Includes selections from Plato, Boethius, Anselm, Thomas Aquinas, David Hume, Kierkegaard, William James, Anthony Flew, accompanied by modern essays.

Cultivator and Country Gentleman

Through psychological interviews with a variety of individuals (including residents of South Florida after Hurricane Andrew), and a loving attention paid to trees encountered in literature and mythology, Perlman explores the shaping effects of trees on consciousness, culture, and ecological concern.

Trees of Power

Mechanical Power

Intimate in size yet quietly breathtaking in scope, this graceful gift book will forever change how you think, and how you feel, about trees. In poetically sparse scientific observations, renowned conservation biologist Gretchen Daily narrates the evolution, impact, and natural wonder of trees. Alongside photographs by Chuck Katz, the text and images form a quiet and moving meditation on *The Power of Trees*. Twenty-six duotone black and white photographs illustrate the development of trees: how trunks were formed, what tree rings tell us about human societies, and how trees define the future of humanity. Pictures of trees threading through the landscape - dotting mountainsides, braiding along the sides of glassine rivers - bear witness to the lyrical force and clarity of Daily's observations. Recreating the authors' hike together through the landscape of the Skagit River in Washington State, the balletic movement between Daily's commentary and Katz's vision reaches out to readers, inviting them to enjoy the landscape through a scientific understanding of trees. At once emotional and intellectual, *The Power of Trees* is the first collection of nature photographs that invites the reader to not only delight in the gorgeous play between light and shadow, but also the fascinating natural mechanisms that create such striking natural beauty. An ecologist by training, Gretchen Daily is an internationally acclaimed conservancy advocate and scholar. Her role as a National Trustee for The Nature Conservancy will feature prominently in the national marketing campaign to bridge the gap between scientific

educators and the general nature reader.

Electrical World

The Power of Trees

The organic grower's guide to planting, propagation, culture, and ecology Trees are our allies in healing the world. Partnering with trees allows us to build soil, enhance biodiversity, increase wildlife populations, grow food and medicine, and pull carbon out of the atmosphere, sequestering it in the soil. Trees of Power explains how we can work with these arboreal allies, specifically focusing on propagation, planting, and individual species. Author Akiva Silver is an enthusiastic tree grower with years of experience running his own commercial nursery. In this book he clearly explains the most important concepts necessary for success with perennial woody plants. It's broken down into two parts: the first covering concepts and horticultural skills and the second with in-depth information on individual species. You'll learn different ways to propagate trees: by seed, grafting, layering, or with cuttings. These time-honored techniques make it easy for anyone to increase their stock of trees, simply and inexpensively. Ten chapters focus on the specific ecology, culture, and uses of different trees, ones that are common to North America and in other temperate parts of the world: Chestnut: The Bread Tree Apples: The Magnetic Center Poplar: The Homemaker Ash: Maker of Wood Mulberry: The Giving Tree Elderberry: The Caretaker Hickory: Pillars of Life Hazelnut: The Provider Black Locust: The Restoration Tree Beech: The Root Runner Trees of Power fills an urgent need for up-to-date information on some of our

most important tree species, those that have multiple benefits for humans, animals, and nature. It also provides inspiration for new generations of tree stewards and caretakers who will not only benefit themselves, but leave a lasting legacy for future generations. Trees of Power is for everyone who wants to connect with trees. It is for the survivalist, the gardener, the homesteader, the forager, the permaculturist, the environmentalist, the parent, the schoolteacher, the farmer, and anyone who feels a deep kinship with these magnificent beings.

The Weekly Market Growers Journal

The Healing Power of Trees

The National Stockman and Farmer

From the birch to the willow, Sharlyn Hidalgo invites you to walk in the footsteps of the druids and enrich your life with the sacred power of trees. This wise and inspiring book will introduce you to all fifteen revered trees of the Celtic Tree Calendar and their unique gifts of healing, guidance, and higher consciousness. Progress through the calendar in sequence or choose a particular month to cultivate a relationship with these majestic spirits of nature. Perform guided meditations and go on journeys to discover the totems, guides, and deities corresponding to each species. Travel through the Wheel of the Year and learn about each tree's astrology, ruling planets, rune symbol, and ogham—its letter of the Celtic tree alphabet. *The Healing Power of Trees* is your guide to living the principles of the Celtic
