The Hunt for MH370

"A staggering, meticulous and frequently spine-chilling work of longform journalism." Trent Dalton Somewhere deep beneath the wild seas of the southern Indian Ocean, perhaps in the eerie underwater canyons of Broken Ridge along the Seventh Arc satellite band, lies the answer to the world's greatest aviation mystery. Why, on the night of 8 March 2014, did Malaysia Airlines Flight MH370 suddenly U-turn, zig-zag up the Straits of Malacca, then vanish with 239 souls on board? Was it an elaborate murder-suicide by a rogue pilot? A terrible accident such as onboard fire, rapid decompression or systems failure? A terrorist hijacking gone wrong? Or something else entirely? Award-winning journalist Ean Higgins has led the world media's coverage of this incredible saga and draws on years of interviews with aviation experts, victims' families, air crash investigators and professional hunters across land, sea and sky to dissect the riddle of MH370's fate. PRAISE FOR THE HUNT FOR MH370 "The Hunt for MH370 is a riveting page-turner written with the drama and intrigue of a thriller. Piece by tantalising piece, Ean Higgins unpuzzles this most baffling of mysteries, asking dangerous questions and revealing shocking truths." Dick Smith "The disappearance of MH370 remains the greatest and most pressing mystery in aviation history that demands answers for both the families of the stricken passengers and the travelling public. No journalist has been more relentless in the pursuit of the truth of MH370 than Ean Higgins. The Hunt for MH370 is an engrossing book in which Higgins has meticulously pieced together the puzzle of the doomed flight from its vanishing to the flawed investigation and the largest maritime search ever that leads the reader to a chilling conclusion that is almost impossible to comprehend." Paul Whittaker, Chief Executive Sky News and former editor-in-chief, The Australian

The Dragon, the Eagle, and the Disappearance of Mh370

A year after the disappearance and commencement of the international search for Malaysia Airlines Flight 370, no sign of the plane has been found—no debris, no bodies, no sign of the much-talked-about black box. Richard Belzer, George Noory, and David Wayne want to know why. Scrutinizing the theories the media and politicians claim are the “most likely” reasons the plane crashed, Belzer, Noory, and Wayne argue that if a year after a huge Boeing 777 has gone missing, and there’s still no sign of it whatsoever, it’s time to think outside the box. The public needs to stop being misled. If a plane and its passengers went "missing" once, what's to stop it from happening again? Some of the theories the

authors consider seem implausible on the surface, but the thorough research they've done and the continual failure of politicians, aviation authorities, and military members around the world to give any indication they're wrong makes their arguments as good—if not better—than the more widely shared ones. The title of this thought-provoking volume, *Someone is Hiding Something*, is a line spoken by former Malaysian Prime Minister Mahathir Mohamad—perhaps the only government official to publicly acknowledge the true reason that neither Flight 370 nor the 239 people onboard have been found.

This book demonstrates how nonlinear/non-Gaussian Bayesian time series estimation methods were used to produce a probability distribution of potential MH370 flight paths. It provides details of how the probabilistic models of aircraft flight dynamics, satellite communication system measurements, environmental effects and radar data were constructed and calibrated. The probability distribution was used to define the search zone in the southern Indian Ocean. The book describes particle-filter based numerical calculation of the aircraft flight-path probability distribution and validates the method using data from several of the involved aircraft's previous flights. Finally it is shown how the Reunion Island flaperon debris find affects the search probability distribution.

Geomorphometry is the science of quantitative terrain characterization and analysis, and has traditionally focused on the investigation of terrestrial and planetary landscapes. However, applications of marine geomorphometry have now moved beyond the simple adoption of techniques developed for terrestrial studies, driven by the rise in the acquisition of high-resolution seafloor data and by the availability of user-friendly spatial analytical tools. Considering that the seafloor represents 71% of the surface of our planet, this is an important step towards understanding the Earth in its entirety. This volume is the first one dedicated to marine applications of geomorphometry. It showcases studies addressing the five steps of geomorphometry: sampling a surface (e.g., the seafloor), generating a Digital Terrain Model (DTM) from samples, preprocessing the DTM for subsequent analyses (e.g., correcting for errors and artifacts), deriving terrain attributes and/or extracting terrain features from the DTM, and using and explaining those terrain attributes and features in a given context. Throughout these studies, authors address a range of challenges and issues associated with applying geomorphometric techniques to the complex marine environment, including issues related to spatial scale, data quality, and linking seafloor topography with physical, geological, biological, and ecological processes. As marine geomorphometry becomes increasingly recognized as a sub-discipline of geomorphometry, this volume brings together a collection of research articles that reflect the types of studies that are helping to chart the course for the future of marine geomorphometry.

