From the moment she hears Lev's violin for the first time, Helena Attlee is captivated. She is told that it is an Italian instrument, named after its former Russian owner. Eager to discover all she can about its ancestry and the stories contained within its delicate wooden body, she sets out for Cremona, birthplace of the Italian violin. This is the beginning of a beguiling journey whose end she could never have anticipated. Making its way from dusty workshops, through Alpine forests, cool Venetian churches, glittering Florentine courts, and far-flung Russian flea markets, Lev's Violin takes us from the heart of Italian culture to its very furthest reaches. Its story of luthiers and scientists, princes and orphans, musicians, composers, travellers and raconteurs swells to a poignant meditation on the power of objects, stories and music to shape individual lives and to craft entire cultures.

Vampires in the Lemon Grove

A flâneur is a stroller, a loiterer, someone who ambles without apparent purpose but is secretly attuned to the history of the streets he walks - and is in covert search of adventure, aesthetic or erotic. Acclaimed writer Edmund White, who lived in Paris for sixteen years, wanders through the avenues and along the quays, into parts of the city virtually unknown to visitors and indeed to many locals, luring the reader into the fascinating and seductive backstreets of his personal Paris.

Managing Natural Resources for Development in Africa

Near Mount Etna in Sicily lies Casa Cuseni, a beautiful house built in golden stone - and the home which Daphne Phelps was astonished to find she had inherited in 1947. At the age of 34, war-weary from working as a psychiatric social worker, with barely any Italian, and precious little money, she plunged into a fascinating Sicilian world. Every imaginable problem had to be overcome, not only financial difficulties but local authorities and a house staff who initially felt no loyalty to the new Signorina but who gradually accepted her as a respected member of their small community. To help make ends meet, for many years she ran Casa Cuseni as a pensione and to her doors came Roald Dahl, Tennessee Williams, Bertrand Russell and Henry Faulkner. But just as important to her life and her story are the Sicilians with whom she shared the love and care of Casa Cuseni: Don

Ciccio the local mafia leader, Vincenzo, general manservant who recited while he served the meals, Beppe, a Don Juan who scented his eyebrows and his moustache to attract the local girls; and above all the steadfast cook and housekeeper who lives with Daphne still and to whom this book is dedicated.

Far from the glittering cities of Beijing and Shanghai, China's borderlands are populated by around one hundred million people who are not Han Chinese. For many of these restive minorities, the old Chinese adage 'the mountains are high and the Emperor far away', meaning Beijing's grip on power is tenuous and its influence unwelcome, continues to resonate. Travelling through China's most distant and unknown reaches, David Eimer explores the increasingly tense relationship between the Han Chinese and the ethnic minorities. Deconstructing the myths represented by Beijing, Eimer reveals a shocking and fascinating picture of a China that is more of an empire than a country.

Driving Over Lemons

"For millennia, the seaways have carried our goods, cultures and ideas, the terrors of war and the bounties of peace and they have never been busier than they are today. But though our normality depends on shipping, it is a world which passes largely unconsidered, unseen and unrecorded. Out of sight, in every lonely corner of every sea, through every night, every day, and every imaginable weather, tiny crews of seafarers work the giant ships which keep landed life afloat. These ordinary men (and they are mostly men) live extraordinary lives, subject to pressures we know families, relationships, dreams and fears and to dangers and difficulties we can only imagine, from hurricanes and pirates to years of confinement in hazardous, if not hellish, environments. Horatio Clare joins two container ships, travelling in the company of their crews and captains. Together they experience unforgettable journeys: the first, from East to West (Felixstowe to Los Angeles, via Suez) is rich with Mediterranean history, torn with typhoon nights and gilded with an unearthly Pacific peace; the second northerly passage, from Antwerp to Montreal, reeks of diesel, wuthers with gales and goes to froz

