Biofuels, Land Grabbing and Food Security in Africa

Technology and Innovation in Learning, Teaching and Education

The issue of biofuels has already been much debated, but the focus to date has largely been on Latin America and deforestation - this highly original work breaks fresh ground in looking at the African perspective. Most African governments see biofuels as having the potential to increase agricultural productivity and export incomes and thus strengthen their national economies, improving energy balances and rural employment. At the same time climate change may be addressed through reduction of green house gas emissions. There are, however, a number of uncertainties mounting that challenge this scenario. Using cutting-edge empirical case studies, this knowledge gap is addressed in a variety of chapters examining the effects of large-scale biofuel production on African agriculture. In particular, 'land grabbing' and food security issues are scrutinised, both of which have become vital topics in regard to the environmental and developmental governance of African countries. A revealing book for anyone wishing to understand the startling impact of biofuels and land grabbing on Africa.

Gender and Forests

About the Book: This second edition has been thoroughly revised and updated and efforts have been made to enhance the usefulness of the book. In this edition a new chapter The Computer: Its Role in Research have been added keeping in view of the fact tha

The Precautionary Principle

"This volume sets out to investigate critically existing lines of thought about sexuality in Africa, while also creating space for alternative approaches"--P. [4] of cover.

World Development Report 2010

The purpose of this publication is to provide the background rationale and support for WHO's working paper Dealing with uncertainty - how can the precautionary principle help protect the future of our children?, prepared for the Fourth Ministerial Conference on Environment and Health held in Budapest, Hungary, in June 2004. The debate around the precautionary principle has provided many insights into how to improve public health decision-making under conditions of uncertainty. This publication should further support approaches to attaining the concurrent goals of protecting adults, children and future generations and the ecosystems on which we depend and enhancing economic development, sustainability and innovation in science, research and policy. [Ed.]

Rethinking Transportation 2020-2030

Read Free The Inconceivable Truth Rethinking Infertility

This important book is the re-titled third edition of the extremely well received and widely used Agricultural Extension (van den Ban & Hawkins, 1988, 1996). Building on the previous editions, Communication for Rural Innovation maintains and adapts the insights and conceptual models of value today, while reflecting many new ideas, angles and modes of thinking concerning how agricultural extension is taught and carried through today. Since the previous edition of the book, the number and type of organisations that apply communicative strategies to foster change and development in agriculture and resource management has become much more varied and this book is aimed at those who use communication to facilitate change in agriculture and resource management. Communication for Rural Innovation is essential reading for process facilitators, communication division personnel, knowledge managers, training officers, consultants, policy makers, extension specialists and managers of agricultural extension or research organisations. The book can also be used as an advanced introduction into issues of communicative intervention at BSc or MSc level.

Cultures Under Siege

The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In Poor Economics, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around

Read Free The Inconceivable Truth Rethinking Infertility

the world. Called "marvelous, rewarding" by the Wall Street Journal, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. Poor Economics shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

Rethinking Modernity

This book presents high-quality papers from the Third International Conference on Smart Computing and Informatics (SCI 2018?19), organized by the School of Computer Engineering and School of Computer Application, Kalinga Institute of Industrial Technology Deemed to be University, Bhubaneswar, from 21 to 22 December 2018. It includes advanced and multi-disciplinary research on the design of smart computing and informatics, focusing on innovation paradigms in system knowledge, intelligence and sustainability that have the potential to provide realistic solutions to various problems in society, the environment and industry. The papers featured provide a valuable contribution to the deployment of emerging computational and knowledge transfer approaches, optimizing solutions in varied disciplines of science, technology and health care.

Rethinking Nasserism

Collective violence changes the perpetrators, the victims, and the societies in which it occurs. It

Read Free The Inconceivable Truth Rethinking Infertility

targets the body, the psyche, and the socio-cultural order. How do people come to terms with these tragic events, and how are cultures affected by massive outbreaks of violence? This book is a groundbreaking collection of essays by anthropologists, psychologists and psychoanalysts, drawing on field research in many different parts of the world. Profiting from an interdisciplinary dialogue, the authors provide provocative, at times deeply troubling, insights into the darker side of humanity, and they also propose new ways of understanding the terrible things that people are capable of doing to each other.