By the Sound of Silence: A Novella on Malaysia Airlines Flight MH370

Kelly Rostam, ex-airline pilot cum private detective, is contacted by a strange request to prove that a Malaysian Chinese had nothing to do with the disappearance of Malaysia Airlines flight MH370. To prove a negative seems unusual to Rostam, who refuses to take the case. Nevertheless, a red flag has been raised and Rostam's innate curiosity coupled with his knowledge about the plane's operation cause him to dig deeper and draw the attention of the American CIA. The gripping novel is loosely based on the facts and discoveries made by Michael La Vasani as he investigated the gaps in the media reports and press releases which have often been contradictory. It deals with evidence of a vast cover-up by the Chinese government to disguise the real reason lives were sacrificed on that vanished flight.

The Disappearing Act

This book traces and explains the mysterious disappearance of Malaysian Airlines Flight #370 from its departure on March 14, 2014, from Kuala Lumpur International Airport to its teleportation in the Indian Ocean. It also examines all the possible theories about the fate of Flight #370. Furthermore, the most famous cases of UFO encounters with pilots, army personnel, and everyday people are mentioned.

No event of any significance in the world today -- be it an unexpected election result, a terrorist attack, the death of a public figure, a meteorological anomaly, or the flu pandemic -- takes place without generating at least a flutter of conspiracy speculations. *Conspiracy Theories: A Critical Introduction* offers a well informed, highly accessible, and thoroughly engaging introduction to conspiracy theories, discussing their nature and history, causes and consequences. Through a series of specific questions that cut to the core of conspiracism as a global social and cultural phenomenon, the book deconstructs the logic and rhetoric of conspiracy theories and analyses the broader social and psychological factors that contribute to their persistence in modern society. The book by New Zealand pilot Ewan Wilson and top journalist Geoff Taylor presents compelling evidence about what actually occurred in the final hours of flight 370, some of it based on new interviews with family members of pilot Zaharie Ahmad Shah. Wilson describes MH370's loss as probably the greatest mystery in the history of aviation. "The disappearance of Malaysia Airlines flight 370 captured the world's attention and shocked everyone." "Our book takes you to Kuala Lumpur International Airport on March 8 and brings together the lives of passengers and crew who ultimately met their fate on board what should've been a routine flight to Beijing on a well respected airline operating a state-of-the-art airliner with a near faultless record." "For the first time we present a detailed analysis of the flight, the incredible route it took, and who we believe was in charge of the aircraft as it plunged into the Indian Ocean." -- Backcover.

Culture and Crisis Communication: Cases from Nonwestern Societies focuses on trending areas of interest such as globalization and the emerging economic powers in the form of the BRIC countries--Brazil, Russia, India, and China. It analyzes crisis not just within a single country perspective, but from a cross-cultural and cross-country perspective--such as how a crisis in one country may affect another. The key is to identify and discuss how politics, culture, religion and other social issues affect crisis communication and management, and lessons that organizations that wish to operate or are operating in those cultures could use in preparing and managing crisis. The book is divided into three sections. The first is an introduction on culture and crisis communication. The next chapters analyze case studies, the intra-cultural and trans-boundary crisis communication. Each chapter examines how cultural impacts communication ad response to crisis, using a case study or two to illustrate a point.

