in horses of all ages.

**Abstract:** Background: Restricted access to health facilities in some Palestinian localities is believed to contribute to little knowledge and poor infant and young child feeding (IYCF) and care practices among mothers. The objective of this study was to assess the effectiveness of a community approach called Timed Targeted Counselling in improving mothers' knowledge and practices of IYCF in four remote villages surrounding Bethlehem in the West Bank. Methods: We did a randomised controlled trial in four villages. All mothers of infants born between March 1, 2011, and April 30, 2011, were identified by community health workers (CHWs) and randomly assigned to the intervention or comparison group. Randomisation was done at the individual level, four villages who had similar characteristics were identified and all newborns during the months of March and April, 2011, were assigned randomly into intervention and comparison groups, univariate, and multivariate analysis were applied. CHWs targeted the intervention group with key messages and support for positive IYCF and caring practices during two organised home visits (sometimes three depending on their counselling) throughout 12 months. Women in the comparison group were not exposed to any messages; they were visited only for data collection. Baseline and postintervention data from a questionnaire, designed for the purpose of the study, were collected for both groups at the end of 12 months. Ethical approval was given and informed consent obtained from participants. The primary endpoint was behavioural caring practices of mothers towards their children. We did univariate and multivariate statistical analysis were planned to be done using SPSS version 17. Findings: We enrolled 118 mothers in the study and randomly assigned them to the intervention group (n=66) or the comparison group (n=52). IYCF and caring practices improved significantly among mothers in the intervention group: exclusive breastfeeding up to 6 months increased from 27% (18 of 66 women) to 70% (46 women; OR 29, 95% CI 8 · 02 – 108); breastfeeding of children aged 1 year increased from 56% (37) to 83% (55; 2 · 94, 1 · 03 – 8 · 41); timely introduction of complementary meals increased from 38 · 5% (25) to 67% (44; 83 · 6, 17 · 24 – 40 · 5); rubbing of salt on infant skin and umbilical cord decreased from 54 · 5% (36) to 3% (3; 0 · 033, 0 · 006 – 0 · 19); recognition of danger signs increased from 15% (10) to 48% (32; 3 · 96, 0 · 17 – 9 · 2); and, bathing of newborns within 24 h after birth decreased from 68 · 2% (45) to 32% (21; p

In her most provocative book yet, Dr. Laura urgently reminds women that to take proper care of their husbands is to ensure themselves the happiness and satisfaction they yearn for in marriage. Women want to be in love, get married, and live happily ever after. Yet disrespect for men and disregard for the value, feelings, and needs of husbands has fast become the standard for male-female relations in America. Those two attitudes clash in unfortunate ways to create struggle and strife in what could be a beautiful relationship. Countless women call Dr. Laura, unhappy in their marriages and seemingly at a loss to understand the incredible power they have over their men to create the kind of home life they yearn for. Now, in *The Proper Care and Feeding of Husbands*, Dr. Laura shows you—with real-life examples and real-life solutions—how to wield that power to attain all the sexual pleasure, intimacy, love, joy, and peace you want in your life. Dr. Laura's simple principles have changed the lives of millions. Now they can change yours.

### The Feeding, Dressing and Care of Children Between Birth and the Age of Six

Originally published in 1920. PREFACE: The purpose of the author has been to make this treatise as practical as possible, avoiding ultra-scientific and professional discussions. The growing interest in child-welfare signifies the more general appreciation of the fact that correct feeding and hygiene during childhood determine the mental and moral, as well as the physical characteristics of the man. We cannot expect enterprising future citizens unless our babies are healthy and thriving. Much of the work in this fascinating novel is still both useful and practical today. Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Maintaining its user-friendly approach, The Care and Feeding of an IACUC: The Organization and Management of an Institutional Animal Care and Use Committee, Second Edition is a handy guide for members of the laboratory animal community looking for a concise, descriptive introduction to what an IACUC is all about and how it operates. The book covers training programs and discusses professional certifications for IACUC administrative and animal care staff. It provides pointers to principal investigators, discusses interactions between IACUCs and other compliance panels, and addresses occupational health and safety programs and the role they play in the overall animal care and use program. This new edition of a

bestseller contains new information on international regulations regarding animal subject research and the requirements for an ethics panel review. It discusses outside collaborations, interinstitutional memorandums of understanding, and the differences in regulations between countries. The book also includes a new chapter exploring semiannual program reviews, semiannual inspections, and postapproval monitoring. The contributors provide updated information on the protocol submission process, electronic protocol management systems, and records management—including the essential elements of the protocol form and how to complete it. The book also delves deeply into bioethics. It discusses how IACUCs can ensure that each proposal to use animals in research includes an ethical review with a harm – benefit analysis weighing the expected advancements in human and animal health against the potential harm inflicted to the animal. Also included is a chapter on how to survive a regulatory inspection or an accreditation site visit. All interpretations of the regulations have been reviewed by staff at the NIH Office of Laboratory Animal Welfare (OLAW), the Animal Welfare Information Center (AWIC), and USDA APHIS/Animal Care (AC) for consistency and compliance with the PHS Policy and the USDA Animal Welfare Act Regulations (AWAR).

Every week across America, single members filter into their local congregations to worship, minister, and serve alongside their brothers and sisters in Christ. Although a minority in most congregations, singles nevertheless compose a significant cross section of the church body. Each blessed and challenged with individual circumstances, Christian singles not only bear a unique burden but also offer diverse perspectives on the Christian life. Unfortunately, many Christian singles attest to feeling overlooked. Pastors and church leaders, many long married, often find themselves ill-equipped to understand the particular relational, emotional, and spiritual needs of long-term Christian singles. Worse, they're unaware that they're underequipped. Married church members, though sympathetic to the needs of their single friends, nevertheless struggle to bridge the divide. Written by a dedicated Christ-follower and long-term Christian single, *The Proper Care and Feeding of Singles* addresses the issues with humor and grace, offering practical solutions to strengthen the bonds of love and fellowship within local congregations.

“ The thing to remember about a ‘ stray ’ vampire is that there is probably a good reason he is friendless, alone, and wounded. Approach with caution. ” Iris Scanlon, Half-Moon Hollow ’ s only daytime vampire concierge, knows more about the undead than she ’ d like. Running their daylight errands—from letting in

the plumber to picking up some chilled Faux Type O—gives her a look at the not-so-glamorous side of vamps. Her rules are strict; relationships are purely business, not friendship—and certainly not anything more. Then she finds her newest client, Cal, poisoned on his kitchen floor, and her quiet life turns upside down. Cal—who would be devastatingly sexy, if Iris thought vampires were sexy—offers Iris a hefty fee for hiding him at her place. And even though he 's imperious, unfriendly, and doesn ' t seem to understand the difference between “ employee ” and “ servant, ” she agrees. But as they search for who wants him permanently dead, Iris is breaking more and more of her own rules . . . particularly those about nudity. Could it be that what she really needs is some intrigue and romance—and her very own stray vampire?