UNESCO General History of Africa, Vol. III, Abridged Edition

This volume entails a collection of new ideas, themes and questions towards a phenomenon which we are used to refer to with the key term “diversity”. The aim of the book is to offer a cultural sciences perspective on “diversity”, to advance knowledge about it and enrich the dialogue between academics and practitioners in related domains of action. Today, changes in the demographic structures of the population, the migration flux, multiculturalism, the rising awareness concerning minorities’ rights, gender studies and so on lead to a complex picture of what “diversity” means. The narrative of a society and of most organizations is constituted by multiple layers of social categorization, segregation and identity. Therefore, “diversity” defies simple definition. The contributions in this volume approach the phenomenon from different angles and reveal new theoretical, methodological and practical perspectives on it.

Shock Waves

Poor Economics

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

Smart Intelligent Computing and Applications

Read Free The Inconceivable Truth Rethinking Infertility

Blossoms of the Savannah is the story of two sisters, Taiyo and Resian, who are on the verge of womanhood and torn between their personal ambitions and the humiliating duty to the Nasila tradition. Relocation to their rural home heralds a cultural alienation born of their refusal to succumb to female genital mutilation and early marriages. In pursuit of the delicate and elusive socio-economic cultural balance in Nasila, Ole. Kaelo, the girls' father is ensnared by a corrupt extortionist. To extricate himself he sends his daughters into a flat-spin labyrinth from which they have to struggle to escape.

Sustainable Consumption and Production

The authors in this volume explore the interconnected issues of intergenerational trauma and traumatic memory in societies with a history of collective violence across the globe. Each chapter's discussion offers a critical reflection on historical trauma and its repercussions, and how memory can be used as a basis for dialogue and transformation. The perspectives include, among others: the healing journey of three generations of a family of Holocaust survivors and their dialogue with third generation German students over time; traumatic memories of the British concentration camps in South Africa; reparations and reconciliation in the context of the historical trauma of Aboriginal Australians; and the use of the arts as a strategy of dialogue and transformation.

Reducing Racial/Ethnic Disparities in Reproductive and Perinatal

Outcomes

This enlightening book brings together the work of gender and forestry specialists from various backgrounds and fields of research and action to analyse global gender conditions as related to forests. Using a variety of methods and approaches, they build on a spectrum of theoretical perspectives to bring depth and breadth to the relevant issues and address timely and understudied themes. Focusing particularly on tropical forests, the book presents both local case studies and global comparative studies from Africa, Asia, and Latin America, as well as the US and Europe. The studies range from personal histories of elderly American women's attitudes toward conservation, to a combined qualitative / quantitative international comparative study on REDD+, to a longitudinal examination of oil palm and gender roles over time in Kalimantan. Issues are examined across scales, from the household to the nation state and the global arena; and reach back to the past to inform present and future considerations. The collection will be of relevance to academics, researchers, policy makers and advocates with different levels of familiarity with gender issues in the field of forestry.

Re-thinking Diversity

Nowhere on Earth is there an ecological transformation so swift and so extreme as between the snow-line of the high Andes and the tropical rainforest of Amazonia. The different disciplines that research the human past in South America have long tended to treat these two

Read Free The Inconceivable Truth Rethinking Infertility

great subzones of the continent as self-contained enough to be taken independently of each other. Objections have repeatedly been raised, however, to warn against imagining too sharp a divide between the people and societies of the Andes and Amazonia, when there are also clear indications of significant connections and transitions between them. Rethinking the Andes–Amazonia Divide brings together archaeologists, linguists, geneticists, anthropologists, ethnohistorians and historians to explore both correlations and contrasts in how the various disciplines see the relationship between the Andes and Amazonia, from deepest prehistory up to the European colonial period. The volume emerges from an innovative programme of conferences and symposia conceived explicitly to foster awareness, discussion and co-operation across the divides between disciplines. Underway since 2008, this programme has already yielded major publications on the Andean past, including *History and Language in the Andes* (2011) and *Archaeology and Language in the Andes* (2012).