The most complete and technically informed account to date of what happened to missing Malaysian airliner MH370. Five years after a state-of-the-art Boeing 777 vanished into the night over the South China Sea, renowned science and aviation author Jeff Wise offers a compelling and detailed account of what happened that night and in the months and years that followed. In his follow-up to "The Plane That

Wasn't There," named the Best Kindle Single of 2015, Wise walks readers through the many developments that have taken place in the meantime and explains why despite spending hundreds of millions of dollars and searching an area of seabed the size of Great Britain, authorities were unable to locate the plane's wreckage. Officials and independent experts were stunned by their failure, but Wise predicted it four years ago. Here he distills the fruits of exhaustive research and arrives at a conclusion that upends our understanding of what humans are capable of, both technologically and morally. Jeff Wise a science journalist specializing in aviation and psychology. A licensed pilot of gliders and light airplanes, he has also written for New York, the New York Times, Time, Businessweek, Esquire, Details, and many others. He is also the author of Extreme Fear: The Science of Your Mind in Danger. A native of Massachusetts, he lives outside New York City with his wife and two sons.

Goodnight Malaysian 370

"People don't do anything until they are inspired. But once they are inspired there is almost nothing they will not do." Mathew Kelly, author/lecturer Consider these apparently disparate events: -On September 11, 2001, three pilots steered their hijacked commercial aircraft, full of passengers, into the WTC and the Pentagon. A fourth commercial aircraft, which was headed for Washington, D.C., crashed in Pennsylvania. A fifth pilot, Zacharias Moussaoui, was arrested before he could hijack another commercial aircraft to be used in the plot. -On December 9, 2001, Yazid Sufaat, a former Malaysian Army Captain, was arrested and detained in Malaysia while trying to enter the country from Afghanistan where he had operated an Al Qaeda biological weapons facility. It was discovered that Yazid had provided Zacharias Moussaoui with \$30,000 and Moussaoui's US Visa indicated that Moussaoui was Yazid's employee. Intelligence reports allege that Yazid had been tasked by the man who had plotted the 9/11 attacks, Khalid Sheik Mohammed, with recruiting four Malaysian commercial airline pilots who would be willing to fly their aircraft into US Warships in the Straits of Malacca. -2008 - Yazid is released from detention and joins the Malaysian Islamic fundamentalist opposition political party, PAS. Yazid supports Anwar Ibrahim, the PAS political leader, but believes that the Malaysian government, itself, is corrupt and that the political system of democracy is un-Islamic. -2009- Malaysian Prime Minister Najib Razak creates a Malaysian government investment fund, 1MDB fund, which was reportedly defrauded of billions of dollars by operatives linked to the Najib. -March 7, 2014, PAS political leader, Anwar Ibrahim, is convicted of sodomy in Kuala Lumpur, Malaysia. Anwar has been a fierce critic of the corrupt government of Prime Minister Najib Razak and outside observers, as well as the UN, conclude that the charges against Anwar were politically motivated. March 7, 2014, PAS political party member, Zawaharie Ahmed Shaw, who was present in the courtroom for the Anwar verdict, departed the courtroom and posted a photo of himself on Facebook wearing a T-shirt stating "Democracy is Dead." Zawaharie then changed into his Malaysian Airlines Captain's uniform and drove to Kuala Lumpur Airport. He departed as Captain of Malaysian Airlines Flight 370 that night. An hour into the flight, the aircraft inexplicably reversed course, flew back across Malaysia, turned a hard right and flew the length of the Straits of Malacca. I have twenty years of experience as a criminal investigator and as I began to research the above information, I found that these events may, in fact, be interconnected. From my research, only one thing is certain, any threat assessment of commercial aircraft being used as terrorist weapons must take into account all of the above information and more. It is a complex world and many of the topics I touch on in this book are sensitive social topics. I seek to offend no one, but at the same time, I seek to protect no one's feelings. These are serious life and death issues and the flying public has a paramount right to know everything that can be explained about these events. Was Malaysian Airlines Flight 370 used by the pilot, Zawaharie Ahmed Shaw, as a show of political defiance against the Malaysian Government? Was it a terrorist incident? Was Zawaharie inspired, influenced, or even recruited by Yazid Sufaat? Does Al Qaeda and ISIS continue to recruit commercial pilots for suicide missions? To pose these question intelligently requires a wealth of background information. I invite you to read this book skeptically and to answer the questions for

yourself. I have also provided two additional timelines within the book to help integrate chronological events. Respectfully, Mike Finnegan

Asian Yearbook of International Law

On March 8, 2014, Malaysian Airlines Flight MH370 left Malaysia on its way to China and never arrived. Radar contact was lost by both air traffic control and the Malaysian military. The plane never reached its destination. In fact, it seemed as though the passenger jet had simply vanished, but how does a massive plane just disappear? Insurance investigator Angeline Herman is soon pulled into the investigation as answers are obsessively sought, the lives of hundreds presumed lost with no one to blame. CIA Agent Chris Channing joins forces with her, and their destinies are soon entwined as they seek answers to a mystery that holds the fate of nations-but will they find the truth?

