Today's society is one in which we, as individuals, are constantly barraged by the threat of domestic terrorism. The ever-present fear for your safety and the safety of those we love can overwhelm you if you aren't sure how to protect yourself. Luckily, distinguished combat veteran Brian M. Morris's Green Beret Survival Guide is here to help ease your fears. Using his firsthand knowledge from the field as a Green Beret, Morris concisely outlines the steps that are necessary towards increasing one's personal

safety. Over the course of several chapters, Morris describes the importance of situational awareness, meaning staying alert, being aware of your surroundings, and understanding the reality of threats that you may face in any given situation. An individual with good situational awareness never takes anything for granted and makes security a part of his or her daily routine. By being observant and practicing several different methods of observation, one can avoid falling prey to terrorist, thieves, and other criminals. Using situational awareness as the cornerstone of a personal safety plan, The Green Beret Survival Guide delivers expert advice on preparing you and your loved ones for the worst case scenario.

Soldier of Fortune

The world has failed the Darfur region, but devious politicians and generals have figured a way to polish their own images with no risk. They are going to use the National Guard. Sergeant Major Lucas Grant should have retired. Instead, he joined the Guard. The National Guard stands ready to provide humanitarian relief wherever they may be sent, but they never expected anything like Darfur. Grant finds himself in another shooting war, worse than anything he has known before. Islamic extremists want the country for Arab Muslims, the Sudanese Liberation Army wants it for African Muslims, and both sides want the Americans out. And there's a problem with one of their own soldiers. Based on current events in Darfur, American soldiers face the perils of helping the people no one cares about, and keeping each other alive while they do it.

We could call this book "Special Operations Recon Mission Impossible." A small group of highly trained, resourceful US Special Forces (SF) men is asked to go in teams behind the enemy lines to gather intelligence on the North Vietnamese Army units that had infiltrated through Laos and Cambodia down the Ho Chi Minh trails to their secret bases inside the Cambodian border west of South Vietnam. The covert reconnaissance teams, of only two or three SF men with four or five experienced indigenous mercenaries each, were tasked to go into enemy target areas by foot or helicopter insertion. They could be 15 kilometers beyond any other friendly forces, with no artillery support. In sterile uniforms - with no insignia or identification, if they were killed or captured, their government would deny their military connection. The enemy had placed a price on their heads and had spies in their Top Secret headquarters known as SOG. SOG had three identical recon ground units along the border areas. This book tells the history of Command and Control Detachment South (CCS). The CCS volunteer warriors and its Air Partners - the Army and Air Force helicopter transport and gunship crews who lived and fought together and sometimes died together. This is the first published history of CCS as

compiled by its last living commander, some forty years after they were disbanded. It tells of the struggles and intrigue involved in SOG's development as the modern-day legacy of our modern Special Operations Commands. Forbidden to tell of their experiences for over twenty years; their After Action Reports destroyed even before they were declassified - surviving veterans team together to tell how Recon men wounded averaged 100 percent; and SOG became the most highly decorated unit in Vietnam and all were awarded the Presidential Unit Citation.

Army Officer's Guide

"This report documents research to evaluate a realistic job preview (RJP) booklet for soldiers and families interested in U.S. Army Special Forces (SF). The RIP provides accurate, detailed information about important aspects of SF jobs. Recruiters began distributing it in 1994 to potential recruits to encourage informed decisions about joining SF and to help prepare those who volunteer. The evaluation objectives were to: (1) assess and describe booklet implementation, (2) assess the impact on recruits' commitment to joining SF, and (3) document ideas for improvement. We collected survey data from recruiters and from new recruits before and after booklet fielding. The data showed that soldiers who received and read the RJP booklet tended to be located at posts with a strong SF presence and tended to be relatively knowledgeable about SF. The selective nature of our sample of booklet readers made interpretation of the evaluation data difficult. However, the RJP appeared to provide new and important information that was often used in the decision process. Wives in particular seem to have benefited from the information. Recruiters and soldiers reacted favorably overall. The findings supported
