Detective Pikachu: Story of the Movie

A Personal History of Nuclear Medicine is an account of how nuclear medicine developed, and its basic philosophy in the past, present and future. The book outlines the history of the development of nuclear medicine as experienced by the author and describes the hurdles that nuclear medicine has had to face, in view of the perception of risk of radiation. It also explains how nuclear medicine solves medical problems in clinical practice and how it has contributed to a new definition of disease. The book concludes with future projections of the likely developments in this area in the next 50 years. Target market: nuclear medicine professionals as well non-nuclear medicine physicians and the public

Alice in Murderland

In 1930, Bob Brown predicted that the printed book was bound for obsolescence. The time has come, he insisted, to rid the reader of the cumbersome

book. He invented a machine that would allow one to read books and any text extremely fast and in a hyper abbreviated form. He called these abbreviated texts, with em dashes replacing words: readies. He envisioned sending the condensed texts through wireless networks. The Readies, describes these eponymously named abbreviated texts and his plans for a reading machine, but since he printed only 150 copies, the volume is practically unknown outside of a small circle of scholars. With this new edition, Craig Saper hopes to introduce Bob Brown's Roving Eye Press books to a new generation of readers.

Alice in Murderland

Both compounds and multi-word expressions are complex lexical units, made up of at least two constituents. The most basic difference is that the former are morphological objects and the latter result from syntactic processes. However, the exact demarcation between compounds and multi-word expressions differs greatly from language to language and is often a matter of debate in and across languages. Similarly debated is whether and how these two different kinds of units complement or compete with each other. The volume presents an overview of compounds and multi-word expressions in a variety of European languages. Central questions that are discussed for each language concern the formal distinction between compounds and multi-word expressions, their formation and their status in lexicon and grammar. The volume contains chapters on German, English, Dutch, French, Italian, Spanish, Greek, Russian, Polish, Finnish, and Hungarian as well as a contrastive overview with a focus on German. It brings together insights from word-formation theory, phraseology and theory of grammar and aims to contribute to the understanding of the lexicon, both from a language-specific and cross-linguistic perspective.

Every Bullet Has Its Billet

This book proposes a detailed picture of the continuities and ruptures between communication in primates and language in humans. It explores a diversity of perspectives on the origins of language, including a fine description of vocal communication in animals, mainly in monkeys and apes, but also in birds, the study of vocal tract anatomy and cortical control of the vocal productions in monkeys and apes, the description of combinatorial structures and their social and communicative value, and the exploration of the cognitive environment in which language may have emerged from nonhuman primate vocal or gestural communication.

Pika Bunny and the Thunderstorm

in Pink is the latest book from best-selling author Mike Sacks (And Here's the Kicker, Poking a Dead Frog, Stinker Lets Loose). Passable in Pink deftly sends up the 1980s and John Hughes movies while addressing the vital question: Will Addy Stevenson go to the senior prom? Addy is suffering through her sophomore year at suburban Chicago's Northridge High. She lives on the "wrong" side of the lake with her father, a struggling advertising copywriter ("Where the hell is the goddamn beef?") and her ever-boozy mom ("Get me another drink, baby, and really make it sing."). Addy's younger brother, Spaz, her soon-to-marry older sister, Princess, and a visiting international transfer student add to the mix. Her world is turned upside down when she meets

Roland McDough, the "most beautiful Richie boy" at Northridge High. Is he actually interested in Addy, or is he just playing a game? Are you ready to jump back into the cool, neon-glazed, high-topped reality of the 1980s? Do you miss those kick-ass tubular synth-rockin' sounds and delicious phantasma-gaseous smells? When was the last time you put on your Members Only jacket and danced the Safety Dance? A loving send-up of a bygone era, this is one book in which Every Breath You Take will remind you of How You Used to Be.

