Earthquake Hazard, Risk and Disasters

Shaking Medicine

In the heart of Europe's current crisis, one of the continent's foremost statesmen issues a clarion call to radically remake the European Union in the mold of the United States' own federal government. Europe is caught in its greatest crisis since the Second World War. The catalog of ills seems endless: an economic crisis spread through most of Europe's Mediterranean tier that has crippled Greece and driven a wedge between northern and southern Europe; terrorist attacks in Paris, Cologne, Brussels, and Nice; growing aggression from Russia in Ukraine and the Baltic states; and refugees escaping war-torn neighbors. The European Union's inability to handle any of these disasters was a driving factor in Great Britain voting to leave, and others may soon follow. The result won't just be a continent in turmoil, but also a serious threat to American and British security—the Atlantic, let alone the Channel, simply isn't big enough to keep European troubles in Europe. For everyone's sake, Europe must survive. The question is how. In *Europe's Last Chance*, Guy Verhofstadt—former prime minister of Belgium and current leader of the liberal faction in the European Parliament—provides the essential framework for understanding Europe today, laying bare the absurdity of a system in which each member state can veto legislation, opt in or out of the Euro, or close borders on a whim. But Verhofstadt does not just indict the European Union, he also offers a powerful vision for how the continent can change for the better. The key, argues Verhofstadt, is to reform the European Union along the lines of America's federal government: a United States of Europe strong enough to stand with the United States of America in making a better, safer world. A visionary book from one of today's luminaries of European leadership, *Europe's Last Chance* is a clarion call to save the European Union, one of the world's greatest chances for peace and prosperity.

The Lords of the Realm

Less than a decade ago, China's air force was an antiquated service equipped almost exclusively with weapons based on 1950s-era Soviet designs and operated by personnel with questionable training according to outdated employment concepts. Today, the People's Liberation Army Air Force (PLAAF) appears to be on its way to becoming a modern, highly capable air force for the 21st century. This monograph analyzes publications of the Chinese military, previously published Western analyses of China's air force, and information available in published sources about current and future capabilities of the PLAAF. It describes the concepts for employing forces that the PLAAF is likely to implement in the future, analyzes how those concepts might be realized in a conflict over Taiwan, assesses the implications of China implementing these concepts, and provides recommendations about actions that should be taken in response.

The Life of Poo

Why we all deserve a life worth living and a death worth dying for 'Most men don't fear death. They fear those things – the knife, the shipwreck, the illness, the bomb – which precede, by microseconds if you're lucky, and many years if you're not, the moment of death.' When Terry Pratchett was diagnosed with Alzheimer's in his fifties he was angry - not with death but with the disease that would take him there, and with the suffering disease can cause when we are not allowed to put an end to it. In this essay, broadcast to millions as the BBC Richard Dimbleby Lecture 2010 and previously only available as part of A Slip of the Keyboard, he argues for our right to choose - our right to a good life, and a good death too.

Wild Ones

The award-winning and bestselling author of Thank You for Smoking delivers a hilarious and whip-smart fake memoir by Herb Nutterman—Donald Trump's seventh chief of staff—who has written the ultimate tell-all about Trump and Russia. Herb Nutterman never intended to become Donald Trump's White House chief of staff. Herb served the Trump Organization for twenty-seven years, holding jobs in everything from a food and beverage manager at the Trump Magnifica to being the first general manager of the Trump Bloody Run Golf Course. And when his old boss asks "his favorite Jew" to take on the daunting role of chief of staff, Herb, spurred on by loyalty, agrees. But being the chief of staff is a lot different from being a former hospitality expert. Soon, Herb finds himself deeply involved in Russian intrigue, deflecting rumors about Mike Pence's high school involvement in a Satanic cult, and leading President Trump's reelection campaign. What

Nutterman experiences is outrageous, outlandish, and otherwise unbelievable—therefore making it a deadly accurate account of being the chief of staff during the Trump administration. With hilarious jabs at the biggest world leaders and Washington politics overall, *Make Russia Great Again* is a timely political satire from “one of the funniest writers in the English language” (Tom Wolfe).

