Women ' s movements in Islamic countries have had a long and arduous journey in their quest for the realization of human rights and genuine equality. The author examines whether discriminatory laws against women do in fact originate from Islam and, ultimately, if there is any interpretation of Islam compatible with gender equality. She investigates women ' s rights in Iran since the 1979 Revolution from the perspectives of the main currents of Islamic thought, fundamentalists, reformists, and seculars, using a sociological explanation.

Written by two practising clinicians, this book is designed as a guide for those who work with children. In clear, simple language it focuses upon some of the most common, yet often incapacitating difficulties which are frequently encountered by young children and adolescents. After introducing and discussing different forms of therapy and treatment used in clinical work with children, the book provides a series of chapters, each dealing with a specific difficulty. Drawing upon recent research findings, and employing detailed case illustrations, it seeks to help the reader to understand the nature of each problem and offers a guide as to how the child in difficulty can best be helped. The book is designed to be of particular value to those working in education, social work, health and child-care settings, and anyone who needs to be able to recognize and help children in difficulty.

Sustainable horticulture is gaining increasing attention in the field of agriculture as demand for the food production rises to the world community. Sustainable horticultural systems are based on ecological principles to farm, optimizes pest and disease management approaches through environmentally friendly and renewable strategies in production agriculture. It is a discipline that addresses current issues such as food security, water pollution, soil health, pest control, and biodiversity depletion. Novel, environmentally-friendly solutions are proposed based on integrated knowledge from sciences as diverse as agronomy, soil science, entomology, ecology, chemistry and food sciences. Sustainable horticulture interprets methods and

processes in the farming system to the global level. For that, horticulturists use the system approach that involves studying components and interactions of a whole system to address scientific, economic and social issues. In that respect, sustainable horticulture is not a classical, narrow science. Instead of solving problems using the classical painkiller approach that treats only negative impacts, sustainable horticulture treats problem sources.

This evidence-based book shows how to use ultrasound to identify potential problems and how best to manage them. Working backwards from the fetal finding or maternal problem, this practical resource explores potential diagnostic routes and management plans. Throughout the book, the author uses ‘ case in point ’ examples to focus on how to extract the most useful information from a standard ultrasound examination. Dr. Hobbins, who has spent more than three decades using ultrasound in a perinatal setting, also thoroughly explores vital issues such as comprehensive examination of the fetal anatomy, the meaning of various abnormal findings, how ultrasound can be used to enhance the management of obstetrical complications, dealing with discrepant biometry, diabetes and hypertension, advanced maternal age, preterm labor, intrauterine growth restriction (IUGR) and safety of ultrasound.

My Life in Color offers a unique way to create a vibrant self-portrait. Conceived by Brittany Watson Jepsen, founder of the beloved blog The House That Lars Built, this guided journal is divided into eight color-themed chapters that are filled with thought-provoking prompts. Uncover your passions in the red section, ponder your personal growth in the green section, and think about what calms and centers you in the blue section. This hardcover journal has a removable jacket and exposed binding that shows off its multicolored signatures. It lies perfectly flat and features space to gather mementos and organize them by color. Within these pages, the random aspects of your life--your memories, current obsessions, and dreams for the future--will fall into harmony, because everything is beautiful when it is arranged in rainbow order! Inspired by Craft the Rainbow, also by Brittany Watson Jepsen, My Life in Color is part of a vibrant collection of journals, including one hardcover and one paperback notebook.

This text collates and examines the jurisprudence that currently exists in respect of blood-tied genetic connection, arguing that the right to identity often rests upon the ability to identify biological ancestors, which in turn requires an absence of adult-centric veto norms. It looks firstly to the nature and purpose of the blood-tie as a unique item of birthright heritage, whose socio-cultural value perhaps lies mainly in preventing, or perhaps engendering, a feared or revered sense of ‘ otherness. ’ It then traces the evolution of the various policies on ‘ telling ’ and accessing truth, tying these to the diverse body of psychological theories on the need for unbroken attachments and the harms of being origin deprived. The ‘ law ’ of the blood-tie comprises of several overlapping and sometimes conflicting strands: the international law provisions and UNCRC Country Reports on the child ’ s right to identity, recent Strasbourg case law, and domestic case law from a number of jurisdictions on issues such as legal parentage, vetoes on post-adoption contact, court-delegated decision-making, overturned placements and the best interests of the relinquished child. The text also suggests a means of preventing the discriminatory effects of denied ancestry, calling upon domestic jurists, legislators, policy-makers and parents to be mindful of the long-term effects of genetic ‘ kinlessness ’ upon origin deprived persons, especially where they have been tasked with protecting this vulnerable section of the population.

In recent decades, the importance of sound for remembering the past and for creating a sense of belonging has been increasingly acknowledged. We keep "sound souvenirs" such as cassette tapes and long play albums in our attics because we want to be able to recreate the music and everyday sounds we once cherished. Artists and ordinary listeners deploy the newest digital audio technologies to recycle past sounds into present tunes. Sound and memory are inextricably intertwined, not just through the commercially exploited nostalgia on oldies radio stations, but through the exchange of valued songs by means of pristine recordings and cultural practices such as collecting, archiving and listing. This book explores several types of cultural practices involving the remembrance and restoration of past sounds. At the same time, it theorizes the cultural meaning of collecting, recycling, reciting, and remembering sound and music.