MH370 - The Secret Files

On the 8th of March, at 00:41, Malaysia Airlines Flight MH370 took off from Kuala Lumpur International Airport. At 01:19, the pilot bid air traffic control 'good night'. Two minutes later, the plane and its 227 passengers vanished from the skies. To date, no trace of the aircraft has been found. Experienced author and journalist Nigel Cawthorne has researched the case with incredible thoroughness, revealing the most compelling explanations behind the mystery which has gripped the world.

Cause Stalking

CNN Aviation Correspondent Richard Quest offers a gripping and definitive account of the disappearance of Malaysian Airline Flight MH370 in March 2014. On March 8, 2014, Malaysian Airlines Flight MH370 disappeared with barely a trace, carrying 239 people on board--seemingly vanishing into the dark night. The airplane's whereabouts and fate would quickly become one of the biggest aviation mysteries of our time. Richard Quest, CNN's Aviation Correspondent, was one of the leading journalists covering the story. In a coincidence, Quest had interviewed one of the two pilots a few weeks before the disappearance. It is here that he begins his gripping account of those tense weeks in March, presenting a fascinating chronicle of an international search effort, which despite years of searching and tens of millions of dollars spent has failed to find the plane. Quest dissects what happened in the hours following the plane's disappearance and chronicles the days and weeks of searching, which led to nothing but increasing despair. He takes apart the varying responses from authorities and the discrepancies in reports, the wide range of theories, the startling fact that the plane actually turned around and flew in the opposite direction, and what solutions the aviation industry must now implement to ensure it never happens again. What emerges is a riveting chronicle of a tragedy that continues to baffle everyone from aviation experts to satellite engineers to politicians--and which to this day worries the traveling public that it could happen again. The five-time Emmy Award-winning investigative reporter and New York Times bestselling author of *Stonewalled* and *The Smear* uncovers how partisan bias and gullibility are destroying American journalism. The news as we once knew it no longer exists. It's become a product molded and shaped to suit the narrative. Facts that don't fit are omitted. Off-narrative people and views are controversialized or neatly deposited down the memory hole. Partisan pundits, analysts and anonymous sources fill news space leaving little room for facts. The line between opinion and fact has disappeared. In *Slanted*, Sharyl Attkisson reveals with gripping detail the struggles inside newsrooms where journalism used to rule. For the first time, dozens of current and former top national news executives, producers and reporters give insider accounts, speaking with shocking candor about their industry's devolution. Americans know their news diet is now filled with fast food concoctions created from talking point recipes devised by partisan and corporate interests. They see a record number of fact mistakes made by some of the world's most formerly well-respected media outlets . . . often with no apologies. The media largely blames Donald Trump. But as this autopsy shows, the death of the news as we once knew it is self-inflicted. And the weapon was the narrative. Sharyl Attkisson also finds reason for hope and argues that courageous, counternarrative news reporting can revive journalism. --Jeff Gerth, Pulitzer Prize winning former investigative reporter for the New York Times about *Stonewalled*

Beneath Another Sky

'The affair was weird when seen from afar, but seen in close-up, it was Kafkaesque: it was not possible in 2014 for a Boeing 777 to have simply disappeared' On 8 March 2014, 239 passengers boarded the Malaysia Airlines Flight 370 only to vanish into thin air. The disappearance of the plane has dominated news cycles and media discussion ever since, and rightly so. In a world defined by advanced technology and interconnectedness, how could an entire aircraft become untraceable? Had the flight been subject to a perfect hijack? Perhaps the pilots lost control? And if the plane did crash, where was the wreckage? Writing for *Le Monde* in the days and months after the aircraft's disappearance, journalist Florence de Changy closely documented the chaotic international investigation that followed, uncovering more questions than answers. Riddled with inconsistencies, contradictions and a lack of basic communication between authorities, the mystery surrounding flight MH370 only deepened. Now, de Changy offers her own explanation. Drawing together countless eyewitness testimonies, press releases, independent investigative reports and expert opinion, *The Disappearing Act* offers an eloquent and deeply unnerving narrative of what happened to the missing plane. An incredible feat of investigative journalism and a testament to de Changy's tenaciousness and clear-mindedness, this book is an exhaustive, gripping account into one of the most profound mysteries of the 21st century.

