The Glass Castle

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

Baby's First Year

Unconventional--yet effective--parenting strategies, carefully curated by the creator of the popular podcast The Longest Shortest Time Some of the best parenting advice that Hillary Frank ever received did not come from parenting experts, but from friends and podcast listeners who acted on a whim, often in moments of desperation. These "weird parenting wins" were born of moments when the expert advice wasn't working, and instead of freaking out, these parents had a stroke of genius. For example, there's the dad who pig-snorted in his baby's ear to get her to stop crying, and the mom who made a "flat daddy" out of cardboard and sat it at the dinner table when her kids were missing their deployed military father. Every parent and kid is unique, and as we get to know our kids, we can figure out what makes them tick. Because this is an ongoing process, Weird Parenting Wins covers children of all ages, ranging in topics from "The Art of Getting Your Kid to Act Like a Person" (on hygiene, potty training, and manners) to "The Art of Getting Your Kid to Tell You Things" (because eventually, they're going to be tight-lipped). You may find that someone else's weird parenting win works for you, or you might be inspired to try something new the next time you're stuck in a parenting rut. Or maybe you'll just get a good laugh out of the mom who got her kid to try beets because it might turn her poop pink.

Cat and Nat's Mom Truths

This caselets-based narrative does not seek to laugh or cry at the predicament of parents or their children. It is also not intended to pass judgments on them. In seeking to understand them and their travails and troubles, care and concerns, joys and sorrows, they become the cornerstone for this book. Are you an anxious, over-concerned parent? Are you overprotective? Are you the slack, indifferent type? Or are you the suspicious or strict parent? It could be that you want to be the best friend to your child. Or you might be a weekend parent

or an online virtual parent for your child. Whatever may be the case, this book can provide a thought-provoking insight. Whether you are a student and researcher of human behavior, a parent or caregiver, a teacher or child-rights activist, it is an eye-opener for everyone. do between the stick turning blue and the drive to the delivery room to make the next nine months go as smoothly as possible. That's where John Pfeiffer steps in. Like any good coach, he's been through it. He's dealt with the morning sickness and doctor visits, painting the baby's nursery and packing the overnight bag, choosing a name, hospital, and the color of the car-seat cover. All the while he remained positive and responsive—there with a "You're beautiful" when necessary—but assertive during the decision-making process. (He didn't want to wind up with a kid named Percy.) And now it's your turn. She might be having the baby, but you have plenty of responsibilities.

Breathe, Mama, Breathe

Full-time FindingJoy.net blogger, speaker, marketer, podcaster, and single mom of seven, Rachel Marie Martin presents a rallying cry to anyone who believes the lie that she is "just a mom." In her characteristic raw and visceral style, Rachel teaches you how to rewrite the pages of your story, follow your passion, and discover the beauty of who you are. Drawing on lessons from her own incredible journey--together with insight from conversations with thousands of other women--Rachel encourages moms to break cycles, take off masks, and prevent fear from taking control. She balances her "no excuses" approach with breathing room and grace for those messy moments in life and mothering. Rachel reminds you there is always a reason to hope, to move forward, and to dare the impossible. You can make changes. You can pursue dreams, find yourself, and live a life of deep happiness and boundless joy. Stop waiting for "someday." Take hold of the moment, and say yes to your dreams.

Be Prepared

"Christakis . . . expertly weaves academic research, personal experience and anecdotal evidence into her book . . . a bracing and convincing case that early education has reached a point of crisis . . . her book is a rare thing: a serious work of research that also happens to be well-written and personal . . . engaging and important." --Washington Post "What kids need from grown-ups (but aren't getting)an impassioned plea for educators and parents to put down the worksheets and flash cards, ditch the tired craft projects (yes, you, Thanksgiving Handprint Turkey) and exotic vocabulary lessons, and double-down on one, simple word: play." --NPR.org The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood, with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child's eye view of the learning environment To a four-year-old watching bulldozers at a construction site or chasing butterflies in flight, the world is awash with promise. Little children come into the world hardwired to learn in virtually any setting and about any matter. Yet in today's preschool and kindergarten classrooms, learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child's intelligence while overtaxing the child's growing brain. These mismatched expectations wreak havoc on the family: parents fear that if they choose the "wrong" program, their child won't get into the "right" college. But Yale early childhood expert Erika Christakis says our fears are wildly misplaced. Our anxiety about preparing and safeguarding our children's future seems to have reached a fever pitch at a time when, ironically, science gives us more certainty than ever before that young children are exceptionally strong thinkers. In her pathbreaking book, Christakis explains what it's like to be a young child in America today, in a world designed by and for adults, where we have confused schooling with learning. She offers real-life solutions to real-life issues, with nuance

and direction that takes us far beyond the usual prescriptions for fewer tests, more play. She looks at children's use of language, their artistic expressions, the way their imaginations grow, and how they build deep emotional bonds to stretch the boundaries of their small worlds. Rather than clutter their worlds with more and more stuff, sometimes the wisest course for us is to learn how to get out of their way. Christakis's message is energizing and reassuring: young children are inherently powerful, and they (and their parents) will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners. This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood, revealing a place that's rich with possibility. From the Hardcover edition.