The complex and dynamic interlinks between natural resource management (NRM) and development have long been recognized by national and international research and development organizations and have generated voluminous literature. However, much of what is available in the form of university course books, practical learning manuals and reference materials in NRM is based on experiences from outside Africa. *Managing Natural Resources for Development in Africa: A Resource Book* provides an understanding of the various levels at which NRM issues occur and are being addressed scientifically, economically, socially and politically. The book's nine chapters present state-of-the-art perspectives within a holistic African context. The book systematically navigates the tricky landscape of integrated NRM, with special reference to Eastern and Southern Africa, against the backdrop of prevailing local, national, regional and global social, economic and environmental challenges. The authors' wide experience, the rich references made to emerging challenges and opportunities, and the presentation of different tools, principles, approaches, case studies and processes make the book a rich and valuable one-stop resource for postgraduate students, researchers, policymakers and NRM practitioners. The book is designed to help the reader grasp in-depth NRM perspectives and presents innovative guidance for research design and problem solving, including review questions, learning activities and recommended further reading. The book was developed through a writeshop process by a multi-disciplinary team of lecturers from the University of Nairobi, Egerton University, Kenyatta University, the University of Zimbabwe, the University of Malawi, Makerere University and the University of Dar es Salam. In addition, selected NRM experts from regional and international research organizations including the World Agroforestry Center (ICRAF), the Africa Forest Forum, RUFORUM, IIRR and the International Development Research Centre (IDRC) participated in the writeshop and contributed material to the book.

In the Land of Milk and Honey

Helena Attlee 's 20 years of experience with gardens lets her bring readers the very best in Italy's Private Gardens. She has talked and teased with owners, in the process admiring some of Italy's finest gardens, both large and small. She has even delved into the past and explored the future. The result is a book full of wonderfully fresh insight into those most marvelous of

creations — the great gardens of Italy. At Villa Barbarigo in the Veneto, Count Pizzoni Ardemani recounts childhood tales of playing in the garden and talking to the statues. Countess Pietromarchi persuades roses to thrive in the challenging climate of central Italy, sharing this secret — and many others — in her garden at La Ferriera in southern Tuscany. Each garden has been specially photographed by Alex Ramsay and he, too, brings readers the people behind the plants in this spectacular, unique look at beautiful gardens.

Join the bestselling author of *Ciao, America!* on a lively tour of modern Italy that takes you behind the seductive face it puts on for visitors—*la bella figura*—and highlights its maddening, paradoxical true self. You won't need luggage for this hypothetical and hilarious trip into the hearts and minds of Beppe Severgnini's fellow Italians. In fact, Beppe would prefer if you left behind the baggage his crafty and elegant countrymen have smuggled into your subconscious. To get to his Italia, you'll need to forget about your idealized notions of Italy. Although *La Bella Figura* will take you to legendary cities and scenic regions, your real destinations are the places where Italians are at their best, worst, and most authentic: The highway: in America, a red light has only one possible interpretation—Stop! An Italian red light doesn't warn or order you as much as provide an invitation for reflection. The airport: where Italians prove that one of their virtues (an appreciation for beauty) is really a vice. Who cares if the beautiful girls hawking cell phones in airport kiosks stick you with an outdated model? That's the price of gazing upon perfection. The small town: which demonstrates the Italian genius for pleasant living: “a congenial barber . . . a well-stocked newsstand . . . professionally made coffee and a proper pizza; bell towers we can recognize in the distance, and people with a kind word and a smile for everyone.” The chaos of the roads, the anarchy of the office, the theatrical spirit of the hypermarkets, and garrulous train journeys; the sensory reassurance of a church and the importance of the beach; the solitude of the soccer stadium and the crowded Italian bedroom; the vertical fixations of the apartment building and the horizontal democracy of the eat-in kitchen. As you venture to these and many other locations rooted in the Italian psyche, you realize that Beppe has become your Dante and shown you a country that “has too much style to be hell” but is “too disorderly to be heaven.” Ten days, thirty places. From north to south. From food to politics. From saintliness to sexuality. This ironic, methodical, and sentimental examination will help you understand why Italy—as Beppe says—“can have you fuming and then purring in the space of a hundred meters or ten minutes.”

Citrus greening, a disease that reduces yield, compromises the flavor, color, and size of citrus fruit and eventually kills the citrus tree, is now present in all 34 Floridian citrus-producing counties. Caused by an insect-spread bacterial infection, the disease reduced citrus production in 2008 by several percent and continues to spread, threatening the existence of Florida's \$9.3 billion citrus industry. A successful citrus greening response will focus on earlier detection of diseased trees, so that these sources of new infections can be removed more quickly, and on new methods to control the insects that carry the bacteria. In the longer term, technologies such as genomics could be used to develop new citrus strains that are resistant to both the bacteria and the insect.

