### Outdoor Leadership

Covers basic dog training as well as advanced rescue training, discusses handler standards, and explains how a search is actually conducted

### Thrust for Educational Leadership

Published by the Boy Scouts of America for all BSA registered adult volunteers and professionals, Scouting magazine offers editorial content that is a mixture of information, instruction, and inspiration, designed to strengthen readers' abilities to better perform their leadership roles in Scouting and also to assist them as parents in strengthening families.

### Documents

Through Effective Leadership in Adventure Programming, Second Edition, readers will enhance their understanding of this rapidly growing profession. The authors provide in-depth descriptions and real world applications of the technical, organizational, instructional, and facilitative skills that are essential to adventure leadership. They also identify what they call the metaskills that superior leaders use to combine the other essential skills seamlessly and effectively.

### Official Manual, State of Missouri

For more than a half century, the Guide to the Evaluation of Educational Experiences in the Armed Services has been the standard reference work for recognizing learning acquired in military life. Since 1942, ACE and has worked cooperatively with the US Department of Defense, the Armed Services, and the US Coast Guard in helping hundreds of thousands of individuals earn academic credit

for learning achieved while serving their country.

## **Space-enhancing Technological Leadership**

Discursive Leadership: In Conversation with Leadership Psychology presents a new, groundbreaking way for scholars and graduate students to examine and explore leadership. Differing from a psychological approach to leadership which tries to get inside the heads of leaders and employees, author Gail Fairhurst focuses on the social or communicative aspects between them. A discursive approach to leadership introduces a host of relatively new ideas and concepts and helps us understand leadership's changing role in organizations.

Search and Rescue Leadership This text teaches the crew leader to become an effective and efficient searcher and leader. It covers topics such as leadership styles, characteristics of a good leader, and practices which encourage effective team participation in the management of various resources. Topics include: command structure and integration, safety practices, map reading and navigation, search tactics, and the study of lost person behavior. It explains random traveling choices of a lost person, in addition to behaviors such as route and direction sampling. This text provides an overview of hazardous terrain, search practices, search probability, applicable reports, and the calculation of POD and POS. In addition, practices using specially trained canines and equines, as well as air operations, urban search, SAR rescue practices and stress management is discussed, in addition to a variety of other related topics. Written by active searches with over a thousand missions under their belt, this text is a must-read for team managers and those participating in search and rescue missions.

## **Fieldbook**

This is an essential resource for all outdoor programming agencies and leaders. Glenda Hanna examines relevant negligence law as it is applied in Canada courts of law and identifies the legally defined responsibilities of program administrators, leaders, and participants.

## **National Search and Rescue Manual**

The book covers these competencies in a real-world context. Chapter-opening stories provide a framework for the chapter content, and learning activities and

numerous examples from North America help you apply that theory and master each competency. In addition, you will be guided through a series of activities in developing and showcasing leadership abilities through a culminating professional development portfolio.

## **Fire and Rescue Services**

Budgetary, political, and organizational changes left the USAF unprepared for the combat search and rescue (CSAR) mission going into Desert Storm. Colonel Whitcomb relates his and others' experiences from CSAR in Southeast Asia and examines the organization that was established to provide CSAR services in the Iraq-Kuwait theater of operations. He traces each incident from beginning to end along with the tactical and sometimes strategic implications. Scores of interviews, e-mails, and published works provide a compendium of lessons learned and recommendations gleaned from those who flew the missions and made the decisions in Iraq.

Training that works by harnessing your dog's instincts. Learn how to: Stimulate your dog's natural hunting drive for effective SAR training. Start your dog's training program with an easy, three-step process. Develop skills in a variety of search operations, including wilderness, avalanche and disaster scenarios. Dr. Resi Gerritsen and Ruud Haak have trained search and rescue dogs for more than 30 years and have taken part in rescue operations around the world. They serve as training directors and international judges for the International Red Cross Federation, the United Nations, the International Rescue Dog Organization and the Fédération Cynologique Internationale (FCI). Based on their decades of study and experience, their innovative SAR training method is rooted in a firm, scientific understanding of K9 instincts. Step-by-step instructions, dozens of illustrations and photographs from the field establish a professional K9 SAR program to benefit both beginners and experts. Get a free ebook through the Shelfie app with the purchase of a print copy.

## **Outdoor Leadership Competency**

This unique text fills a major gap in the emergency services literature by surveying the research on fire and rescue service management in the UK. An extensive evidence base focuses on organizational culture, leadership skills, standards, and accountability, emphasizing the services' dual roles as first responders and guardians of public safety and prevention. The implications for international public health and safety programs are made clear as the services' recent history illustrates the complex challenges typical of functioning within local and national political contexts. Chapters take on a broad range of management, leadership, service delivery, and staffing concerns, including:

- Evolution and adaptation of fire and rescue services during periods of expansion and austerity.
- Civil protection as a local and national priority.
- Structural issues: assessments and improvements, collaborations with other services.
- Emerging social concerns: diversity, gender equality, the aging worker population.
- The concepts and consequences of heroes and heroism.
- Future directions for governance, transparency, and accountability.

Fire and Rescue Services complements the earlier volumes in the Leadership & Management of Emergency Services series with equal parts realism and vision. It should interest a wide audience of public policymakers, public managers, and emergency service personnel, as well as academics and researchers.

