only when things go wrong that you are suddenly faced with life and death survival situation. Therefore, you want to plan for the unexpected. Before you set off into the woods, take the time to go through all contingencies. Disasters often don't come with advance notice, nor does it send you any early warning signs. So learning how to survive in the wilderness can truly save you and your family's life. After started hiking, backpacking and camping out for many years in 17 different countries, I have mastered the art of survival in the woods. Because I have done it for so long, and I will tell you, it was a 'learn as I go' process for me. But for you, it may not be that easy. Why may you ask? What if there is a severe natural or man-made disaster happens suddenly, what if a war breaks out? Would you be ready? I have been teaching hiking, camping, and backpacking for many years throughout many countries, but only within the last three years, a group of people in Columbia asked me to teach them survival tactics in the woods. That question opened my mind and eyes wide open; I knew why they had asked me to teach them, but what if similar civil and or political unrest or war breaks out in our country, how many of us would be ready? More importantly how many of us would actually survive? I believe every one of us needs to know at least the basics of wilderness survival like what bushcraft skills you need, what bushcraft gears and supplies you will require along with how to navigate yourself in the wilderness. This way if you ever need it, you will have the knowledge. Along with the knowledge, let's make a survival pack ready just in case. In that pack, we can put a few necessary gears, and few "must have."s. Once you do these two things (first gather the basic knowledge of survival, second get the emergency pack ready), I believe you will sleep better at night. how do you defend yourself against others who have not prepared for such a disaster? After the Crash covers all the situations that you may face when the lack of governmental infrastructure leads to social upheaval and chaos. Since most of the population is unprepared for a disaster of any kind, this book gives both the trained and untrained prepper valuable information needed to have any chance of survival in a world where organized government assistance may not be available. Importantly, he details the crucial steps you need to take in addition to doing everything other survival manuals advise. These critical tips go beyond stockpiling food, water, and weapons. The basis of adequate prepping is being prepared for both common and dire events that may occur under the worst of all possible circumstances. These circumstances might include the breakdown in normal emergency support services (such as calling 911), the lack of an ability to obtain additional supplies, and the probability that you will not be able to rely on anyone but members of your immediate group or yourself. Prepping requires forethought with regard to food, water supplies, power, and protection – all areas of significant technical preparation. Self-reliant medical care is no exception. This book provides the basis of prevention, identification, and long-term management of survivable medical conditions and can be performed with minimal training. It helps you identify sources of materials you will need and should stock-pile, it discusses storage issues, and directs you to sources for more complex procedures that require advanced concepts of field-expedient techniques used by trained medical persons such as surgeons, anesthesiologists, dentists, or midwives and obstetricians.

more. From Dr. Joe Alton and Amy Alton ARNP comes an updated edition of their bestseller *The Survival Medicine Handbook*. This unique medical book is meant to enable the average person to handle injuries and illness in situations in which modern medical facilities and professionals aren't available due to a disaster. This book is written by America's top medical preparedness experts: Joe Alton, MD, and Amy Alton, ARNP. Their mission: to put a medically prepared person in every family for when medical help is not on the way. Using decades of medical experience, they address, in plain language, dozens of medical issues associated with surviving disasters and epidemics. The Altons also discuss the medical supplies needed to become a medical asset to your family and community as well as alternative and natural strategies for when pharmaceuticals aren't available. Topics include:

- Appendicitis and Conditions that Mimic It
- Urinary Tract Infections
- Mosquito-Borne Illnesses
- Allergic Reactions and Anaphylaxis
- Head Injuries
- Animal Bites
- Snake Bites
- Head injuries
- Kidney Stones
- Dislocations and Fractures
- Nosebleeds
- Pain Medications and Natural Pain Relief
- And much much more!

Most medical books will send you to the doctor or hospital when an emergency happens. The Altons assume that the worst might actually happen—that the average person could be left without medical help in a disaster. With their book, you can keep your family healthy in times of trouble.
