It's Not About the Technology is about a phenomenon most dreaded by high-technology industry executives: a failure at the execution

leading to a missed market window. High-tech executives agree that a critical factor that drives the company to such a failure is the breakdown of interaction between marketing and engineering. This book is predicated on the notion that the success of execution lies neither in the technology nor in the market strategy. On the contrary, it is shaped by the context of an individual, whether an engineer or a marketer. From this viewpoint, successful execution in a high-tech company is manifest in a confluence of 3 contexts: the technological, the customer and the economic contexts. This book tackles the big questions of how to develop the basic craft of the thinking required in high-tech companies. Drawing from basic economic principles and practical experience in the semiconductor business, it breaks new ground in our understanding of the complexities of high-tech execution.

Praise for EMAIL MARKETING by the NUM8ERS "At last—a book that marketers can use to gain real respect from CFOs and CEOs who care about the bottom line. Baggott, author of the award-winning blog 'Email Marketing Best Practices,' clearly explains how to make your campaigns perform measurably better. The secret's in your test results." —Anne Holland, President, MarketingSherpa "Despite its proven power, email marketing receives a fraction of the attention given to other, fancier media. You can help correct this imbalance by reading this book." —Rory Sutherland, Vice Chairman, Ogilvy Group, London, UK "Baggott's wonderful new direct marketing book is loaded with practical advice and recommendations from some of the best minds in the industry. where many would think there would not be a lot of collecting possible but I found that not to be true. There is a link between collecting an addiction but is is just the thrill of finding each and every piece that you can. For years I seldom sold a piece but when I did I found that same thrill for the second time. It was not unusual to sell a piece for four or five times what I had paid. From my history loving family I have had a lot of help as they will often tell me what they have seen so that I can go back and make a deal on it. My wife now goes out once or twice a week to help me and often ended up selling as well. The selling part is important as it enables me to collect pieces I would never sell without taking away money from our family budget. It has become a lifestyle which has goes into everyday life as well as I try to get the best deal on everything. Now if I could only bargain on the gas bill or the water bill my life would be complete.

There are a million stories and reasons why people do the things that they do online. For me, my story begins with the color fuchsia. I thought to myself, This is not evil, it is my balance. Then it came to me the name of the Web site. I whispered it quietly to myself, saying the name out loud for the first time as I typed it into the address bar and hit Search. Little did I know as I entered the pretty fuchsia site that this was my first of many visits to hell.

The Edwardian period experienced a particularly vibrant periodical culture, with phenomenal growth in the numbers of titles published that were either aimed specifically at women, or else saw women as a key section of their readership or contributor group. It was an era of political ferment in which a number of 'progressive' traditions were formulated, shaped or abandoned, including socialism, feminism, modernism, empire politics, trade unionism and welfarism. Organized around some of the central themes of political thought and utopian thinking, this impressive collection gathers together classic articles from key periodicals. The set presents a comprehensive sourcebook of readings on Edwardian/Progressive era feminist thought, exploring the intervention of the radical public intellectuals working in these traditions in North America and the UK from 1900-1918.