Paper Towns

What, exactly, do you know about your body? Do you know how your immune system works? Or what your pancreas does? Or the myriad -- and often simple -- ways you can improve the way your body functions? This full-color, visually rich guide answers these questions and more. Matthew MacDonald, noted author of *Your Brain: The Missing Manual*, takes you on a fascinating tour of your body from the outside in, beginning with your skin and progressing to your vital organs. You'll look at the quirks, curiosities, and shortcomings we've all learned to live with, and pick up just enough biology to understand how your body works. You'll learn: That you shed skin more frequently than snakes do Why the number of fat cells you have rarely changes, no matter how much you diet or exercise -- they simply get bigger or smaller How you can measure and control fat That your hair is made from the same stuff as horses' hooves That you use only a small amount of the oxygen you inhale Why blood pressure is a more important health measure than heart rate -- with four ways to lower dangerously high blood pressure Why our bodies crave foods that make us fat How to use heart rate to shape an optimal workout session -- one that's neither too easy nor too strenuous Why a tongue with just half a dozen taste buds can identify thousands of flavors Why bacteria in your gut outnumber cells in your body -- and what function they serve Why we age, and why we can't turn back the clock What happens to your body in the minutes after you die Rather than dumbed-down self-help or dense medical text, *Your Body: The Missing Manual* is entertaining and packed with information you can use. It's a book that may well change your life. Reader comments for *Your Brain: The Missing Manual*, also by author Matthew MacDonald: "Popular books on the brain are often minefields of attractive but inaccurate information. This one manages to avoid most of the hype and easy faulty generalizations while providing easy to read and digest information about the brain. It has useful tricks without the breathless hype of many popular books."-- Elizabeth Zwicky, *The Usenix Magazine* "a unique guide that should be sought after by any who want to maximize what they can accomplish with their mental abilities and resources."-- James A. Cox, *The Midwest Book Review - Wisconsin Bookwatch* "If you can't figure out how to use your brain after reading this guide, you may want to return your brain for another."-- *The Sacramento Book Review*, Volume 1, Issue 2, Page 19 "It's rare to find a book on any technical subject that is as well written and readable as *Your Brain: The Missing Manual*. The book covers pretty much anything you may want to know about your brain, from what makes it up, through how it develops to how to mitigate the affects of aging. The book is easy reading, fact packed and highlighted notes and practical applications. So if you want to learn more about your brain, how it works, how to get the best out of it or just want to stave off the ravages of Alzheimers (see chapter ten for details of how learning helps maintain your brain) then I can't recommend this book highly enough."-- Neil Davis, *Amazon.co.uk* "MacDonald's writing style is perfect for this kind of guide. It remains educational without becoming overly technical or using unexplained jargon. And even though the book covers a broad scope of topics, MacDonald keeps it well organized and easy to follow. The book captures your attention with fun facts and interesting studies that any person could apply to their own understanding of human ability. It has great descriptions of the brain and its interconnected parts, as well as providing full color pictures and diagrams to offer a better explanation of what the author is talking about."-- Janica Unruh, *Blogcritics Magazine*

At nineteen months old an acute illness nearly took her life and left her deaf and blind. At the recommendation of Alexander Graham Bell, her parents contacted the Perkins Institute for the Blind in Boston, and Anne Sullivan was sent to tutor Helen. The story of their early years together, and of Helen's remarkable psychological and intellectual growth, is told in *The Story of My Life*, which first appeared in installments in *Ladies' Home Journal* in 1902. With Anne Sullivan, "Teacher," at her side, Helen Keller graduated from Radcliffe College in 1904, an extraordinary accomplishment for any woman of her time. Helen was dedicated to helping the blind and handicapped, raising funds for the American Foundation for the Blind and lobbying for commissions for the blind in thirty states. A women's rights activist, a Swedenborgian, a socialist, and a world-famous celebrity, Helen Keller received the Presidential Medal of Freedom and many honorary degrees. Her other books include *The World I Live In* (1908), *Midstream: My Later Life* (1929), *Helen Keller's Journal* (1938), and *Let Us Have Faith* (1940). She died in 1968. Her burial urn is in the National Cathedral in Washington, D.C.

The result is a deft-- and hilarious-- dissection of the history of Western parenting, moving from ancient Rome to Puritan New England to the Dr. Spock craze of mid-century America.