Norman Mailer's *The Fight* focuses on the 1975 World Heavyweight Boxing Championship in Kinshasa, Zaire. Muhammad Ali met George Foreman in the ring. Foreman's genius employed silence, serenity and cunning. He had never been defeated. Together the two men made boxing history in an explosive meeting of two great minds, two iron wills and monumental egos.

Adverse Effects of Vaccines

In 1900, for every 1,000 babies born in the United States, 100 would die before their first birthday, often due to infectious diseases. Today, vaccines exist for many viral and bacterial diseases. The National Childhood Vaccine Injury Act, passed in 1986, was intended to bolster vaccine research and development through the federal coordination of vaccine initiatives and to provide relief to vaccine manufacturers facing financial burdens. The legislation also intended to address concerns about the safety of vaccines by instituting a compensation program, setting up a passive surveillance system for vaccine adverse events, and by providing information to consumers. A key component of the legislation required the U.S. Department of Health and Human Services to collaborate with the Institute of Medicine to assess concerns about the safety of vaccines and potential adverse events, especially in children. *Adverse Effects of Vaccines* reviews the epidemiological, clinical, and biological evidence regarding adverse health events associated with specific vaccines covered by the National Vaccine Injury Compensation Program (VICP), including the varicella zoster vaccine, influenza vaccines, the hepatitis B vaccine, and the human papillomavirus vaccine, among others. For each possible adverse event, the report reviews peer-reviewed primary studies, summarizes their findings, and evaluates the epidemiological, clinical, and biological evidence. It finds that while no vaccine is 100 percent safe, very few adverse events are shown to be caused by vaccines. In addition, the evidence shows that vaccines do not cause several conditions. For example, the MMR vaccine is not associated with autism or childhood diabetes. Also, the DTaP vaccine is not associated with diabetes and the influenza vaccine given as a shot does not exacerbate asthma. *Adverse Effects of Vaccines* will be of special interest to the National Vaccine Program Office, the VICP, the Centers for Disease Control and Prevention, vaccine safety researchers and manufacturers, parents,

caregivers, and health professionals in the private and public sectors.

Shaking the Sugar Tree

Wise-cracking Wiley Cantrell is loud and roaringly outrageous -- and he needs to be to keep his deeply religious neighbors and family in the Deep South at bay. A failed writer on food stamps, Wiley works a minimum wage job and barely manages to keep himself and his deaf son, Noah, more than a stone's throw away from Dumpster-diving. Noah was a meth baby and has the birth defects to prove it. He sees how lonely his father is and tries to help him find a boyfriend while Wiley struggles to help Noah have a relationship with his incarcerated mother, who believes the best way to feed a child is with a slingshot. No wonder Noah becomes Wiley's biggest supporter when Boston nurse Jackson Ledbetter walks past Wiley's cash register and sets his sugar tree on fire. Jackson falls like a wet mule wearing concrete boots for Wiley's sense of humor. And while Wiley represents much of the best of the South, Jackson is hiding a secret that could threaten this new family in the making. When North meets South, the cultural misunderstandings are many, but so are the laughs, and the tears, but, as they say down in Dixie, it's all good.

Great investigative journalism is present-tense literature: part detective story, part hellraising. This is the first anthology of its kind, bringing together outstanding (and often otherwise unavailable) practitioners of the muckraking tradition, from the Revolutionary era to the present day. Ranging from mainstream figures like Woodward and Bernstein to legendary iconoclasts such as I. F. Stone and Ida B. Wells-Barnett, the dispatches in this collection combine the thrill of the chase after facts with a burning sense of outrage. As American history, Shaking the

Foundations offers a you-are-there chronicle of great scandals and debates as reporters revealed them to their contemporaries: Jim Crow and financial trusts, migrant labor and wars, witch-hunts and government corruption. As journalism, these readings—from writers as diverse as Henry Adams and Ralph Nader, Lincoln Steffens and Barbara Ehrenreich—are a source of inspiration for today's muckrakers. For the general reader, Shaking the Foundations reveals investigative journalism as a storytelling force capable of bringing down presidents, freeing the innocent, challenging the logic of wars, and exposing predatory corporations. Other selected contributors include Henry Adams, John Steinbeck, Upton Sinclair, Edward R. Murrow, Rachel Carson, Jessica Mitford, Susan Brownmiller, Anthony Lukas, Neil Sheehan, Drew Pearson, and Jack Anderson.

