Her book, Sunscreens – Biohazard: Treat as Hazardous Waste, provides extensive evidence of the dangers of sunscreens and their negative effect on the environment. At a recent presentation at the Cancer Control Society Conference in Hollywood, California, Dr. Plourde explained why this is so. According to her research, many sunscreens only protect against UVB rays.

My new book, Sunscreens—Biohazard II: Proof of Toxicity Keeps Piling Up, will describe numerous ways in which sunscreens are affecting all life on the planet. Topics include ecological harm; swimming pools as toxic chemical dumps; synergistic toxicity of sunscreen chemicals and other chemicals; sunscreen chemicals' generational toxicity (comparable to that of DDT); sunscreen chemicals in the fish we eat; sunscreens' ability to breach the body's protective barriers; and the role of

Reviews. Nexus Article. As Heard on George Noory's Coast to Coast AM. Sunscreen chemicals HARM humans, fish, and coral. We have been told the sun is harmful and we need to protect our skin from its rays. Yet, the chemicals used in sunscreens are not only more harmful to us than the sun, they are harmful to all water life that are bathed in the washed off sunscreens.

The endocrine-disrupting chemicals that make up these sunscreens can play havoc with cell division and cause cancer, chronic illnesses, autism and other neurological problems. Not only that, they can prevent the uptake of vitamin D, which is essential to our health and is best absorbed through sunscreen-free sunlight exposure in short bursts at the right time of day.