Biofuels, Land Access and Rural Livelihoods in Tanzania

A new World Bank report shows that climate change is an acute threat to poorer people across the world, with the power to push more than 100 million people back into poverty over the next fifteen years. And the poorest regions of the world - Sub-Saharan Africa and South Asia - will be hit the hardest. But the report - *Shock Waves: Managing the Impacts of Climate Change on Poverty* - also points to a way out. This requires that poverty reduction and development work continue as a priority while taking into account a changing climate. It also means taking targeted action to help people cope with climate shocks - such as developing early warning

Read Free The Inconceivable Truth Rethinking Infertility

systems and flood protection, and introducing heat-resistant crops. At the same time, efforts to reduce emissions should accelerate, and be designed to protect the poor.

The Psychosocial Implications of Disney Movies

In an era of "fertility for all" and dominated by Mom's Clubs and helicopter parents, Silent Sorority reveals the difficult business of rebuilding a life when infertility treatments prove fruitless.

Our Common Future

Blossoms of the Savannah

This feminist adventure classic tells the tale of the Millenium Hall, the female Utopia. The people in the Hall live in a model of mid-century reform ideas. All the women have crafts with which to better themselves. Property is held in common, and education is the primary pastime. The narrator's long-lost cousin relates the series of adventures and how each of the residents arrived at this female Utopia. The adventures are remarkable for their reliance on a nearly superstitious form of divine grace, where God's will manifests itself with the direct punishment of the wicked and the miraculous protection of the innocent. In one tale, a woman about to be

Read Free The Inconceivable Truth Rethinking Infertility

ravished by a man is saved, literally by the hand of God, as her attacker dies of a stroke. Millenium Hall was Sarah Scott's most significant novel. Interest in it has revived in the 21st century among feminist literary scholars.

Communication for Rural Innovation

Gurminder Bhambra presents a fundamental reconstruction of the idea of modernity in sociology, criticizing classic and contemporary contributions and arguing for an approach based on "connected histories" beyond the Eurocentric focus of dominant approaches.

Breaking Intergenerational Cycles of Repetition

German migration policy now stands at a major crossroad, caught between a fifty-year history of missed opportunities and serious new challenges. Focusing on these new challenges that German policy makers face, the authors, both internationally recognized in this field, use historical argument, theoretical analysis, and empirical evaluation to advance a more nuanced understanding of recent initiatives and the implications of these initiatives. Their approach combines both synthesis and original research in a presentation that is not only accessible to the general educated reader but also addresses the concerns of academic scholars and policy analysts. This important volume offers a comprehensive and critical examination of the history of German migration law and policy from the Federal Republic's inception in 1949 to the

present.

The Brink of All We Hate

In the crowded field of climate change reports, 'WDR 2010' uniquely: emphasizes development; takes an integrated look at adaptation and mitigation; highlights opportunities in the changing competitive landscape; and proposes policy solutions grounded in analytic work and in the context of the political economy of reform.

Rethinking Rural Human Resource Management

"An enormous amount of academic literature has been published on Nasserism since the 1950s and, to my mind, Rethinking Nasserism is without a doubt the last word on the subject. . . . An outstanding reappraisal of Nasserism as a major force in the 20th-century Middle East."--Israel Gershoni, Tel Aviv University President Gamal 'Abd Nasser was a beloved figure of the Egyptian people and loomed large over the Arab world during his period of influence (1952-1970). Nasser dominated and defined the politics of an entire generation of Egyptians and successfully spoke to the masses of Arabs in other countries, even going over the heads of their own leaders--something that no other Arab leader since has been able to accomplish since on any considerable scale. In Rethinking Nasserism, distinguished scholars from Israel, the United States, and Egypt provide a definitive reappraisal of the historical force of

Read Free The Inconceivable Truth Rethinking Infertility

Nasserism in the ideological, economic, social, and cultural arenas of the modern Middle East in general and of Egypt in particular. The innovative theme of the collection is Nasserism as a form of populism, described by the editors in their introduction as a combination of various tenets of anti-imperialism, pan-Arabism (or nationalism), and Arab socialism. The book reassesses the achievements and failures of Nasserism during Nasser's presidency and the lasting impact of his ideology on subsequent regimes in Egypt and on the entire Arab world.

