Report of the Commissioner of Education Made to the Secretary of the Interior for the Year with Accompanying Papers

History of New York State's Catskill Park (established 1904) and the Catskill Forest Preserve (established 1885), one of the earliest experiments in environmental conservation in the United States, wherein wildlands coexist with private property within the blue line of the Catskill Park. Illustrated with 32 pages of color photographs and more than 70 historical & contemporary B&W photographs, and including the Carpenter Report, an 1886 inventory of the Catskill

Mtns., including its streams and rivers, game, forests & industry.

Agricultural History

A study of the colorful history and legends of the Catskills provides insight into the forces that have influenced its development

Teaching Landscape Architectural History

The Civilian Conservation Corps (CCC), Franklin D. Roosevelt's New Deal program to help young, unemployed men during the Great Depression by hiring them to work in a mammoth "forest army," completed thousands of vital conservation projects nationwide. They were paid just \$30 a month—a dollar a day. In the Catskills, at CCC camps in Ulster County, Greene County, Schoharie County, Delaware County, and Broome County, city boys and their country cousins, under the tutelage of local woodsmen and mechanics, wielded axes, mattocks and shovels to transform the Catskills in subtle and significant ways, planting millions of trees (more than 3 1/2 million in Delaware County in 1934 alone), fighting stream and soil erosion, and building roads, fire towers, hiking trails, ski trails, and the campsites at North Lake, Woodland Valley, Devil's Tombstone and Beaverkill. This new history, illustrated with more than 100 photographs and maps, tells their story--who they were, where they came from, what they did, and the legacy they left behind.

Catskills Soils and Forest History

the Catskills as a popular attraction in the 1800s, with the construction of the Catskill Mountain House and its rugged imitators that offered WASP guests "one-hundred percent restricted" accommodations ("Hebrews will knock vainly for admission"), a policy that remained until the Catskills became the curative for tubercular patients, sending real-estate prices plummeting and the WASP enclave on to richer pastures

Forest History Today

For over two hundred years, the Catskill Mountains have been repeatedly and dramatically transformed by New York City. In *Making Mountains*, David Stradling shows the transformation of the Catskills landscape as a collaborative process, one in which local and urban hands, capital, and ideas have come together to reshape the mountains and the communities therein. This collaboration has had environmental, economic, and cultural consequences. Early on, the Catskills were an important source of natural resources. Later, when New York City needed to expand its water supply, engineers helped direct the city toward the Catskills, claiming that the mountains offered the purest and most cost-effective waters. By the 1960s, New York had created the great reservoir and aqueduct system in the mountains that now supplies the city with 90 percent of its water. The Catskills also served as a critical space in which the nation's ideas about nature evolved. Stradling describes the great influence writers and artists had upon urban residents - especially the painters of the Hudson River School, whose ideal landscapes created expectations about how rural America should appear. By the mid-1800s, urban residents had turned the Catskills into an important vacation ground, and by the late 1800s, the Catskills had become one of the premiere resort regions in the nation. In the mid-twentieth century, the older Catskill resort region was in steep decline, but the Jewish "Borscht Belt" in the southern Catskills was thriving. The automobile revitalized mountain tourism and residence, and increased the threat of suburbanization of the historic landscape. Throughout each of these significant incarnations, urban and rural residents worked in a rough collaboration, though not without conflict, to reshape the mountains and American ideas about rural landscapes and nature.

History of Warren County, New York

The Ashokan Catskills

For over two hundred years, the Catskill Mountains have been repeatedly and dramatically transformed by New York City. In *Making Mountains*, David Stradling shows the transformation of the Catskills landscape as a collaborative process, one in which local and urban hands, capital, and ideas have come together to reshape the mountains

and the communities therein. This collaboration has had environmental, economic, and cultural consequences. Early on, the Catskills were an important source of natural resources. Later, when New York City needed to expand its water supply, engineers helped direct the city toward the Catskills, claiming that the mountains offered the purest and most cost-effective waters. By the 1960s, New York had created the great reservoir and aqueduct system in the mountains that now supplies the city with 90 percent of its water. The Catskills also served as a critical space in which the nation's ideas about nature evolved. Stradling describes the great influence writers and artists had upon urban residents - especially the painters of the Hudson River School, whose ideal landscapes created expectations about how rural America should appear. By the mid-1800s, urban residents had turned the Catskills into an important vacation ground, and by the late 1800s, the Catskills had become one of the premiere resort regions in the nation. In the mid-twentieth century, the older Catskill resort region was in steep decline, but the Jewish "Borscht Belt" in the southern Catskills was thriving. The automobile revitalized mountain tourism and residence, and increased the threat of suburbanization of the historic landscape. Throughout each of these significant incarnations, urban and rural residents worked in a rough collaboration, though not without conflict, to reshape the mountains and American ideas about rural landscapes and nature.

A History of the Lumber Industry in the State of New York

The Encyclopedia of New York State is one of the most complete works on the Empire State to be published in a half-century. In nearly 2,000 pages and 4,000 signed entries, this single volume captures the impressive complexity of New York State as a historic crossroads of people and ideas, as a cradle of abolitionism and feminism, and as an apex of modern urban, suburban, and rural life. The Encyclopedia is packed with fascinating details from fields ranging from sociology and geography to history. Did you know that Manhattan's Lower East Side was once the most populated neighborhood in the world, but Hamilton County in the Adirondacks is the least densely populated county east of the Mississippi; New York is the only state to border both the Great Lakes and the Atlantic Ocean; the Erie Canal opened New York City to rich farmland upstate . . . and to the west. Entries by experts chronicle New York's varied areas, politics, and persuasions with a cornucopia of subjects from environmentalism to higher education to railroads, weaving the state's diverse regions and peoples into one idea of New York State. Lavishly illustrated with 500 photographs and figures, 120 maps, and 140 tables, the Encyclopedia is key to understanding the state's past, present, and future. It is a crucial reference for students, teachers, historians, and business people, for New Yorkers of all persuasions, and for anyone interested in finding out more about New York State.

The Forest Rangers

"The third edition of this classic and indispensable work, first published in 1940 and last revised in 1976, has been updated completely for a new generation of students and scholars. Recognizing that the ways in which history is understood and interpreted have changed drastically over the past six decades, the editors have revised 448 articles, replaced 1,360 articles, and added 841 new entries. Gender, race, and social-history perspectives have been added

to many entries for the first time. In another departure from the earlier editions, the editors have added maps and illustrations throughout the text, providing helpful visual cues to readers. No library should be without these new volumes."--"The Best of the Best Reference Sources," American Libraries, May 2003.
