Eddie McGee's Complete Book of Survival

From the prize-winning author of To Be a Machine - meet the men and women preparing for the end of the world In the remote mountains of Scotland, in high-tech bunkers in South Dakota and in the lush valleys of New Zealand, small groups of determined men and women are getting ready. They are environmentalists who fear the ravages of climate change; billionaire entrepreneurs dreaming of life on Mars; and right-wing conspiracists yearning for a lost American idyll. One

The Prepper's Water Survival Guide

The basis of adequate prepping is being prepared for both common and dire events that may occur under the worst of all possible circumstances. These circumstances might include the breakdown in normal emergency support services (such as calling 911), the lack of an ability to obtain additional supplies, and the probability that you will not be able to rely on anyone but members of your immediate group or yourself. Prepping requires forethought with regard to food, water supplies, power, and protection – all areas of significant technical preparation. Self-reliant medical care is no exception. This book provides the basis of prevention, identification, and long-term management of survivable medical conditions and can be performed with minimal training. It helps you identify sources of materials you will need and should stock-pile, it discusses storage issues, and directs you to sources for more complex procedures that require advanced concepts of field-expedient techniques used by trained medical persons such as surgeons, anesthesiologists, dentists, or midwives and obstetricians.

The Survival Medicine Handbook

Across the ages, in every survival story, a disaster of some sort plays a prominent role. Sometimes the part is played by the government, sometimes it is played by Mother Nature, and other times, the role is taken on by a random mishap. If we have learned one thing studying the history of disasters, it is this: those who are prepared have a better chance at survival than those who are not. A crisis rarely stops with a triggering event. The aftermath can spiral, having the capacity to cripple our normal ways of life. Because of this, it's important to have a well-rounded approach to our preparedness efforts. Due to the overwhelming nature of preparedness, we have created the Prepper's Blueprint to help get you and your family ready for life's unexpected emergencies. To make a more comprehensive, easy-to-follow program, The Prepper's Blueprint has been simplified and divided up in a way to help you make sense of all the preparedness concepts and supply lists provided. We have divided the chapters into layers of preparedness. Layer 1: Chapters 1-14, prepares you for those everyday disasters that have shorter-term effects: power outages, storms, injuries, and evacuations. Layer 2: Chapters 15-31 help you to get ready for disasters that turn out to be much longer-lasting: economic collapse, long term power outages, and pandemics, to name a few. Layer 3: Chapters 32-56 prepares you for the

long haul and a complete change of lifestyle, the end of the world as we know it: providing food and water once supplies run out, security, retreat properties, and long-term plans. The goal of The Prepper's Blueprint is to help you find freedom through self-reliance, and ultimately, to get you and your family to a point where you can not only survive, but thrive, in a world that may be permanently altered.

The Prepared Prepper's Cookbook

A complete guide to disaster preparedness from Scott Hunt, CEO of Practical Preppers and a nationally recognized preparedness expert. The world we live in is an unstable one. From natural disasters such as earthquakes, hurricanes, and floods of biblical proportions to concerns about the economic downturn and government shutdown, the hits just keep on coming. At the same time, the power grid is incredibly fragile. Our dependency on widely distributed long distance systems for power, medicine, and food makes our society susceptible to attack, whether by foreign or domestic enemies, or the weather. No matter the concern, the solutions are the same. Scott Hunt, the owner of Practical Preppers, and an experienced engineer, homesteader, and pastor, offers readers a complete and detailed guide to sustainable living. With *The Practical Preppers Complete Guide to Disaster Preparedness*, anyone can learn how to:

- Secure a water source-even in an urban area
- Grow and preserve food
- Set up an alternative energy supply
- Maintain a comfortable shelter -including alternative cooking and sanitation methods during a long power outage
- Bug out-what to include in your bug out bag and how to leave
- Prepare for medical issues
- Deal with security concerns

The Worst-Case Scenario Survival Handbook: College

Be prepared and become a master survivor and mental master! Book 1: We've all seen the TV shows, and we all know it could come down to this: Survival in the wild. When you're on your own, away from civilization, you must know what to do, or you will die. Understanding our physical bodies, what they need, and what nature provides, lies at the basis of

getting through a desert, jungle, or mountain climate or landscape. Book 2: The undead are all over the streets. The apocalypse has begun, and you're left to squander for food, fuel, weapons, or any tradable and usable goods to survive and not turn into a zombie yourself. Just in case an epidemic spreads across the globe and turns this dystopian fantasy into a reality, a guide has been constructed to help you prepare. Book 3: It's not a matter of if but of WHEN a zombie outbreak hits the world. When it does, you will be happy that you took the time to read this brief book of information, and you can rub it into all the zombies' faces, because they got bitten and turned into the undead in the blink of an eye. But not you! You'll know what to do! Book 4: The brain is the most important factor that determines our success. How well we handle the emotions caused by physical changes, how calm we can stay when panic hits our mind, and determined we are to persevere when times get tough; those are things we need to control before we focus on any mechanics. Book 5: If only we could control ourselves and direct our bodies to accomplish more; that's what this guide is all about. Too many people are not in charge of what they do and say. To be the master of your own self is one of life's true purposes. Book 6: It has become possible for a larger group of people: To travel the entire world with a single backpack, some items, and a limited amount of money. Some people still show off their income when travelling, but even with a low budget, "backpacking" is an affordable, doable way of living. And yes, you can also make money online while doing it. Book 7: Many people have no clue what to do when they're camping. When this is the case, it can turn into a boring, frustrating downgrade from a hotel room, or even your own home. But camping can be fun and interesting in a variety of ways. Learn to make the most of your experience in nature and become a super camper! Book 8: You've probably heard of

the Illuminati, of the Denver Airport, or Area 51, but there are a lot more conspiracy theories out there. Some simply remained theories, and others turned out to be real. After all, not everybody makes things up from scratch, do they? Most theories are based on a fraction of truth and some are completely true. In this book, we will expand on some minor and major conspiracy theories that have been kept secret in dark places. Book 9: The Scout motto is "Be prepared." Still, a large group of people doesn't think it's a big deal to have a storage, know something about emergency kits, or prepare just in case well, a big hurricane floods the city or forest fire hits your hometown. Book 10: What if someone suddenly had an accident, was drowning, couldn't breathe, had a burning wound, or was bleeding to death? After you finish, you'll be fully equipped with the bare essentials, the things everyone should know if there is an emergency situation. Book 11: The world is a dangerous place. Muggers, robbers, thieves, rapists, and murderers roam the streets, and we're not even talking about simple dumb people who want to pick a fight or drank a little too much and lost their temper. Self-defense can be done with a clean conscience, and should be learned by anyone who finds him- or herself on the street, especially in the evenings.
