However, it is not. The truth is that anyone can suddenly find themselves in a situation where their usual sources of food and drink have vanished and they need to use their wits to survive. If it is likely that a rescue party will be sent out to look for you then it is advisable to stay as close as possible to your last known position. However, if this is not practical or there is unlikely to be a rescue party you will need to keep moving. Surprisingly speed is not the most important factor, caution is! You are in a situation where

everything you do could be life threatening. In this situation it is important to remain calm and consider each issue as they arise. There are three key areas to surviving and returning to civilization: Finding a place to shelter for the night. There are several options and your best choice will depend upon the situation you find yourself in and whether you need to find your own way to civilization or wait for a rescue party to find you. Locating adequate supplies of food and water. This may appear to be difficult but it is certainly not impossible! When surviving in the wild you will need to consider food sources that you would not normally find appealing; such as grubs. Finally, you need to know how to navigate home and a few other essential tips which will help you to survive and flourish in the wild. ## Collins Gem SAS Survival Guide

It is difficult to imagine how anyone would enter into a polar or mountainous region unprepared. You're prepared for your journey or you arrive by accident; for example, the aircraft you are traveling in has crash-landed over the frozen tundra, or your mode of transport has broken down in the wilderness. In all cases, providing you are uninjured, your chances of survival are good. Planned travel in a cold or mountainous environment should mean that you are well clothed and equipped. In both winter and summer, the Northern Arctic offers an abundant supply of water and food; shelter can be found or constructed above and below the tree line. The real threat comes from the cold, injury, and simply doing nothing. During the Second World War a number of service men became marooned in the arctic wasteland—most of them died. They did so because few ventured far from their crash site, they made no attempt to catch fish, hunt game, or even attempt to travel south. None that were later found had prepared a rescue signal, and most had died not from the cold but from starvation. The SAS Guide to Arctic and Mountain Survival provides details on what to do immediately after your arctic or mountain survival situation has arisen. You will learn how to prepare a shelter, especially on a barren landscape. You will learn how make a fire in the cold and wind, as well as how to find and cook food. This guide provides detailed instructions on navigation, how and when to travel, and how to prepare signal fires that will help speed up your rescue.

John "Lofty" Wiseman is the author of the bestselling SAS Survival Handbook, the definitive guide to survival in the wild from Britain's Special Air Service. Now he has compiled the complete guide to surviving among crowds of people, the mazes of office buildings, the dangers of an unfeeling city—put simply, how to stay safe in the urban jungle. Thousands of preventable fatalities occur in the home every year—more than on the roads, more than in the great outdoors. Household chemicals, electricity, cooking knives, and rodent poisons—in the wrong hands and with improper usage, these day-to-day resources bring danger to your home. Add to this the risks of moving through city streets (the threat of rape, muggings, and gang violence) and the menace of natural disasters (floods, earthquakes, blizzards) that cannot be avoided. Every day serves as a constant reminder: The world is truly a frightening place. The SAS Urban Survival Guide advises readers to think practically about urban environments and offers tips and instructions on how to avoid hazards wherever one goes. From self-defense techniques to home security systems to coping with natural disasters, this book teaches readers to recognize danger, make quick decisions, and live confidently in the modern world.

illnesses, fractures, snake bites, and more. From Dr. Joe Alton and Amy Alton ARNP comes an updated edition of their bestseller *The Survival Medicine Handbook*. This unique medical book is meant to enable the average person to handle injuries and illness in situations in which modern medical facilities and professionals aren't available due to a disaster. This book is written by America's top medical preparedness experts: Joe Alton, MD, and Amy Alton, ARNP. Their mission: to put a medically prepared person in every family for when medical help is not on the way. Using decades of medical experience, they address, in plain language, dozens of medical issues associated with surviving disasters and epidemics. The Altons also discuss the medical supplies needed to become a medical asset to your family and community as well as alternative and natural strategies for when pharmaceuticals aren't available. Topics include: Appendicitis and Conditions that Mimic It Urinary Tract Infections Mosquito-Borne Illnesses Allergic Reactions and Anaphylaxis Head Injuries Animal Bites Snake Bites Head injuries Kidney Stones Dislocations and Fractures Nosebleeds Pain Medications and Natural Pain Relief And much much more! Most medical books will send you to the doctor or hospital when an emergency happens. The Altons assume that the worst might actually happen—that the average person could be left without medical help in a disaster. With their book, you can keep your family healthy in times of trouble.

Disaster survival: How to react in the face of increasingly frequent natural disasters and hostile situations—and how to survive at home if all services and supplies are cut off.

## Operation Lavivrus

When we think of jungles, we often think of a densely forested area with thick foliage; this is what is known as a primary jungle. But jungles can also include swamps, grasslands, and cultivated areas. Primary jungles can fall into the category of either a tropical rain forest or a deciduous forest, depending on the types of trees and plants found growing there. A tropical rain forest is typified by having tall trees whose upper branches interlock to form canopies. Yet of all the environments in which man has to survive, the jungle offers the best chance. The SAS have operated in the jungle for years, sometimes staying in the forest for months at a time. They developed a technique whereby they had two sets of clothing, one for daytime use and one for night. Just before they went to sleep they would change from

their wet clothing, which was normally hung under the shelter to dry out. In the morning they would change from their dry clothing and put on the wet. It is an uncomfortable change, but one that guaranteed a good night's sleep in dry clothing. The SAS Guide to Jungle Survival will teach the reader to come to terms with the jungle environment, understand it, and work with it as opposed to "fighting it." The jungle forest can provide shelter, food, and water in abundance, and this book will show you how. If the jungle offers any problems, it is with disease and wild animals; The SAS Guide to Jungle Survival will show you how to avoid and resist both and come out alive.