Conceivability

In Partnership with Nature

The “Jason Bourne of fertility” (The New York Times Book Review) presents a personal and deeply informative account of one woman’s journey through the global fertility industry. On paper, conception may seem like a simple biological process, yet this is often hardly the case. While many would like to have children, the road toward conceiving and maintaining a pregnancy can be unexpectedly rocky and winding. Lawyer Elizabeth Katkin never imagined her quest for children would ultimately involve seven miscarriages, eight fresh IVF cycles, two frozen IVF attempts, five natural pregnancies, four IVF pregnancies, ten doctors, six countries, two potential surrogates, nine years, and roughly \$200,000. Despite her three Ivy League degrees and wealth of resources, Katkin found she was woefully undereducated when it came to understanding and confronting her own difficulties having children. After being told by four doctors she should give up, but without an explanation as to what exactly was going wrong with her body, Katkin decided to look for answers herself. The global investigation that followed

Read Free The Inconceivable Truth Rethinking Infertility

revealed that approaches to the fertility process taken in many foreign countries are vastly different than those in the US and UK. In *Conceivability*, Elizabeth Katkin, now a mother of two, exposes eye-opening information about the medical, financial, legal, scientific, emotional, and ethical issues at stake. “A well-researched, informative, and positive account of a very long journey to motherhood” (Kirkus Reviews), *Conceivability* sheds light on the often murky and baffling world of conception science. Her book is an invaluable and inspiring text that will be a boon to others navigating the deep and “choppy waters” of fertility treatment (Publishers Weekly), and her chronicle of one of the most difficult, painful, rewarding, and loving journeys a woman can take is as informative as it is poignant.

Research Methodology

Among women’s health concerns, reproductive issues, both prenatal and postpartum, hold particular prominence. Yet despite the many programs dedicated to improving women’s reproductive health, maternal and infant morbidity and mortality rates in minority communities remain unchanged—or have increased. Confronting this alarming statistic head-on, *Reducing Racial/Ethnic Disparities in Reproductive and Perinatal Outcomes* is the first book systematically examining public health interventions designed toward meeting this important and elusive goal. Its contributors offer the best thinking and practice on this complicated topic, clarifying the relationship between evidence-based medicine and evidence-based public health and its potential for increasing parity, considering interventions in the multiple contexts of women’s lives, reviewing the evidence base for each program or initiative featured, and

Read Free The Inconceivable Truth Rethinking Infertility

describing methodologies for evaluating interventions. The resulting volume advocates for an integrative lifespan approach, including topics related to: Family planning STI and HIV/AIDS screening and treatment Smoking cessation and reducing exposure to environmental smoke Preconceptional well-woman care Depression screening and treatment Labor/delivery approaches and intrapartum care Emerging prenatal care interventions, from centering pregnancy to doula support For professionals and graduate students in psychiatry, psychology, sociology, women's health, and public health, Reducing Racial/Ethnic Disparities in Reproductive and Perinatal Outcomes reframes a set of ongoing issues and guides the reader toward state-of-the-art solutions.

Qualitative Research in Social Work

"Is it not monstrous, that our Seducers should be our Accusers? Will they not employ Fraud, nay often Force to gain us? What various Arts, what Stratagems, what Wiles will they use for our Destruction? But that once accomplished, every opprobrious Term with which our Language so plentifully abounds, shall be bestowed on us, even by the very Villains who have wronged us" -- Laetitia Pilkington, *Memoirs* (1748). In her scandalous *Memoirs*, Laetitia Pilkington spoke out against the English satires of the Restoration and eighteenth century, which employed "every opprobrious term" to chastise women. In *The Brink of All We Hate*, Felicity Nussbaum documents and groups those opprobrious terms in order to identify the conventions of the satires, to demonstrate how those conventions create a myth, to provide critical readings of poetic texts in the antifeminist tradition, and to draw some conclusions

Read Free The Inconceivable Truth Rethinking Infertility

about the basic nature of satire. Nussbaum finds that the English tradition of antifeminist satire draws on a background that includes Hesiod, Horace, Ovid, and Juvenal, as well as the more modern French tradition of La Bruyere and Boileau and the late seventeenth-century English pamphlets by Gould, Fige, and Ames. The tradition was employed by the major figures of the golden age of satire -- Samuel Butler, Dryden, Swift, Addison, and Pope. Examining the elements of the tradition of antifeminist satire and exploring its uses, from the most routine to the most artful, by the various poets, Nussbaum reveals a clearer context in which many poems of the Restoration and eighteenth century will be read anew.