The thrilling, cinematic story of a community shattered by disaster—and the extraordinary woman who helped pull it back together “An

intimate, moving story about our capacity to care for one another when things fall apart—and, just maybe, on all the ordinary days, too.”—Elizabeth Gilbert In the spring of 1964, Anchorage, Alaska, was a modern-day frontier town yearning to be a metropolis—the largest, proudest city in a state that was still brand-new. But just before sundown on Good Friday, the community was jolted by the most powerful earthquake in American history, a catastrophic 9.2 on the Richter Scale. For four and a half minutes, the ground lurched and rolled. Streets cracked open and swallowed buildings whole. And once the shaking stopped, night fell and Anchorage went dark. The city was in disarray and sealed off from the outside world. Slowly, people switched on their transistor radios and heard a familiar woman’s voice explaining what had just happened and what to do next. Genie Chance was a part-time radio reporter and working mother who would play an unlikely role in the wake of the disaster, helping to put her fractured community back together. Her tireless broadcasts over the next three days would transform her into a legendary figure in Alaska and bring her fame worldwide—but only briefly. That Easter weekend in Anchorage, Genie and a cast of endearingly eccentric characters—from a mountaineering psychologist to the local community theater group staging *Our Town*—were thrown into a jumbled world they could not recognize. Together, they would make a home in it again. Drawing on thousands of pages of unpublished documents, interviews with survivors, and original broadcast recordings, *This Is Chance!* is the hopeful, gorgeously told story of a single catastrophic weekend and proof of our collective strength in a turbulent world. There are moments when reality instantly changes—when the life we assume is stable gets upended by pure chance. *This Is Chance!* is an electrifying and lavishly empathetic portrayal of one community rising above the randomness, a real-life fable of human connection withstanding chaos.

Shake Hands With the Devil

A revolutionary call to reawaken our bodies and minds to powerful healing through ecstatic movement • Shows how shaking medicine is one of the oldest healing modalities--practiced by Quakers, Shakers, Bushmen, Japanese, and others • Teaches readers how to shake for physical as well as spiritual therapeutic benefit Shaking Medicine reintroduces the oldest medicine on earth--the ecstatic shaking of the human body. Most people's worst fear is losing control--of their circumstances, of their emotions, and especially of their bodies. Yet in order to achieve the transcendent state necessary to experience deep healing, we must surrender control. Examining cultural traditions from around the world where shaking has been used as a form of healing--from the Shakers and Quakers of New England to the shaking medicine of Japan, India, the Caribbean, the Kalahari, and the Indian Shakers of the Pacific Northwest--Bradford Keeney shows how shaking can bring forth profound therapeutic benefits. Keeney investigates the full spectrum of the healing cycle that occurs when moving from ecstatic arousal to deep trance relaxation. He explains how the alternating movement produced while shaking brings all the body's energetic systems into balance. He includes practical exercises in how to shake for physical therapeutic benefit, and he shows how these techniques lead ultimately to the shaking medicine that both enables and enhances spiritual attunement.

A funny and sexy Christmas standalone from USA Today Bestseller Delancey Stewart! I'll just admit it right up front—I don't love the holidays. In fact, Christmas makes me downright cranky. Call me the Grinch if you must, but if your dad chose that day to decide he was wrong about that whole wanting a family thing, you'd grow up miffed about mistletoe too. Every candy cane, ugly sweater, and falalalala reminds me of the worst day of my life. So when my uncle—a bigwig network executive—gives me one last shot to salvage my disastrous TV production career on a show called Holiday Homes, I've got no choice but to suck it up, head to the small town of Singletree, and fake festive. The problem? Callan Whitewood. The sexy, sullen former pro-soccer player might be the one person on earth who hates the holidays more than I do. After a devastating injury ended his career, he's left with a limp, no idea what to do with his future, and a cheerless attitude worthy of Ebenezer Scrooge. But I've got a TIME LIMIT to convince the gorgeous grump to allow his home to be featured as the pinnacle of the Christmas episode of the show that's going to save my career. That is, if I can keep my hands off him... but I'm having a bit of trouble sticking to the task. SHAKING THE SLEIGH is a standalone holiday romantic comedy with a satisfying happily ever after, plenty of festive chuckles, some sexy times and a few chinchillas. Maybe a cat. (And there might be a wombat because wombats really do fit into almost any story.)

