### Fertility Without Fertilizers: A Basic Approach to Organic

The basic structure of all organisms is built of carbon (C), oxygen (O) and hydrogen (H). Plants obtain these elements from water (H<sub>2</sub>O) in the soil and carbon dioxide (CO<sub>2</sub>) in the air, so no input is required beyond being sure the plant has an adequate water supply to meet its needs. Turning the H<sub>2</sub>O and CO<sub>2</sub>

### Fertility without fertilizers : a basic approach to

Synthetic fertilizers give plants a quick boost but do little to improve soil texture, stimulate soil life, or improve your soil's long-term fertility. Because synthetic fertilizers are highly water-soluble, they can also leach out into streams and ponds. Synthetic fertilizers do have some advantages in early spring.