Explosions of Joy follows Paul Yin's journey to remove the stigma from mental health care in China. After attending psychology classes in California in the '80s, Paul realized that the culture in China could benefit from welcoming a western perspective on mental health care. He injected himself into disastrous situations involving his home country of China such as the SARS Epidemic, the Asiana Airlines 214 Disaster, the Sichuan Earthquake, and the Disappearance of Flight MH370, by providing hours of volunteer counseling to those in crisis. Despite the resistance of his culture, Paul Yin was able to make a way for the establishment of the Employee Assistance Program in China, and he has been instrumental in offering training to thousands who would go on to provide mental health care to those in need. Overall, he has dedicated his life to doing the most good for the greatest amount of people. The Vanishing of Flight MH370

There are at least 239 stories waiting to be told at length – those of the families of 239 passengers of MH370, how their lives took a turn on March 8th 2014 when MH370 disappeared. This is the story of one person, Naren, who lost his wife, Chandrika on that flight. The probability of survivors diminished with each passing day. As the months went by, Naren remained pre-occupied, wrestling over what to believe. Some friends argued insistently against doomsday conclusions and spoke of their dreams as the basis to keep up hope. Many others, including Naren's daughter, preferred silence over predictions. The one argument against which there was no counter was: Where is the evidence? Where is the debris? Where are the passengers? Life After MH370 documents Naren's experience with loss, grief, trauma and sorrow. The struggle with 'ambiguous loss' morphs into a ceaseless search, for the scent of a cover-up, for the truth, for that explanation that satisfies and helps one move on. A loss that meant critically resizing shared dreams, reconfiguring relationships and attempting to find a purpose that anchor him in the present. There is the hint of a promise in KS Narendran's story – of existential truths about living and dying that might help anyone who comes upon this book.

Applied ethics has been gaining wide attention in a variety of curriculums, and there is growing awareness of the need for ethical training in general. Well-publicized ethical problems such as the Challenger disaster, the Ford Pinto case and the collapse of corporations such as Enron have highlighted the need to rethink the role of ethics in the workplace. The concept of applied ethics originated in medicine with a groundbreaking book published in 1979. Business ethics books began to appear in the 1980s, with engineering ethics following in the 1990s. This volume now opens up a new area of applied ethics, comprehensively addressing the ethical issues confronting the civil aviation industry. Aviation is unique in two major ways: firstly it has a long history of government regulations, and secondly its primary focus is the safety of its passengers and crew. For decades commercial aviation was viewed in the same manner as public utilities, and thus it was highly regulated by the government. Since the Deregulation Act of 1978, aviation has been viewed as any other business while other experts continue to believe that the sudden switch to deregulation has caused problems, especially since many airlines were unprepared for the change. Ethical Issues in Aviation focuses on current concerns and trends, to reflect the changes that have occurred in this deregulated era. The book provides the reader with an overview of the major themes in civil aviation ethics. It begins with theoretical frameworks, followed by sections on the business side of aviation, employee responsibility, diversity in aviation, ground issues regarding airports, air traffic control and security, as well as health and the environment. The contributors to the volume include both academics doing research in the field as well as professionals who provide accounts of the ethical situations that arise in the workplace.

"In *The Crash Detectives*, veteran aviation journalist and air safety investigator Christine Negroni takes us inside crash investigations from the early days of the jet age to the present, including the search for answers about what happened to the missing Malaysia Airlines Flight 370. As Negroni dissects what happened and why, she explores their common themes and, most important, what has been learned from them to make planes safer. Indeed, as Negroni shows, virtually every aspect of modern pilot training, airline operation, and airplane design has been shaped by lessons learned from disaster. Along the way, she also details some miraculous saves, when quick-thinking pilots averted catastrophe and kept hundreds of people alive. Tying in aviation science, performance psychology, and extensive interviews with pilots, engineers, human factors specialists, crash survivors, and others involved in accidents all over the world, *The Crash Detectives* is an alternately terrifying and inspiring book that might just cure your fear of flying, and will definitely make you a more informed passenger, "--Amazon.com.