Silent Sorority

`A really fine book an impressive work that adds much to the development of the use of qualitative methodology in social work research' - William J Reid, University at Albany 'The back cover of the book proclaims that "Qualitative Research in Social Work will be essential reading for all students, practitioners and researchers undertaking social work research." That just about sums it up for me' - British Journal of Social Work `This book is a significant milestone in the development of social work research. It is characterized by an unparalleled command of the field of qualitative research in social work, and by a commitment to an understanding of the demands and potential of day-to-day social work practice' - Mike Fisher, Director of Research, National Institute for Social Research `Qualitative Research in Social Work edited by Ian Shaw and Nick Gould, provides a state-of-the-art exposition and analysis of qualitative inquiry in relation to social work. The book has an unusual degree of coherence for

Read Free The Inconceivable Truth Rethinking Infertility

one with several authors. The five chapters by the editors (parts one and three) do an exceptional job of providing the necessary background information and setting the context for the six application chapters and of highlighting and discussing the issues raised in those chapters. The editors are respected scholars well-versed in the theory and practice of qualitative research. Similarly, the contributing authors represent both considerable experience in this field and a diversity of interests. This combination makes *Qualitative Research in Social Work* an excellent text for students, practitioners, and researchers alike. It is a benchmark for social work progress in this area and points the way for the continued development of qualitative inquiry' - Professor Stanley L Witkin, Department of Social Work, University of Vermont There is a clear need for a book which treats qualitative research as a substantive theme within social work, setting epistemological and methodological issues in a context whereby the agenda is set by, and is relevant to, social work. *Qualitative Research in Social Work* is just such a book and will be immensely useful for students, practitioners and researchers interested in and undertaking social work research. In the introductory chapters the co-authors set qualitative research within a context of social work developments and problems. The central section provides additional topicality and directness through specially commissioned chapters from leading figures in this field each covering key qualitative methods and relating them to social work settings, and the final section which reviews qualitative research in social work, and aims to exemplify ways in which social work thought and practice can be advanced through research.

Rethinking the Andes–Amazonia Divide

Read Free The Inconceivable Truth Rethinking Infertility

This book constitutes the thoroughly refereed post-conference proceedings of the First International Conference on Technology and Innovation in Learning, Teaching and Education, TECH-EDU 2018, held in Thessaloniki, Greece, on June 20-22, 2018. The 30 revised full papers along with 18 short papers presented were carefully reviewed and selected from 80 submissions. The papers are organized in topical sections on new technologies and teaching approaches to promote the strategies of self and co-regulation learning (new-TECH to SCRL); eLearning 2.0: trends, challenges and innovative perspectives; building critical thinking in higher education: meeting the challenge; digital tools in S and T learning; exploratory potentialities of emerging technologies in education; learning technologies; digital technologies and instructional design; big data in education and learning analytics.

Immigration Policy in the Federal Republic of Germany

"This Handbook is an output of UNEP's work towards the implementation of the 10-Year Framework of Programmes on Sustainable Consumption and Production (SCP). This global edition is based on a pilot edition for Asia and the Pacific region that was developed under the EU funded and UNEP managed Regional Policy Support Component of the SWITCH-Asia programme. It is designed to assist policymakers in developing, implementing, monitoring and evaluating policies that support the transition towards SCP. It includes numerous case studies highlighting SCP opportunities and existing successful initiatives from across the world."--Publisher's description.

Healing the Infertile Family

As one of the most heartbreaking experiences in life, infertility can shatter dreams and crush spirits in its unyielding wake. Almost taboo, this struggle is rarely discussed within many Christian circles, which can leave affected couples with more questions than answers. The Inconceivable Truth provides a new approach for addressing some of the struggles Christian couples face today and the truth of what it is to be unable to conceive. It is the author's hope that as you confront some of the same issues she did, her story will help you to make God-honouring decisions and understand better the place of infertility in our lives. To find peace and joy in this difficult season, our counsel must be rooted in the Bible and in Christ. Join Joanna as she shares what God taught her during her family's infertility journey. May His book come alive in ways that will excite your soul and draw your heart and eyes upward to Jesus.