The Land Where Lemons Grow

Buon appetito! Everyone loves Italian food. But how did the Italians come to eat so well? The answer lies amid the vibrant beauty of Italy's historic cities. For a thousand years, they have been magnets for everything that makes for great eating: ingredients, talent, money, and power. Italian food is city food. From the bustle of medieval Milan's marketplace to the banqueting halls of Renaissance Ferrara; from street stalls in the putrid alleyways of nineteenth-century Naples to the noisy trattorie of postwar Rome: in rich slices of urban life, historian and master storyteller John Dickie shows how taste, creativity, and civic pride blended with princely arrogance, political violence, and dark intrigue to create the world's favorite cuisine. *Delizia!* is much more than a history of Italian food. It is a history of Italy told through the flavors and character of its cities. A dynamic chronicle that is full of surprises, *Delizia!* draws back the curtain on much that was unknown about Italian food and exposes the long-held canards. It interprets the ancient Arabic map that tells of pasta's true origins, and shows that Marco Polo did not introduce spaghetti to the Italians, as is often thought, but did have a big influence on making pasta a part of the American diet. It seeks out the medieval recipes that reveal Italy's long love affair with exotic spices, and introduces the great Renaissance cookery writer who plotted to murder the Pope even as he detailed the aphrodisiac qualities of his ingredients. It moves from the opulent theater of a Renaissance wedding banquet, with its gargantuan ten-course menu comprising hundreds of separate dishes, to the thin soups and bland polentas that would eventually force millions to emigrate to the New World. It shows how early pizzas were disgusting and why Mussolini championed risotto. Most important, it explains the origins and growth of the world's greatest urban food culture. With its delectable mix of vivid storytelling, groundbreaking research, and shrewd analysis, *Delizia!* is as appetizing as the dishes it describes. This passionate account of Italy's civilization of the table will satisfy foodies, history buffs, Italophiles, travelers, students -- and anyone who loves a well-told tale.

Chris, eternal optimist and itinerant sheep shearer, moves with his wife Ana to a mountain farm in Las Alpujarras, an oddball region in the south of Spain. Misadventures gleefully unfold as Chris discovers that the owner has no intention of leaving and meets their neighbours, an engaging mix of peasant farmers and shepherds, New Age travellers and ex-pats. Their daughter Chloë is born, linking them irrevocably to their new life. The hero of the piece, however, is the farm itself - a patch of mountain studded with olive, almond and lemon groves, sited on the wrong side of a river, with no access road, water supply or electricity. Could life offer much better than that?

Fruit of the Lemon

The Russian Empire once extended deep into America: in 1818 Russia's furthest outposts were in California and Hawaii. The dreamer behind this great Imperial vision was Nikolai Rezanov - diplomat, adventurer, courtier, millionaire and gambler. His quest to plant Russian colonies from Siberia to California led him to San Francisco, where he was captivated by Conchita, the fifteen-year-old daughter of the Spanish Governor, who embodied his dreams of both love and empire. From the glittering court of Catherine the Great to the wilds of the New World, Matthews conjures a brilliantly original portrait of one of Russia's most eccentric Empire-builders.

An Orange in January

The magnificent Danube both cuts across and connects central Europe, flowing through and alongside ten countries: Romania, Ukraine, Moldova, Bulgaria, Serbia, Croatia, Hungary, Slovakia, Austria, and Germany. Travelling its full length from east to west, against the river's flow, Nick Thorpe embarks on an inspiring year-long journey that leads to a new perspective on Europe today. Thorpe's account is personal, conversational, funny, immediate, and uniquely observant—everything a reader expects in the best travel writing. Immersing himself in the Danube's waters during daily morning swims, Thorpe likewise becomes immersed in the histories of the lands linked by the river. He observes the river's ecological conditions, some discouraging and others hopeful, and encounters archaeological remains that whisper of human communities sustained by the river over eight millennia. Most fascinating of all are the ordinary and extraordinary people along the way—the ferrymen and fishermen, workers in the fields, shopkeepers, beekeepers, waitresses, smugglers and border policemen, legal and illegal immigrants, and many more. For readers who anticipate their own journeys on the Danube, as well as those who only dream of seeing the great river, this book will be a unique and treasured guide.