What is news and why does it turn out the way it does? These questions are addressed in this Reader. Classic news studies representing several methodologies and approaches are presented to guide students in their initial exploration into the topics. Berkowitz provides an orientation for a social approach to studying news, departing from the premise that news is a human construction that gains its characteristics through the social world from which it emerges. The first section of readings introduces a theoretical background for analyzing the sections that follow. Each of the eight sections are clearly and concisely introduced by Berkowitz, enabling students to interpret the salient points from and implications of representative articles in the field.

Life After MH370

After decades of writing about European history, Norman Davies embarked upon an extended journey that took him round the world. He aimed to test his powers of observation, but equally to encounter history in a new way. *Beneath Another Sky* is partly a historian's travelogue, partly a highly engaging exploration of events and personalities that have fashioned today's world. Davies's circumnavigation takes him to Baku, the Emirates, India, Malaysia, Mauritius, Tasmania, Tahiti, Texas, Madeira and many places in between. At every stop, he not only describes the current scene but also excavates the layers of accumulated experience that underpin the present. He tramps round ancient temples, delves into the fate of indigenous peoples, uncovers the Nazi origins of Frankfurt airport and lectures on imperialism in a desert oasis. 'Everything has its history', he writes, 'including the history of finding one's way or of getting lost.' As always, Norman Davies watches the historical horizon as well as what is close at hand, and brilliantly complicates our view of the past.

Celebrate the thirtieth anniversary of the Newbery Honor-winning survival novel *Hatchet* with a pocket-sized edition perfect for travelers to take along on their own adventures. This special anniversary edition includes a new introduction and commentary by author Gary Paulsen, pen-and-ink illustrations by Drew Willis, and a water resistant cover. *Hatchet* has also been nominated as one of America's best-loved novels by PBS's *The Great American Read*. Thirteen-year-old Brian Robeson, haunted by his secret knowledge of his mother's infidelity, is traveling by single-engine plane to visit his father for the first time since the divorce. When the plane crashes, killing the pilot, the sole survivor is Brian. He is alone in the Canadian wilderness with nothing but his clothing, a tattered windbreaker, and the hatchet his mother had given him as a present. At first consumed by despair and self-pity, Brian slowly learns survival skills—how to make a shelter for himself, how to hunt and fish and forage for food, how to make

a fire—and even finds the courage to start over from scratch when a tornado ravages his campsite. When Brian is finally rescued after fifty-four days in the wild, he emerges from his ordeal with new patience and maturity, and a greater understanding of himself and his parents.

Someone Is Hiding Something

‘The affair was weird when seen from afar, but seen close-up, it was Kafkaesque: it was not possible in 2014 for a Boeing 777 to have simply disappeared’ A remarkable piece of investigative journalism into one of the most pervasive and troubling mysteries of recent memory.

Ethical Issues in Aviation

OCEANS 2016 - Shanghai

On March 8, 2014, Malaysia Airlines Flight 370 loaded 239 people on board and took off for what should have been a six-hour flight. It never made it—and it’s still missing. It’s been a year since Malaysia Airlines Flight 370 vanished, and there’s still no sign of the aircraft, its passengers, or its crew—nor confirmation of what happened or where the aircraft resides. In this gripping investigation of the events that led to the plane’s disappearance—and why they could happen again—CNN aviation analyst David Soucie exposes the flaws in the aviation industry, shares what needs to be done so a plane doesn’t go missing again, and uses a Bayesian analysis model to reveal what most likely happened on board the plane that led to its downfall. Comprehensive in scope, personal and empathetic in voice, Soucie draws on his thirty years of experience as an accident investigator working with the Federal Aviation Administration. He allows you to put the wild speculation about the plane’s disappearance aside and assess the facts through the eyes of an experienced accident investigator.