Europe's Last Chance

“WHO ARE YOU AND WHERE DO YOU COME FROM? ” As a historian, Buzzy Jackson thought she knew the answers to these simple questions—that is, until she took a look at her scrawny family tree. With a name like Jackson (the twentieth most common American surname), she knew she must have more relatives and more family history out there, somewhere. Her first visit to the Boulder Genealogy Society brought her more questions than answers . . . but it also gave her a tantalizing peek into the fascinating (and enormous) community of family-tree huggers and after-hours Alex Haleys. In *Shaking the Family Tree*, Jackson dives headfirst into her family gene pool: flying cross-country to locate an ancient family graveyard, embarking on a weeklong genealogy Caribbean cruise, and even submitting her DNA for testing to try to find her Jacksons. And in the process of researching her own family lore (Who was Bullwhip Jackson?) she meets legions of other genealogy buffs who are as interesting as they are driven—from the boy who saved his allowance so he could order his great-grandfather's death certificate to the woman who spends her free time documenting the cemeteries of Colorado ghost towns. Through Jackson's research

she connects with distant relatives, traces her roots back more than 250 years and in the process comes to discover—genetically, historically, and emotionally—the true meaning of “family” for herself.

The Ground Is Shaking! What Happens During An Earthquake? Geology for Beginners| Children's Geology Books

On the tenth anniversary of the date that UN peacekeepers landed in Rwanda, Random House Canada is proud to publish the unforgettable first-hand account of the genocide by the man who led the UN mission. Digging deep into shattering memories, General Dallaire has written a powerful story of betrayal, naïveté, racism and international politics. His message is simple and undeniable: “Never again.” When Lt-Gen. Roméo Dallaire received the call to serve as force commander of the UN intervention in Rwanda in 1993, he thought he was heading off on a modest and straightforward peacekeeping mission. Thirteen months later he flew home from Africa, broken, disillusioned and suicidal, having witnessed the slaughter of 800,000 Rwandans in only a hundred days. In *Shake Hands with the Devil*, he takes the reader with him on a return voyage into the hell of Rwanda, vividly recreating the events the international community turned its back on. This book is an unsparing eyewitness account of the failure by humanity to stop the genocide, despite timely warnings. Woven through the story of this disastrous mission is Dallaire's own journey from confident Cold Warrior, to devastated UN commander, to retired general engaged in a painful struggle to find a measure of peace, reconciliation and hope. This book is General Dallaire's personal account of his conversion from a man certain of his worth and secure in his assumptions to a man conscious of his own weaknesses and failures and critical of the institutions he'd relied on. It might not sit easily with standard ideas of military leadership, but understanding what happened to General Dallaire and his mission to Rwanda is crucial to understanding the moral minefields our peacekeepers are forced to negotiate when we ask them to step into the world's dirty wars. Excerpt from *Shake Hands with the Devil* My story is not a strictly military account nor a clinical, academic study of the breakdown

of Rwanda. It is not a simplistic indictment of the many failures of the UN as a force for peace in the world. It is not a story of heroes and villains, although such a work could easily be written. This book is a cri de coeur for the slaughtered thousands, a tribute to the souls hacked apart by machetes because of their supposed difference from those who sought to hang on to power. . . . This book is the account of a few humans who were entrusted with the role of helping others taste the fruits of peace. Instead, we watched as the devil took control of paradise on earth and fed on the blood of the people we were supposed to protect.