### **Appalachia**

Five years after the publication of Leadership, America's mayor, Rudolph Giuliani, enhances his extraordinary bestseller with a new introduction. Asserting his trademark beliefs in accountability, resistance to bullies, and the importance of national optimism, Giuliani offers his practical, common sense perspective on problems ranging from education to the environment, the war on terror to immigration

### **Outdoor Pursuits Programming**

Could U.S. Navy officers be better prepared to become flag officers? This study examines the kinds of expertise required for successful performance in Navy flag billets, and whether recent pools of officers possess this experience. The authors also examine Navy trends over the past decade to identify the types of expertise likely to become more important for Navy leaders in the future.

## **The 2004 Guide to the Evaluation of Educational Experiences in the Armed Services**

Quickly and decisively manage any medical emergency you encounter in the great outdoors with Wilderness Medicine! World-renowned authority and author, Dr. Paul Auerbach, and a team of experts offer proven, practical, visual guidance for effectively diagnosing and treating the full range of emergencies and health problems encountered in situations where time and resources are scarce. Every day, more and more people are venturing into the wilderness and extreme environments, or are victims of horrific natural disasters and many are unprepared for the dangers and aftermath that come with these episodes. Whether these victims are stranded on mountaintops, lost in the desert, injured on a remote bike path, or ill far out at sea, this indispensable resource--now with online access at [www.expertconsult.com](http://www.expertconsult.com) for greater accessibility and portability-- equips rescuers and health care professionals to effectively address and prevent injury and illness in the wilderness! This textbook is widely referred to as "The Bible of Wilderness Medicine." Be able to practice emergency medicine outside of the traditional hospital/clinical setting whether you are in remote environments, underdeveloped but highly populated areas, or disaster areas, are part of search and rescue operations, or dealing with casualties from episodes of extreme sports and active lifestyle activities. Face any medical challenge in the wilderness with expert guidance: Dr. Auerbach is a noted author and the world's leading authority on wilderness medicine. He is a founder and Past President of the Wilderness Medical Society, consultant to the Divers Alert Network and many other agencies and organizations, and a member of the National Medical Committee for the National Ski Patrol System. Handle everything from frostbite to infection by marine microbes, not to mention other diverse injuries, bites, stings, poisonous plant exposures, animal attacks, and natural disasters. Grasp the essential aspects of search and rescue. Respond quickly and effectively by improvising with available materials. Improve your competency and readiness with the latest guidance on volcanic eruptions, extreme sports, splints and slings, wilderness cardiology, living off the land, aerospace medicine, mental health in the wilderness, tactical combat casualty care, and much more. Meet the needs and special considerations of specific patient populations such as children, women, elders, persons with chronic medical conditions, and the disabled. Make smart decisions about gear, navigation, nutrition, and survival. Be prepared for everything with expanded coverage on topics such as high altitude, cold water immersion, and poisonous and venomous plants and animals. Get the skills you need now with new information on global humanitarian relief and expedition medicine, plus expanded coverage of injury prevention and environmental preservation. Get guidance on the go with fully searchable online text, plus bonus images, tables and video clips - all available on [ExpertConsult.com](http://ExpertConsult.com).

## **The Air Coordinating Committee's Search and Rescue Program**

Training and certification for Seafarers has been founded on technical aspects, but maybe the most important thing to do aboard a ship is dealing with people. This book, written with seamen in mind, covers areas of expertise that every officer should know to improve motivation, engagement, teamwork, and conflict handling; in short, to be a leader. This book also covers the new requirements for every officer or merchant marine and can be used in courses on this topic. It focuses on seafarers' needs and the language used, avoiding the excessive use of psychological terms, yet keeping the accuracy. Features Covers new requirements for every Merchant Marine Officer Written for and by a seaman, with the accuracy of a psychologist Presents knowledge on how to improve motivation, engagement, teamwork, and conflict handling Includes how to manage people in emergency situations and avoid the loss of lives, like the disaster of Costa Concordia and Estonia

## **Antarctic**

Mandate for Leadership is a series of books published by The Heritage Foundation, an American conservative think-tank based in Washington, D.C. They are intended to serve as guidelines for reducing the size and scope of the federal government through specific policy recommendations. The books have traditionally been released to coincide with an incoming U.S. presidential administration, starting with the Reagan administration in 1981. The latest edition was published in 2005.

## **House of Commons Debates**

## **Leadership in Recreation and Leisure Service Organizations**

Rescuing wild animals in distress requires a unique set of skills, very different from those used in handling domestic animals. The equipment, degree of handling, the type of caging and level of care a wild animal receives can mean the difference between life and death. Wildlife Search and Rescue is a comprehensive guide on 'best practices' and suggested standards for response to sick, injured and orphaned wildlife. This valuable resource covers the fundamentals of wildlife rescue, from 'phone to field', including safe and successful capture strategies, handling and restraint techniques and initial aid. Wildlife Search and Rescue is a must have for anyone interested in knowing what to do when they are face to face with a wild animal in need, or for anyone involved in animal rescue. While the book focuses on wildlife native to North America, much of the information and many of the techniques are applicable to other species, including domestic dogs and cats. Visit [www.wiley.com/go/dmytryk/wildlifeemergency](http://www.wiley.com/go/dmytryk/wildlifeemergency) to access the figures from the book.

## **Scouting**

Fully revised and rewritten, this second edition is the new authority on every aspect of avalanches, their formation, and their effects. The extensive text and

illustrations are technical, yet accessible, and include the latest information, techniques, and research on understanding and surviving avalanches.