A Description of Millenium Hall

This study of the everyday religious practice of pious women within Kuala Lumpur's affluent Malay middle class reveals that women play an active part in the Islamization process by organizing and participating in public programs of religious education, transforming the traditionally male-dominated space of the mosque and breaking men's monopoly over positions of religious authority.--Sylva Frisk is a lecturer in the School of Global Studies at Gothenburg University, Sweden.

Re-thinking Sexualities in Africa

Unlike most infertility books that focus on medical treatment, *Healing the Infertile Family* examines the social and emotional problems experienced by couples confronting infertility and suggests how they can be alleviated. In this updated edition, Gay Becker discusses her most recent study of couples experiencing infertility and offers guidelines for resolution of this common problem that will enable couples to face the future with hope. Unlike most infertility books that focus on medical treatment, *Healing the Infertile Family* examines the social and emotional problems experienced by couples confronting infertility and suggests how they can be alleviated. In this updated edition, Gay Becker discusses her most recent study of couples experiencing infertility and offers guidelines for resolution of this common problem that will enable couples to face the future with hope.

Doing Qualitative Research in Social Work

This year's World Development Report looks at facts and trends regarding the various dimensions of gender equality in the context of the development process.

Statistical Rethinking

Statistical Rethinking: A Bayesian Course with Examples in R and Stan builds readers'

Read Free The Inconceivable Truth Rethinking Infertility

knowledge of and confidence in statistical modeling. Reflecting the need for even minor programming in today's model-based statistics, the book pushes readers to perform step-by-step calculations that are usually automated. This unique computational approach ensures that readers understand enough of the details to make reasonable choices and interpretations in their own modeling work. The text presents generalized linear multilevel models from a Bayesian perspective, relying on a simple logical interpretation of Bayesian probability and maximum entropy. It covers from the basics of regression to multilevel models. The author also discusses measurement error, missing data, and Gaussian process models for spatial and network autocorrelation. By using complete R code examples throughout, this book provides a practical foundation for performing statistical inference. Designed for both PhD students and seasoned professionals in the natural and social sciences, it prepares them for more advanced or specialized statistical modeling. Web Resource The book is accompanied by an R package (rethinking) that is available on the author's website and GitHub. The two core functions (map and map2stan) of this package allow a variety of statistical models to be constructed from standard model formulas.

Migration, Environment and Climate Change

"The book first places Africa in the context of world history at the opening of the seventh century, before examining the general impact of Islamic penetration, the continuing expansion of the Bantu-speaking peoples, and the growth of civilizations in the Sudanic zones of West Africa"--Back cover.

The Inconceivable Truth

Gradual and sudden environmental changes are resulting in substantial human movement and displacement, and the scale of such flows, both internal and cross-border, is expected to rise with unprecedented impacts on lives and livelihoods. Despite the potential challenge, there has been a lack of strategic thinking about this policy area partly due to a lack of data and empirical research on this topic. Adequately planning for and managing environmentally induced migration will be critical for human security. The papers in this volume were first presented at the Research Workshop on Migration and the Environment: Developing a Global Research Agenda held in Munich, Germany in April 2008. One of the key objectives on the Munich workshop was to address the need for more sound empirical research and identify priority areas of research for policy makers in the field of migration and the environment.

Submitting to God

Bringing key developments and debates together in a single volume, this book provides an authoritative guide for students and practitioners embarking on qualitative research in social work and related fields. Frequently illustrated with contemporary and classic case examples from the authors' own empirical research and from international published work, and with self-directed learning tasks, the book provides insight into the difficulties and complexities of carrying out research, as well as sharing 'success' stories from the field. Shaw and Holland

Read Free The Inconceivable Truth Rethinking Infertility

have long experience of writing for practitioners and students and in making complex concepts accessible and readable, making this an ideal text for those engaging in qualitative social work research at any level. Ian Shaw is a Professor of Social Work at the University of York and at the University of Aalborg. Sally Holland is a Reader in Social Work at the School of Social Sciences in Cardiff University.
