### Field Guide to Eucalypts

The first of the five-part MEDORAN CHRONICLES offers a new slant on magical parallel worlds – it's Harry Potter meets X-Men, with a twist of Narnia. With just one step, 16-year-old Alex Jennings's world changes - literally. Dreading her first day at a new school, Alex is stunned when she walks through a doorway and finds herself stranded in Medora, a fantasy world full of impossibilities. Desperate to return home, she learns that only Professor Marselle can help her but he's missing. While waiting for him to reappear, Alex attends Akarnae Academy, Medora's boarding school for teenagers with extraordinary gifts. She soon starts to enjoy her bizarre new world and the friends who embrace her as one of their own, but strange things are happening at Akarnae, and Alex can't ignore her fear that something unexpected something sinister is looming. An unwilling pawn in a deadly game, Alex's shoulders bear the crushing weight of an entire race's survival. Only she can save the Medorans, but what if doing so prevents her from ever returning home? Will Alex risk her entire world and maybe even her life - to save Medora?

### The Devil's Cup

Laying hands upon the injured and dying, Avry of Kazan absorbs their wounds and diseases into herself. But rather than being honored for her skills, she is hunted. Healers like Avry are accused of spreading the plague that has decimated the Fifteen Realms, leaving the survivors in a state of chaos. Stressed and tired from hiding, Avry is abducted by a band of rogues who, shockingly, value her gift above the golden bounty offered for her capture. Their leader, an enigmatic captor-protector with powers of his own, is unequivocal in his demands: Avry must heal a plague-stricken prince—leader of a campaign against her people. As they traverse the daunting Nine Mountains, beset by mercenaries and magical dangers, Avry must decide who is worth healing and what is worth dying for. Because the price of peace may well be her life....

### On the Beach

Choose: A quick death. . . or a slow poison. . . About to be executed for murder, Yelena is offered an extraordinary reprieve. She`ll eat the best meals, have rooms in the palace - and risk assassination by anyone trying to kill the Commander of Ixia. And so Yelena chooses to become a food taster. But the chief of security, leaving nothing to chance, deliberately feeds her Butterfly`s Dust - and only by appearing for her daily antidote will she delay an agonising death from the poison. As Yelena tries to escape her new dilemma, disasters keep mounting. Rebels plot to seize Ixia and Yelena develops magical powers she can`t control. Her life is threatened again and choices must be made. But this time the outcomes aren`t so clear. . .

### **Sea Glass (The Glass Series, Book 2)**

### **Assassin Study**

This volume brings together four semi-autonomous bodies of research (choice, self-determination, self-regulation, and self-management) to form a new theory of self-engaged learning entitled, Self-Determined Learning Theory. This theory explains why and how students self-engage. It identifies the factors that give students the sense of control over their learning that is needed for sustained, adaptive, and ultimately successful learning. It begins by describing the characteristics of disengaged learners, then describes and illustrates self-determined learning theory within both normal and special populations. It then examines the theory's predictive value across several special population contexts and then concludes with a critique of the theory's credibility and worth. Divided into three sections--theory construction, theory verification, and theory evaluation--this volume is organized using the four steps of a previous book, *Learning to Theorize: A Four Step Strategy*. Step 1 defines a problem of not understanding something as discrepancy between what is known and not known about a circumstance. Step 2 searches for information and explanations to change the condition of not knowing into a condition of knowing. Step 3 evaluates the credibility and worth of the explanation constructed in Step 2. Step 4 adjusts existing beliefs so they are consistent with the new theory. Although aimed primarily at leaders in special education, it should also appeal to researchers and scholars in psychology, educational psychology, and school psychology who are interested in the applications of self-regulated learning theory--in this case to special populations.

### **Dawn Study**

This comparative study of industrial relations provides an analysis of a wide range of phenomena, with a view to uncovering the origins of national diversity. It takes into account the notion of strategic choice, set within a series of constraints of environment, organizational and institutional conditions and power relationships. The book: \* Covers a wide range of examples from the UK, USA, France, Germany Italy, Sweden, Eastern Europe, Latin America, India and Japan \* Includes a comprehensive analysis of management and employers' associations, labour and trades unions \* Examines the role of the state in comparative perspective

### **King Lear**

By 1979, we knew all that we know now about the science of climate change - what was happening, why it was happening, and how to stop it. Over the next ten years, we had the very real opportunity to stop it. Obviously, we failed. Nathaniel Rich's groundbreaking account of that failure - and how tantalizingly close we came to signing binding treaties that would have saved us all before the fossil fuels industry and politicians committed to anti-scientific denialism - is already a journalistic blockbuster, a full issue of the *New York Times Magazine* that has earned favorable comparisons to Rachel

Carson's *Silent Spring* and John Hersey's *Hiroshima*. Rich has become an instant, in-demand expert and speaker. A major movie deal is already in place. It is the story, perhaps, that can shift the conversation. In the book *Losing Earth*, Rich is able to provide more of the context for what did - and didn't - happen in the 1980s and, more important, is able to carry the story fully into the present day and wrestle with what those past failures mean for us in 2019. It is not just an agonizing revelation of historical missed opportunities, but a clear-eyed and eloquent assessment of how we got to now, and what we can and must do before it's truly too late.

