## Game Theory, Alive

Transgender studies is the latest area of academic inquiry to grow out of the exciting nexus of queer theory, feminist studies, and the history of sexuality. Because transpeople challenge our most fundamental assumptions about the relationship between bodies, desire, and identity, the field is both fascinating and contentious. The Transgender Studies Reader puts between two covers fifty influential texts with new introductions by the editors that, taken together, document the evolution of transgender studies in the English-speaking world. By bringing together the voices and experience of transgender individuals, doctors, psychologists and academically-based theorists, this volume will be a foundational text for the transgender community, transgender studies, and related queer theory.

## Dirty Deeds

These twenty-two short stories are measured out with a cup of normal and a pound of the fantastic. From dark fairytales to alien skies, Monk's stories blend haunting yesterdays, forgotten todays and twisted tomorrows wherein: A normal little girl in a

city made of gears, takes on the world to save a toy. A normal ancient monster living in Seattle, must decide if love is worth trusting a hero A normal patchwork woman and her two-headed boyfriend stitch their life and farm together with needle, thread, and time a normal vampire in a knitting shop must face sun-drenched secrets a normal snow creature's wish changes a mad man's life a normal man breaks reality with a hamster and yes, a normal little robot, defines how extraordinary friendship can be. Poignant, bittersweet, frightening, and funny, these stories pour out worlds that are both lovely and odd, darkly strange and tantalizingly familiar, where no matter how fantastic the setting or situation, love, freedom, and hope find a way to take root and thrive."

### Rock, Paper, Scissors

Winner of the World Fantasy Award: New twists on classic fairy tales from Neil Gaiman, Patricia Briggs, Robin McKinley, Caitlín R. Kiernan, and more. Long ago, when we were children, our dreams were inspired by the fairy tales we heard at our mothers' and grandmothers' knees—stories of princesses and princes and witches and wondrous enchantments, by the

Brothers Grimm and Hans Christian Andersen, and from the pages of 1001 Arabian Nights. But, as World Fantasy Award – winning editors Ellen Datlow and Terri Windling remind us, these stories were often tamed and sanitized versions. The originals were frequently darker—and in *Silver Birch*, *Blood Moon*, they turn darker still. Twenty-one modern Grimms and Andersens—masterful storytellers including Neil Gaiman, Nancy Kress, and Tanith Lee—now reinvent beloved bedtime stories for our time. The Sea Witch gets her say, relating the story of “The Little Mermaid” from her own point of view. “Thumbelina” becomes a tale of creeping horror, while a delightfully naughty spin is put on “The Emperor’s New Clothes.” Author Caitlín R. Kiernan transports Snow White to a dark, gritty, industrial urban setting, and Patricia Briggs details “The Price” of dealing with a royal and unrepentantly evil Rumpelstiltskin. Rich, provocative, and unabashedly adult, each of these tales is a modern treasure, reminding us that wishes have consequences and not all genies have our best interests at heart.

### Peony in Love

Start anywhere—preferably at the beginning—and see how one young woman’s alphabetized existence can open up and define the world in new and unexpected ways. An ordinary life, perhaps, but an extraordinary book. From the Hardcover edition.

## Kabbalah, Magic, and the Great Work of Self-transformation

"For me, making art is a ritualistic process bound up in observations of the material world. It speaks to my desire to interpret the world around me. How can spaces we consider "ordinary" allow an opportunity for transcendence? Can imagining a space or object from the point of view of a tree or forest animal, ruin/rune, or rock allow for a hidden world to filter through? Can we imagine the rituals that may have taken place in a particular location? I believe that our imaginations can offer an alternative perspective on what our conditioned minds tell us is real. By accepting the notion that magic exists all around, that the ordinary is actually extraordinary, we may connect to something greater than ourselves. I identify this as an illusory goal; a gesture of

hope." -- Page 4.

## Waylaid

Derek Jarman was the most important independent filmmaker in England during the 1980s. Using emblems and symbols in associative contexts, rather than conventional, cause-and-effect narrative, he created films noteworthy for their lyricism and poetic feeling and for their exploration of the gay experience. His style of filmmaking also links Jarman with other prominent directors of lyric film, including Pier Paolo Pasolini, Andrei Tarkovsky, Jean Cocteau, and Jean Genet. This pathfinding book places Derek Jarman in the tradition of lyric film and offers incisive readings of all eleven of his feature-length films, from *Sebastiane* to *Blue*. Steven Dillon looks at Jarman and other directors working in a similar vein to establish how lyric films are composed through the use of visual imagery and actual poetry. He then traces Jarman's use of imagery (notably mirrors and the sea) in his films and discusses in detail the relationship between cinematic representations and sexual identity. This insightful reading of Jarman's work helps us better understand how films such as *The Last of England* and *The Garden* can be said to cohere and mean without being reduced to clear messages. Above all, Dillon's book reveals how truly beautiful and brilliant Jarman's movies are.

### Crossroads and Other Tales of Valdemar

The first English-language collection of a contemporary Russian master of the short story. Maxim Osipov, who lives and practices medicine in a town ninety miles outside Moscow, is one of Russia’s best contemporary writers. In the tradition of Anton Chekhov and William Carlos Williams, he draws on his experiences in medicine to write stories of great subtlety and striking insight. Osipov’s fiction presents a nuanced, collage-like portrait of life in provincial Russia—its tragedies, frustrations, and moments of humble beauty and inspiration. The twelve stories in this volume depict doctors, actors, screenwriters, teachers, entrepreneurs, local political bosses, and common criminals whose paths intersect in unpredictable yet entirely natural ways: in sickrooms, classrooms, administrative offices and on trains and in planes. Their encounters lead to disasters, major and minor epiphanies, and—on occasion—the promise of redemption.

### Encyclopedia of an Ordinary Life

### The Transgender Studies Reader

We live in a highly connected world with multiple self-interested agents interacting and myriad opportunities for conflict and cooperation. The goal of game theory is to understand these opportunities. This book presents a rigorous introduction to the mathematics of game theory without losing sight of the joy of the subject. This is done by focusing on theoretical highlights (e.g., at least six Nobel Prize winning results are developed from scratch) and by presenting exciting connections of game theory to other fields such as computer science (algorithmic game theory), economics (auctions and matching markets), social choice (voting theory), biology (signaling and evolutionary stability), and learning theory. Both classical topics, such as zero-

sum games, and modern topics, such as sponsored search auctions, are covered. Along the way, beautiful mathematical tools used in game theory are introduced, including convexity, fixed-point theorems, and probabilistic arguments. The book is appropriate for a first course in game theory at either the undergraduate or graduate level, whether in mathematics, economics, computer science, or statistics. The importance of game-theoretic thinking transcends the academic setting—for every action we take, we must consider not only its direct effects, but also how it influences the incentives of others.
