The Foundation of All Survival Skills is “Feeder” Mind-Set “Feeder” mind-set means being in control of a situation, proactive rather than reactive. It is an optimistic outlook that reframes any situation as a learning experience. Kevin Estela teaches survival skills from this feeder-based perspective, which is what separates his teaching style from other wilderness instructors. Kevin has written the quintessential guide for an outdoor enthusiast’s “bucket list” of skills—how to make a fire, build a shelter, gather food, find water, use a knife correctly and make cordage. These skills will keep you safe and better prepare you to deal with emergencies in the field, when you’ll need the additional skills of signaling and communication, navigation and crisis first aid taught in this book. Each chapter concludes with more advanced techniques to build your skills in various challenging situations, with tips that even seasoned survival enthusiasts haven’t thought of. 101 Skills You Need to Survive in the Woods is not a onetime read but a lifetime reference you will turn to over and over again. It will become the first thing you pack for any adventure and just might save your— or someone else’s—life. Kevin Estela, a bushcraft and survival expert, is an avid world traveler and martial arts instructor.

"The 10 Bushcraft Books" is, as the title suggests, literally all ten of Richard Graves' "Bushcraft Handbooks" bound together as a convenient single volume, perfect for slipping into your rucksack. A true classic of the genre and out of print for more than forty years, "The 10 Bushcraft Books" is back! This edition is a perfect replica of the First Edition, with the same size, formatting, layout, page count and illustrations, but in a softcover format. Unlike the poorly-OCR'd, abridged, censored and dumbed down modern US market reprint edition titled "Bushcraft : The Ultimate Guide to Survival in the Wilderness", this edition of Graves' "The 10 Bushcraft Books" is the REAL DEAL, presented exactly as the author intended, with no deletions or omissions. It is the ONLY COMPLETE volume of Richard Graves' work available today. Remember: If it doesn't have the orange and black cover, it's incomplete and dumbed down. Don't waste your money buying anything else. The term "Bushcraft" describes the activity of how to make use of natural materials found locally in any area. It includes many primitive skills, and to these are added modern skills necessary for survival such as time and direction and the provision of more modern camp comforts and equipment. The practice of bushcraft develops in an individual a remarkable ability to adapt quickly to a changing environment. Because this is so, the activity is a valuable counter to

today's specialisation, and it is particularly significant in youth training work. The author of "The 10 Bushcraft Books", Richard Graves, is a member of the Irish literary family of that name. He is also the author of: "Bushcraft: How to live in Jungle and Bush" "Survival Hints", a pamphlet which was included in all Allied jungle survival kits in the Pacific during WWII The Bushcraft Handbook "Ropes and Cords" The Bushcraft Handbook "Huts and Thatching" The Bushcraft Handbook "Bush Campcraft" The Bushcraft Handbook "Food and Water" The Bushcraft Handbook "Fire Making" The Bushcraft Handbook "Knots and Lashings" The Bushcraft Handbook "Traps and Tracking" The Bushcraft Handbook "Snare and Traps" The Bushcraft Handbook "Travel and Gear" The Bushcraft Handbook "Time and Direction" all authoritative works on bushcraft and the art of bush and jungle survival. An enthusiastic bushwalker, skier and pioneer of white-water canoeing, Richard Graves foresaw how a knowledge of bushcraft could save lives in the Second World War. To achieve this end, he initiated and led the Australian Jungle Rescue Detachment, assigned to the American Far East Air Force. This detachment of 60 specially selected A.I.F. soldiers successfully effected more than 300 rescue missions, most of which were in enemy-held territory, without failure of a mission or loss of a man. An essential preliminary for rescue is survival, and it was for this purpose that the notes for these books were written. These notes were

later revised and prepared for a School in Bushcraft which was conducted for nearly 20 years. As far as is known, "The 10 Bushcraft Books" are unique. There is nothing quite like them, nor is any collection of bushcraft knowledge under one cover as comprehensive.

Gather round an open fire. Share delicious food inspired by the outdoors and infused with age-old wisdom. This is living. This is the way of the wilderness chef. Ray Mears has spent his life travelling the world, living with and learning from trackers, adventurers and indigenous peoples in the desert, the rainforests and the Arctic north. In this book he presents us with a delicious array of his most popular and enduring recipes, tried-and-tested for all levels of skill and in all conditions, from quick and tasty meals to opulent gourmet feasts. Opening with advice on setting up your outdoor kitchen and essential cooking techniques, Ray shows how to assess your ingredients, light a fire, cook in ashes and leaves, steam, smoke, and build a ground oven. He then shares his fabulous and enjoyable recipes, including: - easy ideas that children and grownups can try out (campfire s'mores, wilderness hot dog, egg on a stick, lemon chicken wrapped in dock leaves) - gourmet meals (Italian hunter's