### **Touch of Power**

Miss Ada Quicksilver, a student of London's Lovelace Academy for Promising Young Women, is spending her holiday in Ireland to pursue her anthropological study of fairies. She visits Dublin's absinthe bars to investigate a supposed association between the bittersweet spirit and fairy sightings. One night a handsome Irishman approaches her, introducing himself as Edward Donoghue. Edward takes absinthe to relieve his sleepwalking, and she is eager to hear whether he has experience with fairies. Instead, she discovers that he's the earl of Meath, and that he will soon visit a mysterious ruin at Newgrange on the orders of his cousin, the beautiful, half-mad Queen Isolde. On learning about Ada's area of study, he invites her to accompany him. Ada is torn between a sensible fear of becoming entangled with the clearly troubled gentleman and her compelling desire to ease his suffering. Finally she accepts his invitation, and they arrive in time for the winter solstice. That night, the secret of Edward's affliction is revealed: he is, in fact, a lord in two worlds and can no longer suppress his shadow self. Little does either of them realize that their blossoming friendship—and slowly kindling passion—will lead to discoveries that wrench open a door sealed for centuries, throwing them into a war that will change Ireland forever.

### **Self-determined Learning Theory**

As Yelena searches for the person whose poisoned arrow stripped her of her magic, Valek finds his job and life in danger as he attempts to broker peace in Ixia.

### **Ice Study**

From New York Times Bestselling Author Maria V. Snyder The apprenticeship is over—now the real test has begun. When word that Yelena is a Soulfinder—able to capture and release souls—spreads like wildfire, she faces mistrust and fear in Sitia. What's more, she keeps discovering new, unusual sides of her abilities. As the Council debates Yelena's fate, she receives a disturbing message: a plot is rising against her homeland, led by a murderous sorcerer she has defeated before... The road to Ixia is fraught with peril, and sets Yelena on a path that will test the limits of her skills. But the hope of reuniting with her beloved spurs her onward. Along the way, she'll encounter allies, enemies, lovers and would-be assassins, each of questionable loyalty, and be forced to confront an impossible choice as whispers of war emerge. Yelena will have but one chance to prove herself—and save the lands she holds dear. Previously published. Thinks because she is sure another man – now her prisoner – has switched souls with Ulrick.

## **The Study Series Bundle**

Powerful tragedy of an aging king, betrayed by his daughters, robbed of his kingdom, descending into madness. Perhaps the bleakest of Shakespeare's tragic dramas, complete with explanatory footnotes.

## **Storm Glass**

Australia is one of the few countries in the world which is generally associated with a single group of plants -- the eucalyptus. Eucalyptus is a huge genus including about 900 species and subspecies. More than 280 are described in this book which covers the whole of Queensland, the Northern Territory and Western Australia north of 26 latitude. Volume 3 has been extensively revised, updated and expanded following the first edition published in 1994 Northern Australia provides a different set of environments from the southern regions of the continent. The northern part of all three states has a tropical climate with a long dry season followed by a short summer wet season. Descriptions have full colour illustrations of the tree, bark, buds and fruit and the botanical terms are explained and illustrated. Field Guide to Eucalyptus Volumes 1, 2 and 3 form the most authoritative reference to all species of eucalyptus in Australia.

## **Connectivity Hypothesis, The**

Choose: a quick death... or slow poison... Locked deep in the palace dungeon for killing her abuser, Yelena knows she'll never be free again. The laws in Ixia are strict, and murderers must be executed, no matter the reason. But just as she's resigned herself to her fate, she's offered an extraordinary reprieve. As the food taster, Yelena will eat the best meals, have rooms in the palace — and risk assassination by anyone trying to kill the Commander of Ixia. To make matters worse, the chief of security deliberately feeds her Butterfly's Dust, and only by appearing for her daily antidote will she delay an agonizing death from the poison. As Yelena tries to escape her new dilemma, disasters keep mounting. Rebels plot to seize Ixia and Yelena develops magical powers she can't control. ## **First Signals**

Allen's insatiable, unquenchable curiosity drives him to explore coffee's catalytic effect upon world empires and mankind itself.