Do you love twisty murder mysteries? Meet Tara Thorpe - the clue to a puzzling local murder has landed right on her doorstep. Perfect for fans of Faith Martin, LJ Ross and Joy Ellis. As the sun rises, a wealthy young woman - Samantha Seabrook - is found drowned in the ornamental fountain of a deserted

Cambridge courtyard, the only clue - an antique silver chain wound tightly around her throat. It's Tara Thorpe's job to discover what happened to Miss Seabrook - but the case becomes personal when she learns that Samantha had been receiving death threats rather like the one that landed on Tara's doorstep the night the woman died. Together with Detective Inspector Garstin Blake, Tara tracks the killer to the dank and dangerous fens on the outskirts of the city. But there's something Tara can't quite admit to Blake about her past - and it could make all the difference to whether they live or die. An absolutely gripping page-turner that will keep you hooked until the very last page. The first in a series of unputdownable Cambridge mysteries featuring Thorpe and Blake. What everyone's saying about Clare Chase: 'WOWZERS! My Kindle might as well have been glued to my hands as I couldn't put this story down My heart was in my mouth and I was reeling with shock from what was happening. It was all just too exciting!' Goodreads reviewer 'I was totally unprepared for the mind games and suspense This book will suck you in - brilliant!' 5 stars, Goodreads reviewer 'I was bursting to talk about this book with someone, I loved it There was no point putting it down even if I tried to because my mind could not think about anything else.' The author came to the decision to embark on this journey into dialogic pedagogy when he firmly realised that education is essentially dialogic. It is not that pedagogy should be dialogic -- he rather argues that it is always dialogic. This is true whether the participants in it, or outside observers of it, realise it or not -- and even when the participants are resistant to dialogue. This statement is in contrast with views that promote dialogic interaction in the classroom as a form of instruction. This conceptualisation contrasts with views that dialogic interaction or conversational instruction are more effective instructional means in comparison to, let's say, a more monologic genre of instruction such as a lecture or a demonstration. This statement is also in contrast with views that assume dialogue is a pedagogical instrument that can be turned on and off. He argues that whatever teachers and students do (or not do) whether in their classrooms or beyond it, they are locked in dialogic relations.

Millennial Monsters

Is it possible to conceive of a Hello Kitty Middle Ages or a Tickle Me Elmo Renaissance? The Oxford English Dictionary dates the first reference to "cute" in the sense of "attractive, pretty, charming" to 1834. More recently, Sianne Ngai has offered a critical overview of the cuteness of the twentieth-century avant-garde within the context of consumer culture. But if cuteness can get under the skin, what kinds of surfaces does it best infiltrate, particularly in the framework of historical forms, events, and objects that traditionally have been read as emergences around "big" aesthetics of formal symmetries, high affects, and resemblances? The *Retrofuturism of Cuteness* seeks to undo the temporal strictures surrounding aesthetic and affective categories, to displace a strict focus on commodification and cuteness, and to interrogate how cuteness as a minor aesthetics can refocus our perceptions and readings of both premodern and modern media, literature, and culture. Taking seriously the retro and the futuristic temporalities of cuteness, this volume puts in conversation projects that have unearthed remnants of a "cult of cute"-positioned historically and critically in between transitions into secularization, capitalist frameworks of commodification, and the enchantment of objects-and those that have investigated the uncanny haunting of earlier aesthetics in future-oriented modes of cuteness. The Latin *acutus*, the etymological root of cute, embraces the sharpened, the pointed, the nimble, the discriminating, and the piercing. But as Michael O'Rourke notes, cuteness evokes a proximity that is at once potentially invasive and contaminating and yet softening and transfiguring. Deploying cuteness as a mode of inquiry across time, this volume opens up unexpected lines of inquiry and unusual critical and creative aporias, from Christian asceticism, medieval cycle drama, and Shakespeare to manga, Bollywood, and *Second Life*. The projects collected here point to a spectrum of aesthetic-affective assemblages related to racial, ethnic, gender, sexual, and class dimensions that exceed or trouble our contemporary perceptions of such registers within object-subject and subject-object entanglements.