the greatest joy. Of all the forests that I have explored, it is the great circumpolar Boreal forest of the North that calls to me most. Here is a landscape where bush knowledge really counts and where experience counts even more. This book has been thirty years in the making.' Out on the Land is an absorbing exploration of, and tribute to, the circumpolar Boreal forest of the North: its landscape, its people, their cultures and skills, the wilderness that embodies it, and its immense beauty. The book is vast in scope and covers every aspect of being in the wilderness in both winter and summer (clothing, kit, skills, cooking, survival), revealing the age-old traditions and techniques, and how to carry them out yourself. It also includes case studies of early explorers, as well as modern-day adventurers who found themselves stranded in the forest and forced to work out a way to survive. So much more than a bushcraft manual, this book goes deeper, to the traditions and cultures that gave us these skills, as well as focusing on the detail itself. Ray and Lars's practical advice is wound around a deep love for the forest, respect and admiration for the people who live there and sheer enjoyment of the stunning scenery.

## Outdoor Life in Summer

The definitive guide to living off the land. Even as the world seems to move faster and faster each day, many people are becoming ever more interested in self-reliance. They are spending more time outdoors, hiking and camping. They are growing and preserving their own food. Exploring self-reliance topics is how more and more people are staying grounded in a busy world. Homesteading is one area that falls under the self-reliance umbrella: This book explains how to raise chickens in your backyard, harvest rainwater and make it safe for consumption, save seeds from your garden harvest, and preserve food from one season to the next. The outdoor skills chapter discusses the basics of tracking, wild plants that have medicinal uses, and how to keep clean while in the field. DIY projects are always popular with the self-reliance audience: This chapter explains how to make a homemade waterproof oilcloth tarp from a thrift store bed sheet, how to build and use a vacucanner for food storage, and, perhaps most importantly, how to roast and brew coffee while off the grid. Survival planning is certainly part of self-reliance as well, and information on caching supplies for emergencies, how to use a bow and arrow to acquire food, and why cotton clothing is a horrible choice for outdoor pursuits are all covered in this book. For everyone who is looking for ways to be

FOOD & DRINK / COOKERY. Ray Mears has travelled the world discovering how native people manage to live on just what nature provides. It always frustrated him not knowing how our own ancestors fed themselves. We know they were hunter-gatherers, but what did they eat day to day? How did they find their calories throughout the year? What were their staple foods? Where did they get their vitamins? How did they ensure their bodies received enough variety? In this book he travels back ten thousand years to a time before farming to learn how our ancestors found, prepared and cooked their food. This extraordinary journey reveals many new possibilities many of the same food sources are still there for us if only we know where to look. Through his knowledge of the countryside and the research conducted specially for this book with archaeo-botanist Gordon Hillman, we learn many new, useful and often surprising things about the amazingly rich natural larder that still surrounds us.

## **Advanced Bushcraft**

This is the ultimate guide to staying alive in extreme situations — those events we think will never happen to us, but one day might. This book is the key to surviving lifethreatening events, accidents, random attacks and politically motivated insurgencies where we live, work or take holidays. Using the tactics, skills and tricks of the trade taught in this survivors' manual could save your life when danger or terror suddenly strikes — at home, in the office, in the street, when traveling in unknown and inhospitable situations, or when exposed to the wilderness. Written by experts in the field, this authoritative book reveals the secrets of wilderness and urban survival, and teaches the essential skills needed to survive any jeopardy. Structured into two sections, the first shows the essential bushcraft skills needed to survive outdoors in every climate and terrain: how to make shelters, how to find drinking water, how to start a fire from scratch, how to stalk and trap animals for food, and how to orienteer without a map. The second section focuses on how to ensure personal safety when everyday situations become life-threatening, including hostage situations, counter-terrorism techniques, selfdefense against personal attacks, and how to deal with car hijacking, house fires, transport accidents and medical emergencies. With its emphasis on teaching

city and learn the many pieces of forgotten wisdom our great ancestors left behind? If you answered 'yes' to any of the above questions, then look no further-- bushcraft is precisely what you need. Whether you want to build your own shelter, start your own fire with nothing but a spindle and board, or even set a trap to catch your own food, mastering the art of manufacturing everything you need can take you a long way to surviving on your own. With so much uncertainty surrounding us in the world of today--economic crashes, global warming, and impending health crises--the urge to be prepared for a worst-case scenario is ever-growing. It is no surprise then that as many as 3.7 million Americans consider themselves survivalists, and the numbers are only increasing exponentially worldwide. It may finally be the time for you to go into the wilderness with nothing but your hands, and start exploring all the possibilities that nature has to offer you to become completely independent and stop relying on anything or anyone but yourself to survive and thrive. Don't jump in just yet, though! You'll need proper guidance to help you understand exactly what you need and how you need to do it. You must prepare yourself for any challenge you may face out there to avoid much unnecessary time spent in the dark simply trying to figure things out. In *Essential Bushcraft*, you will discover: Why bushcraft is the answer you've been searching for to become completely independent and easily