### **Spy Glass**

With her greatest enemy dead, and on her way to be reunited with the family she'd been stolen from long ago, Yelena should be pleased. But though she has gained her freedom, she can't help feeling isolated in Sitia. Her Ixian background has changed her in many ways—and her newfound friends and relatives don't think it's for the better.... Despite the turmoil, she's eager to start her magic training—especially as she's been given one year to harness her power or be put to death. But her plans take a radical turn when she becomes involved with a plot to reclaim Ixia's throne for a lost prince—and gets entangled in powerful rivalries with her fellow magicians. If that wasn't bad enough, it appears her brother would love to see her dead. Luckily, Yelena has some old friends to help her with all her new enemies....

### **Akarnae**

“Only women and inferior men are difficult to deal with.” — Confucius Two thousand years after Confucius, the contributors to this book ask if Chinese women have succeeded in changing their status as the equivalent of “inferior men.” *Gender and Sexuality in Twentieth-Century Chinese Literature and Society* approaches the role of women in social change through analyzing literature and culture during the May Fourth and the Post-Cultural Revolution periods.

### **Shadow Study**

New York Times bestselling author Maria Snyder returns with a compelling new sci-fi series. Perfect for fans of Star Wars and Poison Study. Year 2471. A new discovery. Those three words thrill my parents – the galaxy's leading archaeologists – but for me, it means another time jump to a different planet. One so big, my friends will be older than my dad when we arrive. And I'll still be seventeen. Thanks, Einstein. I really can't blame Einstein, though. No one expected to find life-sized terracotta warriors buried on other planets. So off we go to investigate, traveling through space and time. With my social life in

ruins, I fill my days illegally worming into the quantum net – the invention that allows us to travel in space. Of course the only person close to my age is a hot-but-pain-in-the-neck security officer who threatens to throw me into the brig. But when one of the warrior planets goes silent, we have bigger problems on our hands. The planet's entire population might be dead. And now my worming skills, along with a translation of an ancient alien artefact, might be the key to finding out why. But my attempts to uncover the truth lead to the discovery of a deadly new alien phenomenon, and also alert those who wish to keep it quiet. The galaxy is in real danger and time is not on our side... A page-turning story of courage and determination in the face of the unknown. 'Smart, witty and full of heart, Navigating the Stars had me hooked from the very first page!' – Lynette Noni, bestselling author of Whisper & The Medoran Chronicles

Year 2522. ?Oh. My. Stars. Junior Officer Ara Lawrence here, reporting for duty. Again. It's situation critical for the security team and everyone in the base - including my parents - with a new attack from the looters imminent, a possible galaxy-wide crime conspiracy and an unstoppable alien threat. But this all pales in the face of my mind-blowing discovery about the Q-net. Of course, no one believes me. I'm not sure I believe me. It could just be a stress-induced delusion. That's what my parents seem to believe Their concern for me is hampering my ability to do my job. I know they love me, but with the Q-net in my corner, I'm the only one who can help the security team beat the shadowy aliens from the pits we discovered. We're holding them at bay, for now, but the entire Milky Way Galaxy is in danger of being overrun. With battles on too many fronts, it's looking dire. But one thing I've learned is when people I love are in jeopardy, I'll never give up trying to save them. Not until my dying breath. Which could very well be today

### **Gender and Sexuality in Twentieth-Century Chinese Literature and Society**

"On the Beach" is a 1957 post-apocalyptic novel written by British-Australian author Nevil Shute after he emigrated to Australia. The novel details the experiences of a mixed group of people in Melbourne as they await the arrival of deadly radiation spreading towards them from the northern hemisphere

following a nuclear war a year previously. As the radiation approaches each person deals with their impending death in different ways.

### **Magic Study**

The enormous recent success of molecular developmental biology has yielded a vast amount of new information on the details of development. So much so that we risk losing sight of the underlying principles that apply to all development. To cut through this thicket, John Tyler Bonner ponders a moment in evolution when development was at its most basic--the moment when signaling between cells began. Although multicellularity arose numerous times, most of those events happened many millions of years ago. Many of the details of development that we see today, even in simple organisms, accrued over a long evolutionary timeline, and the initial events are obscured. The relatively uncomplicated and easy-to-grow cellular slime molds offer a unique opportunity to analyze development at a primitive stage and perhaps gain insight into how early multicellular development might have started. Through slime molds, Bonner seeks a picture of the first elements of communication between cells. He asks what we have learned by looking at their developmental biology, including recent advances in our molecular understanding of the process. He then asks what is the most elementary way that polarity and pattern formation can be achieved. To find the answer, he uses models, including mathematical ones, to generate insights into how cell-to-cell cooperation might have originated. Students and scholars in the blossoming field of the evolution of development, as well as evolutionary biologists generally, will be interested in what Bonner has to say about the origins of multicellular development--and thus of the astounding biological complexity we now observe--and how best to study it.