Beautiful Alberta is a spectacular photographic portrait of Canada's most prosperous province. It reveals the resplendent natural beauty of the West's towering mountains, cerulean lakes, man-made cities and unique architecture that come together in this awe-inspiring slice of the country. Mike Grandmason's perceptive eye has captured what makes Alberta special in the 125 exquisite photographs in this handsome collection. With a population of 4.1 million and a land area of 661,848 km² (255,541 sq mi), Alberta is Canada's fourth-largest province and contains within it distinct and varied topographies, from prairies and badlands, to boreal forests and mountain regions. Alberta's urban areas are no less impressive with portraits of Calgary, Edmonton and Fort McMurray. Renowned for its natural tourist attractions, its towns such as Banff, Canmore, Drumheller and Jasper accommodate

legions of visitors throughout the year. Alberta is home to a range of animals, including bison, grizzly and black bears, big horn sheep and mountain goats. The abundance of flora and fauna within Alberta's borders contrasts with the vast industrial tracts devoted to extracting and processing oil, which is the province's economic lifeblood. The photographs presented in Beautiful Alberta will inspire readers to explore this varied and interesting part of Canada.

"My worst day as governor was better than my best day as a United States senator."--Former Governor Tim Carper (D-DE, 1993-2001) Governors--both in, and now out of, office--see the job as the best in politics. Why is that? Drawing on a survey of former governors, personal interviews, as well as gubernatorial memoirs and biographies, Rosenthal shows students how and why governors succeed as policy leaders and makes a case as to why some governors are better at leveraging the institutional advantages of the office.

Any discussion of Japanese contemporary art inevitably leads to the pop-culture fantasies of Takashi Murakami, Yoshitomo Nara and the other artists of the Superflat movement. But Japan as a whole has changed dramatically after stumbling through a series of economic, social and ecological crises since the collapse of its "bubble" economy in the early 1990s. How did Murakami, Nara and Superflat become the dominant artistic vision of the Japan of today? What lies behind their imagery of a childish and decadent society unable to face up to reality? Written by a sociologist with an eye for sharp observation and clear reportage, *Before and After Superflat* offers the first comprehensive history in English of the Japanese art world from 1990 up to the tsunami of March 2011, and its struggle to find a voice amidst Japan's economic decline and China's economic ascent.

Kantha

The goal of this work is to describe the changes occurring in the Pitjantjatjara speech of teenagers in Areyonga, a Central Australian community, from both a grammatical and a sociolinguistic point of view. The study is based on data collected in 1994 and 1995. At the time the data was being collected, the Areyonga community had about 200 inhabitants, more than half of them under 25 years of age. A key question of this work is the extent to which Areyonga Teenage Pitjantjatjara is being influenced by contact with English. In order to identify changes in Areyonga Teenage Pitjantjatjara, contemporary speech was compared with several independent descriptions of Traditional Pitjantjatjara (and similar neighbouring dialects). Personal observations of the author and discussions with older Pitjantjatjara people at Areyonga help to round out the picture obtained. The Areyonga population is predominantly young. Most of the older people have left the settlement to return to their community of origin. As a result, many traditional ways of living have not been transmitted fully to the following generation. However there is an undeniable striving to reintegrate traditions into the community and the teaching of the children. Consequently, there is a constant effort to educate children in their first language. What then is the state of Areyonga Teenage Pitjantjatjara? This book aims to answer this question.

The Best Job in Politics: Exploring How Governors Succeed as Policy Leaders

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals-especially those that are endangered. His powerful message, conveyed with humor, compassion, and art- to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.

Risk Criticism is a study of literary and cultural responses to global environmental risk in an age of unfolding ecological catastrophe. In 2015, the Bulletin of the Atomic Scientists reset its iconic Doomsday Clock to three minutes to midnight, as close to the apocalypse as it has been since 1953. What pushed its hands was not just the threat of nuclear weapons, but also other global environmental risks that the Bulletin judged to have risen to the scale of the nuclear, including climate change and innovations in the life sciences. If we may once have believed that the end of days would come in a blaze of nuclear firestorm, we now suspect that the apocalypse may be much slower, creeping in as chemical toxins, climate change, or nano-technologies run amok. Taking inspiration from the questions raised by the Bulletin ' s synecdochical “ nuclear, ” Risk Criticism aims to generate a hybrid form of critical practice that brings “ nuclear criticism ” into conversation with ecocriticism. Through readings of novels, films, theater, poetry, visual art, websites, news reports, and essays, Risk Criticism tracks the diverse ways in which environmental risks are understood and represented today.
